Farm Bill Primer: What Is the Farm Bill?

The farm bill is an omnibus, multiyear law that governs an array of agricultural and food programs. It provides an opportunity for policymakers to comprehensively and periodically address agricultural and food issues. In addition to developing and enacting farm legislation, Congress is involved in overseeing its implementation. The farm bill typically is renewed about every five years. Since the 1930s, Congress has enacted 18 farm bills.

Farm bills traditionally have focused on farm commodity program support for a handful of staple commodities—corn, soybeans, wheat, cotton, rice, peanuts, dairy, and sugar. Farm bills have become increasingly expansive in nature since 1973, when a nutrition title was first included. Other prominent additions since then include horticulture and bioenergy titles and expansion of conservation, research, and rural development titles.

Without reauthorization, some farm bill programs expire, such as the nutrition assistance and farm commodity support programs. Other programs have permanent authority and do not need reauthorization (e.g., crop insurance) and are included in a farm bill to make policy changes or achieve budgetary goals. The farm bill extends authorizations of discretionary programs. The farm bill also suspends long-abandoned permanent laws for certain farm commodity programs from the 1940s that used supply controls and price regimes that would be costly if restored.

The omnibus nature of the farm bill can create broad coalitions of support among sometimes conflicting interests for policies that individually might have greater difficulty achieving majority support in the legislative process. In recent years, more stakeholders have become involved in the debate on farm bills, including national farm groups; commodity associations; state organizations; nutrition and public health officials; and advocacy groups representing conservation, recreation, rural development, faith-based interests, local food systems, and organic production. These factors can contribute to increased interest in the allocation of funds provided in a farm bill.

What Is in the 2018 Farm Bill?

The Agriculture Improvement Act of 2018 (2018 farm bill; P.L. 115-334, H.Rept. 115-1072) was the most recent omnibus farm bill. It contained 12 titles (see **text box**). In November 2023, Congress enacted a one-year extension to cover FY2024 and crop year 2024 (P.L. 118-22, Division B, §102). Provisions in the 2018 farm bill modified some of the farm commodity programs, expanded crop insurance, amended conservation programs, reauthorized and revised nutrition assistance, and extended authority to appropriate funds for many U.S. Department of Agriculture (USDA)

discretionary programs. The 2018 farm bill, as extended, begins expiring at the end of FY2024.

Titles of the Farm Bill (P.L. 115-334)

Title I, Commodities: Provides support for major commodity crops, including wheat, corn, soybeans, peanuts, rice, dairy, and sugar, as well as disaster assistance.

Title II, Conservation: Encourages environmental stewardship of farmlands and improved management through land retirement programs, working lands programs, or both.

Title III, Trade: Supports U.S. agricultural export programs and international food assistance programs.

Title IV, Nutrition: Provides nutrition assistance for low-income households through programs, including the Supplemental Nutrition Assistance Program (SNAP).

Title V, Credit: Offers direct government loans and guarantees to producers to buy land and operate farms and ranches.

Title VI, Rural Development: Supports rural housing, community facilities, business, and utility programs through grants, loans, and guarantees.

Title VII, Research, Extension, and Related Matters: Supports agricultural research and extension programs to expand academic knowledge and help producers be more productive.

Title VIII, Forestry: Supports forestry management programs run by USDA's Forest Service.

Title IX, Energy: Encourages the development of farm and community renewable energy systems through various programs, including grants and loan guarantees.

Title X, Horticulture: Supports the production of specialty crops, USDA-certified organic foods, and locally produced foods and authorizes a regulatory framework for industrial hemp.

Title XI, Crop Insurance: Enhances risk management through the permanently authorized Federal Crop Insurance Program.

Title XII, Miscellaneous: Includes programs and assistance for livestock and poultry production, support for beginning farmers and ranchers, and other miscellaneous and general provisions.

What Was the Estimated Cost in 2018?

Farm bills authorize programs in two spending categories: mandatory and discretionary. While both types of programs are important, mandatory programs usually dominate the farm bill debate. Programs with mandatory spending generally operate as entitlements. The farm bill provides mandatory funding for programs based on multiyear budget estimates (*baseline*). Programs authorized for discretionary funding are not funded in the farm bill and wait for future appropriations action.

Farm bills have both 5-year and 10-year budget projections. The 10-year score for the 2018 farm bill was budget

neutral, and program outlays were projected to be \$867 billion over FY2019-FY2028 (**Table 1**). Four titles accounted for 99% of the 2018 farm bill’s mandatory spending: nutrition (primarily SNAP), commodities, crop insurance, and conservation. Programs in all other farm bill titles accounted for about 1% of mandatory outlays and receive mostly discretionary (appropriated) funds.

Table 1. Budget for the 2018 Farm Bill and the Baseline in February 2024 for Farm Bill Programs
(million dollars, 10-year mandatory outlays)

Titles	2018 Farm Bill at Enactment	Baseline as of February 2024
	FY2019-FY2028 (\$ millions)	FY2025-FY2034 (\$ millions)
Commodities	61,414	61,510
Conservation	59,748	57,919
Trade	4,094	4,990
Nutrition	663,828	1,147,727
Credit	-4,558	a/
Rural Development	-2,362	a/
Research	1,219	1,300
Forestry	10	a/
Energy	737	500
Horticulture	2,047	2,100
Crop Insurance	77,933	123,999
Miscellaneous	3,091	800
Total	867,200	1,400,845

Sources: CRS using CRS Report R45425, *Budget Issues That Shaped the 2018 Farm Bill*; and CRS analysis of the Congressional Budget Office (CBO) February 2024 baseline at <https://www.cbo.gov/about/products/baseline-projections-selected-programs>, for the five largest titles and amounts in law for programs in other titles.

Notes: a/ = Baseline for the credit title is likely negative indicating payments into the Farm Credit System Insurance fund. The rural development title has no current programs with baseline. Baseline for the forestry title is \$10 million or less.

What Is the Current Farm Bill Budget?

The CBO baseline represents budget authority and is a projection at a particular point in time of what future federal spending on mandatory programs would be assuming current law continues. It is the benchmark against which proposed changes in law are measured. Having a baseline provides projected future funding if policymakers decide that programs are to continue.

CBO released a scoring baseline for the 2023 legislative session in May 2023. It may remain the scoring baseline until CBO releases another baseline in spring 2024, at the discretion of the Budget Committees. The February 2024 baseline indicates resources that may be in a new scoring baseline. CRS used this projection for the major farm bill programs, and funding indicated in law for other farm bill

programs that are not included in the annual projection, to estimate a budget availability in farm bill programs of \$682 billion over 5 years (FY2025-FY2029) and \$1,401 billion over 10 years (FY2025-FY2034) (**Figure 1**).

Figure 1. Baseline for Farm Bill Programs, by Title
(billion dollars, 10-year mandatory outlays, FY2025-FY2034)

Source: CRS using the CBO February 2024 baseline for the five largest titles and amounts in law for programs in other titles.

The relative proportions of farm bill spending have shifted over time. In the 2024 projection, the nutrition title is 82% of the baseline, compared with about 76% when the 2018 farm bill was enacted. Sharp increases in the nutrition title reflect pandemic assistance and administrative adjustments to SNAP benefit calculations. For non-nutrition programs, baseline amounts in 2024 are greater than when the 2018 farm bill was enacted (\$253 billion over 10 years as of 2024 compared with \$210 billion over 10 years in 2018).

Supplemental spending is not part of the baseline but may be important because of its size in recent years. In FY2019 and FY2020, the Trump Administration increased outlays by over \$25 billion to producers affected by retaliatory tariffs. From FY2020 to FY2022, Congress and the White House provided over \$30 billion of supplemental pandemic assistance to farms and over \$60 billion for nutrition. In addition, P.L. 117-169 (the Inflation Reduction Act of 2022) added over \$17 billion in outlays for programs in the farm bill’s conservation and energy titles. Since 2018, Congress has authorized more than \$19 billion of ad hoc disaster assistance for agricultural losses. In 2023, the Biden Administration announced \$2 billion from its authority for trade promotion and food aid. Congress may address farm bill programs in light of this funding.
