Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Updated August 9, 2021
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Energy is crucial to operating a modern industrial and services economy. Concerns about the availability and cost of energy and about environmental impacts of fossil energy use have led to a wide variety of federal incentives for renewable energy and energy efficiency. These incentives aim to implement renewable energy and energy efficiency measures and to develop and commercialize renewable energy and energy efficiency technologies.

Many of the existing energy efficiency and renewable energy programs have authorizations tracing back to the 1970s. Many programs have been reauthorized and redesigned repeatedly to meet changing economic factors. The programs apply broadly to sectors ranging from industry to academia and from state and local governments to rural communities.

The Department of Energy (DOE) operates the greatest number of efficiency and renewable energy incentive programs, including RDD&D grants and contracts, weatherization assistance, production incentives, loan guarantees, and technology transfers. DOE also provides grants to states for energy policy development and assists other federal agencies in developing and implementing energy efficient and renewable energy resources.

The Department of Agriculture (USDA) runs several programs that largely focus on biofuels, such as ethanol and wood energy. Other USDA programs include assistance to rural communities with high energy costs, biomass crop assistance, grants and loans to promote energy efficiency and renewable energy for agricultural producers and rural businesses, assistance to general consumers for rural energy savings, and sustainable agricultural research.

The Department of the Treasury administers tax credits and other incentives for energy efficiency and renewable energy. Eligible activities include energy efficient home improvements, renewable energy production, and business investments in energy efficiency and renewable energy.

Other federal agencies with energy efficiency and renewable energy programs include the following:

- Department of the Interior (DOI), with programs on tribal energy production and use;
- Department of Housing and Urban Development (HUD), with energy efficient mortgages and loan programs;
- Small Business Administration (SBA), with loan programs to help borrowers upgrade their facilities and fund energy efficiency or renewable energy projects;
- Fannie Mae, with a “Green Initiative” loan program;
- Department of Health and Human Services (HHS), which provides energy assistance to low-income households; and
- Department of Veterans Affairs (VA), which provides energy efficient mortgages.
A wide range of entities are eligible for these energy efficiency and renewable incentives, including biofuel producers; state, local, and tribal governments; businesses; schools and universities; research organizations; builders and developers; homeowners; utilities; and veterans. Eligibility also includes a variety of energy-related technologies, such as advanced batteries, heating and cooling systems, vehicles and biofuels, appliances, building envelope technologies, renewable energy production technologies, lighting, and electricity generation and transmission.

Introduction

The United States has an abundance of natural resources. For much of the nation’s history, energy availability was not a concern as commerce and industry needs could be met by domestic supplies. However, industrialization and population growth, and the continuing development of a consumer-oriented society, led to growing dependence on foreign sources of energy during the 20th century to supplement the demands of a growing economy.

Recognition of the impacts of depending on foreign energy sources, coupled with concerns over the volatility of prices driven by fluctuations in supply spurred by world events, prompted federal efforts to increase U.S. energy independence and reduce domestic consumption. As a major result, numerous programs have been established, focusing on energy efficiency, domestic conservation resources, and research that targets the development of renewable sources of energy. Many of these programs have roots dating back more than 40 years and have been redesigned many times over that period.

Many of the current programs have been reauthorized and redesigned periodically to meet changing economic conditions and national interests. The programs apply broadly to sectors ranging from industry to academia and from state and local governments to rural communities. Each program has been designed to meet perceived current needs as well as future anticipated challenges.

Since 2005, Congress has passed several major energy laws: the Energy Policy Act of 2005 (EPACT 2005; P.L. 109-58); the Energy Independence and Security Act of 2007 (EISA; P.L. 110-140); the Energy Improvement and Extension Act (EIEA), enacted as Division B of the Emergency Economic Stabilization Act of 2008 (EESA; P.L. 110-343); the American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5); and the Energy Act of 2020 (Division Z of P.L. 116-260). Each of those laws established, expanded, or modified energy efficiency and renewable energy research, development, demonstration, and deployment (RDD&D) programs. The Department of Energy (DOE) operates the greatest number of efficiency and renewable energy incentive programs. The Department of the Treasury and the Department of Agriculture (USDA) operate several programs. A few programs can also be found within the Department of the Interior (DOI), the Department of Housing and Urban Development (HUD), the Small Business Administration (SBA), Fannie Mae, the Department of Health and Human Services (HHS), and the Department of Veterans Affairs (VA).

This report outlines current federal programs and provisions providing grants, loans, loan guarantees, tax credits, and other direct or indirect incentives for energy efficiency, energy conservation, and renewable energy RDD&D. The programs are grouped by administering agency with references to applicable federal agency websites. Incentives are summarized and indexed in the appendixes.

Most program descriptions were compiled from authorizing statutes, the U.S. Code, agency documents and websites, and Administration budget request documents. Other program descriptions and some funding information were compiled from the Database of State Incentives for Renewables and Efficiency (DSIRE), the Assistance Listings (formerly the Catalog of Federal Domestic Assistance or CFDA) housed on the SAM.gov website, and the Energy Star website. Except where noted, budgetary figures were compiled from executive agency budget justifications, the annual Budget of the United States Government, and congressional committee reports.
For more information on agriculture-related grant programs, see CRS Report R45943, *The Farm Bill Energy Title: An Overview and Funding History*, by Kelsi Bracmort; and CRS In Focus IF10288, *Overview of the 2018 Farm Bill Energy Title Programs*, by Kelsi Bracmort. For more information on programs supporting the development and deployment of alternatives to conventional fuels and engines in transportation, see CRS Report R42566, *Alternative Fuel and Advanced Vehicle Technology Incentives: A Summary of Federal Programs*, by Lynn J. Cunningham et al.

Renewable Energy

Biomass

1. **Bioenergy Technologies Office (formerly the Biomass and Biorefinery Systems R&D Program)**

   **Administered by** Office of Energy Efficiency and Renewable Energy (EERE)

   **Authority**
   - Federal Nonnuclear Energy Research and Development Act of 1974 (P.L. 93-577)
   - Energy Policy and Conservation Act (EPCA; P.L. 94-163)
   - Energy Conservation and Production Act (ECPA; P.L. 94-385)
   - Department of Energy Organization Act (P.L. 95-91)
   - Energy Tax Act (P.L. 95-618)
   - National Energy Conservation Policy Act (NECPA; P.L. 95-619)
   - Powerplant and Industrial Fuel Use Act of 1978 (P.L. 95-620)
   - Energy Security Act (P.L. 96-294)
   - National Appliance Energy Conservation Act of 1987 (P.L. 100-12)
   - Federal Energy Management Improvement Act of 1988 (P.L. 100-615)
   - Clean Air Act Amendments of 1990 (P.L. 101-549)
   - Biomass Research and Development Act of 2000 (Title III of Agricultural Risk Protection Act of 2000; P.L. 106-224)
   - Farm Security and Rural Investment Act of 2002 (P.L. 107-171)
   - Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
   - Food, Conservation, and Energy Act of 2008 (P.L. 110-234)
   - American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

   **Annual Funding**
   - $195 million for FY2012
   - $185.2 million for FY2013
   - $182.3 million for FY2014
$175.9 million for FY2015
$225 million for FY2016
$205 million for FY2017
$221.5 million for FY2018
$226 million for FY2019
$259.5 million for FY2020
$255 million for FY2021
$340 million requested for FY2022

Description

This program works with industrial partners, national laboratories, universities, and other stakeholders to develop the technologies and systems needed to cost-effectively transform the nation’s renewable and abundant domestic biomass resources into clean, affordable, and sustainable biofuels, bioproducts, and biopower. In recent years, the program has been primarily geared toward development and deployment of ethanol from non-food feedstocks (e.g., wastes, switchgrass, algae), but is now expanding its scope to include additional alternative fuels, such as bio-butanol, green gasoline, jet fuel, and diesel.

Qualified Applicant(s)

Colleges and universities; profit organizations

Qualified Technologies

Biomass

2. Regional Biomass Energy Grant Programs

Administered by

Bioenergy Technologies Office, EERE

Authority

Department of Energy Organization Act (P.L. 95-91)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding

$0 for FY2011-FY2021
FY2022 budget request data are currently unavailable; the FY2022 DOE budget justifications do not provide details on this program.

Scheduled Termination

None

Description

This program provides assistance to increase America’s use of fuels, chemicals, materials, and power made from domestic biomass on a sustainable basis. Assistance may be used to develop and transfer any of several biomass energy technologies to the scientific and industrial communities. For regional programs, such technologies will be appropriate for the needs and resources of particular regions of the United States. This program has not expired, but it has not been regularly funded since 2011, and it is unlikely that it will receive significant funding in future years.²

Qualified Applicant(s)

State and local governments; colleges and universities; profit organizations; nonprofit organizations

Qualified Technologies

Biomass

For More Information

See program number 81.079 at the SAM.gov website.

¹ Funding source: the Assistance Listings.
² According to the program description in the Assistance Listings at the beta.Sam.gov website on July 9, 2018, and, more recently, on October 18, 2019.
Geothermal

3. Geothermal Technologies Office (GTO)

Administered by EERE

Authority

Geothermal Energy Research, Development, and Demonstration Act of 1974 (P.L. 93-410)
Department of Energy Organization Act (P.L. 95-91)
Energy Tax Act of 1978 (P.L. 95-618)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding

$37 million for FY2012
$35 million for FY2013
$44.8 million for FY2014
$54.3 million for FY2015
$71 million for FY2016
$69.5 million for FY2017
$80.9 million for FY2018
$84 million for FY2019
$110 million for FY2020
$106 million for FY2021
$163.76 million requested for FY2022

Scheduled Termination None

Description

This program partners the federal government with industry, academia, and research facilities to further the development and deployment of innovative geothermal energy technologies. Currently, the program’s technology portfolio has prioritized early-stage R&D in four geothermal categories: hydrothermal, enhanced geothermal systems (EGS), low temperature and co-produced resources, and systems analysis. Competitive solicitations issued as Funding Opportunity Announcements (FOAs) are the principal mechanism used by the GTO to contract for cost-shared research, development, and demonstration projects.

Qualified Applicant(s)

Profit organizations; colleges and universities

Qualified Technologies

Geothermal

Scheduled Termination
None

Description
This program partners with industry, academia, and national laboratories and works in close coordination with Vehicle Technologies and other programs at DOE to overcome technical barriers through R&D of hydrogen production, delivery, and storage technologies; overcome technical barriers to fuel cell technologies for transportation, distributed stationary power, and portable power applications; address safety issues and facilitate the development of model codes and standards; validate and demonstrate hydrogen and fuel cells in real-world conditions; and educate key stakeholders whose acceptance of these technologies will determine their success in the marketplace.

Qualified Applicant(s)
Federal government; national laboratories; colleges and universities; and profit organizations

Qualified Technologies
Hydrogen and fuel cells

For More Information
See EERE’s Hydrogen and Fuel Cell Technologies website; EERE’s Hydrogen and Fuel Cell Technologies Office – Funding Opportunities; and program number 81.087 at the Sam.gov website.

Solar

5. Solar Energy Technologies Office (SETO)

Administered by EERE
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Authority
- Energy Policy and Conservation Act (EPCA; P.L. 94-163)
- Energy Conservation and Production Act (ECPA; P.L. 94-385)
- Department of Energy Organization Act (P.L. 95-91)
- National Energy Conservation Policy Act (NECPA; P.L. 95-619)
- Energy Security Act (P.L. 96-294)
- Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding
- $284.7 million for FY2012
- $269.1 million for FY2013
- $254.3 million for FY2014
- $230.8 million for FY2015
- $241.6 million for FY2016
- $207.6 million for FY2017
- $241.6 million for FY2018
- $246.5 million for FY2019
- $280 million for FY2020
- $280 million for FY2021
- $386.6 million requested for FY2022

Scheduled Termination
- None

Description
SETO partners with industry, national laboratories, and universities to develop and bring solar energy technologies to the marketplace by improving the energy efficiency, cost effectiveness, reliability, resilience, security, siting, integration, manufacturability, installation, decommissioning, and recyclability of solar energy technologies. This program finances R&D in five major subprograms: Photovoltaics (PV), Concentrating Solar Power (CSP), Systems Integration for Solar Technologies, Balance of Systems Soft Cost Reduction, and Manufacturing and Competitiveness.

Qualified Applicant(s)
- Industry; national laboratories; colleges and universities

Qualified Technologies
- Solar

For More Information
See EERE’s Solar Energy Technologies Office website; EERE’s Solar Energy Technologies Office – Funding Opportunities; and program number 81.087 at the SAM.gov website.

Water Power

6. Water Power Technologies Office (formerly Wind and Hydropower Technologies Program)

Administered by
- EERE

Authority
- Energy Policy and Conservation Act (EPCA; P.L. 94-163)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding
- $58.1 million for FY2012
- $54.7 million for FY2013
- $57.8 million for FY2014
- $60 million for FY2015
- $70 million for FY2016
- $84 million for FY2017
- $105 million for FY2018
- $105 million for FY2019
- $148 million for FY2020
- $150 million for FY2021
- $196.6 million requested for FY2022

Scheduled Termination
None

Description
This program partners with the national laboratories, industry, universities, and other federal agencies to promote the development and deployment of technologies capable of generating environmentally sustainable and cost-effective electricity from the nation's water resources (both conventional and marine and hydrokinetic technologies).

Qualified Applicant(s)
Federal, state, local, and tribal governments; national laboratories; industry; small businesses; colleges and universities

Qualified Technologies
Hydroelectric; hydrokinetic energy; wave energy; tidal energy; ocean thermal energy conversion

For More Information
See EERE's Water Power Technologies Office website; EERE’s Water Power Technologies Office – Funding Opportunities; and program number 81.087 at the SAM.gov website.

Wind Energy

7. Wind Energy Technologies Office (formerly Wind and Hydropower Technologies Program)

Administered by EERE

Authority
- Energy Policy and Conservation Act (EPCA; P.L. 94-163)
- Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Annual Funding

- $91.8 million for FY2012
- $86.1 million for FY2013
- $87 million for FY2014
- $105.9 million for FY2015
- $95.5 million for FY2016
- $90 million for FY2017
- $92 million for FY2018
- $92 million for FY2019
- $104 million for FY2020
- $110 million for FY2021
- $204.9 million requested for FY2022

Scheduled Termination
None

Description
This program partners with federal, state, and other stakeholder groups to conduct research and development activities through competitively selected, cost-shared research and development projects with industry to improve the performance, lower the costs, and accelerate the deployment of wind energy technologies. This program finances R&D in four major subprograms: Offshore Wind, Land-based Wind, Distributed Wind, and Grid Integration and Analysis.

Qualified Applicant(s)
Federal, state, local, and tribal governments; national laboratories; industry; small businesses; colleges and universities

Qualified Technologies
Wind

For More Information
See EERE's Wind Energy Office website; EERE's Wind Energy Technologies Office – Funding Opportunities; and program number 81.087 at the SAM.gov website.

Energy Efficiency

Buildings

8. Building Technologies Office (BTO)

Administered by
EEERE

Authority
Energy Policy and Conservation Act (EPCA; P.L. 94-163)
Energy Conservation and Production Act (ECPA; P.L. 94-385)

Energy Tax Act of 1978 (P.L. 95-618)
National Energy Conservation Policy Act (NECPA; P.L. 95-619)
Powerplant and Industrial Fuel Use Act of 1978 (P.L. 95-620)
Energy Security Act (P.L. 96-294)
National Appliance Energy Conservation Act of 1987 (P.L. 100-12)
National Appliance Energy Conservation Amendments of 1988 (P.L. 100-357)
Federal Energy Management Improvement Act of 1988 (P.L. 100-615)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding

- $214.7 million for FY2012
- $204.6 million for FY2013
9. Weatherization Assistance Program (WAP)

Administered by: EERE

Authority: Energy Conservation and Production Act (ECPA; P.L. 94-385)
National Energy Conservation Policy Act (NECPA; P.L. 95-619)
Energy Security Act (P.L. 96-294)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
Title I, Sec. 1011

Annual Funding:
- $68 million for FY2012
- $131.7 million for FY2013
- $173.9 million for FY2014
- $193 million for FY2015
- $215 million for FY2016
- $228 million for FY2017
- $251 million for FY2018
- $254 million for FY2019
- $308.5 million for FY2020
- $315 million for FY2021
- $421 million requested for FY2022

Scheduled Termination: None

Description: This program reduces energy costs for low-income households by increasing the energy efficiency of their homes while ensuring their health and safety. DOE provides funding and technical guidance to states, which manage the day-to-day details of the program. Low-income families receive services from a network of more than 900 local weatherization service providers who install energy efficiency measures in the homes of qualifying homeowners free of charge.
Qualified Applicant(s)  State and tribal governments, including U.S. territories
Qualified Technologies  Weatherization technologies include a wide range of energy efficiency measures for retrofitting homes and apartment buildings. Weatherization service providers choose the best package of efficiency measures for each home based on an energy audit of the home. Typical measures may include installing insulation, sealing ducts, tuning and repairing heating and cooling systems, and if indicated, replacing the same; mitigating air infiltration; and reducing electric base load consumption.

For More Information  See EERE’s Weatherization Assistance Program website; the National Association for State Community Services Program’s (NASCSP’s) WAP Clearinghouse; EERE’s Weatherization Success Stories website; program number 81.042 at the SAM.gov website; and CRS Report R46418, The Weatherization Assistance Program Formula, by Corrie E. Clark and Lynn J. Cunningham.

**Industrial**

10. **Advanced Manufacturing Office (AMO, formerly the Industrial Technologies Program - ITP)**

Administered by  EERE
Authority  Energy Policy and Conservation Act (EPCA; P.L. 94-163)
Energy Conservation and Production Act (ECPA; P.L. 94-385)
Department of Energy Organization Act (P.L. 95-91)
National Energy Conservation Policy Act (NECPA; P.L. 95-619)
Powerplant and Industrial Fuel Use Act of 1978 (P.L. 95-620)
Energy Security Act (P.L. 96-294)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding  $112.7 million for FY2012
$114.3 million for FY2013
$175.4 million for FY2014
$194.2 million for FY2015
$228.5 million for FY2016
$257.5 million for FY2017
$305 million for FY2018
$320 million for FY2019
$395 million for FY2020
$396 million for FY2021
$550.5 million requested for FY2022

Scheduled Termination  None
Description  AMO works with industry to improve industrial energy efficiency and environmental performance while increasing productivity by conducting R&D on new energy efficient technologies; supporting commercialization of emerging technologies; providing plants with access to proven technologies, energy assessments, software tools, and other resources; and promoting energy and carbon management in industry.
### 11. Inventions and Innovations Program

**Administered by**  
EERE

**Authority**  

**Annual Funding**

- $0 for FY2011
- $940,000 for FY2012
- $1 million for FY2013
- $0 for FY2014-FY2018
- $50,000 for FY2019
- $0 for FY2020
- $0 for FY2021

FY2022 budget request data are currently unavailable; the FY2022 DOE budget justifications do not provide details on this program.

**Scheduled Termination**  
None

**Description**  
This program provides financial and technical assistance for research and development of innovative, energy-saving ideas and inventions with future commercial market potential. It supports energy efficiency and renewable energy technology development in areas that align with Office of Energy Efficiency and Renewable Energy programs. This program has not expired, but it has not been regularly funded since 2013, and it is unlikely that it will receive significant funding in future years.4

**Qualified Applicant(s)**  
Individuals; small businesses

**Qualified Technologies**  
Specific energy efficiency and renewable energy technologies not listed

**For More Information**  
See program number 81.036 at the SAM.gov website. The U.S. Department of Energy’s Inventions & Innovations website has been retired. To access information on financial opportunities and current solicitations, visit the Advanced Manufacturing Office’s (formerly the Industrial Technologies Program’s) funding opportunities website.

### Vehicles

**12. Vehicle Technologies Office (VTO)**

**Administered by**  
EERE

**Authority**  
Department of Energy Organization Act (P.L. 95-91)
- Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

3 Funding source: the Assistance Listings.

4 According to the program description in the Assistance Listings at the beta.Sam.gov website, noted on July 9, 2018, October 18, 2019, October 26, 2020, and, most recently, at the SAM.gov website on July 28, 2021.
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Annual Funding
$321 million for FY2012
$303.2 million for FY2013
$282.2 million for FY2014
$272.5 million for FY2015
$310 million for FY2016
$307 million for FY2017
$337.5 million for FY2018
$344 million for FY2019
$396 million for FY2020
$400 million for FY2021
$595 million requested for FY2022

Scheduled Termination
None

Description
The Vehicle Technologies Program works with industry leaders to develop and deploy advanced transportation technologies that could achieve significant improvements in vehicle fuel efficiency and displace oil with other fuels that ultimately can be domestically produced in a clean and cost-competitive manner. Program activities include research, development, demonstration, testing, technology validation, technology transfer, and education.

Qualified Applicant(s)
Industry; colleges and universities; federal, state, and local governments; national laboratories

Qualified Technologies
Hybrid electric systems; biofuels or fuels technology; advanced internal combustion engines; advanced charging and battery systems; advanced propulsion and lightweighting materials; and technology integration

For More Information
See EERE’s Vehicle Technology Office website; EERE’s Vehicle Technologies Office – Funding Opportunities; and EERE’s Vehicle Technologies Program Factsheet.

Other Energy Efficiency and Renewable Energy Programs

Administered by EERE

Authority
Energy Reorganization Act of 1974 (P.L. 93-438)
Department of Energy Organization Act (P.L. 95-91)

Annual Funding5
$322.2 million for FY2012
$36.1 million for FY2013
$27.1 million for FY2014
$33.1 million for FY2015
$19.5 million for FY2016
$41 million for FY2017
$21.7 million for FY2018
$16 million for FY2019
$8.1 million for FY2020 (est.)
$0 for FY2021 (est.)

FY2022 budget request data are unavailable; the FY2022 DOE budget justifications do not provide details on this program.

Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

$50 million for FY2016
$50 million for FY2017
$55 million for FY2018
$55 million for FY2019
$62.5 million for FY2020
$62.5 million for FY2021
$362.5 million requested for FY2022

Scheduled Termination
None

Description
SEP provides grants to states to design and carry out their own renewable energy and energy efficiency programs.

Qualified Applicant(s)
State and tribal governments, including U.S. territories

Qualified Technologies
Emerging renewable energy and energy efficiency technologies

For More Information
See EERE’s State Energy Program website; EERE’s State Energy Program Success Stories website; and program number 81.041 at the SAM.gov website.

16. Office of Indian Energy Assistance Programs (formerly the Tribal Energy Program, TEP)

Administered by
Office of Indian Energy Policy and Programs (IE)

Authority
Energy Policy and Conservation Act (EPCA; P.L. 94-163)
Energy Conservation and Production Act (ECPA; P.L. 94-385)
Department of Energy Organization Act (P.L. 95-91)
Energy Tax Act of 1978 (P.L. 95-618)
National Energy Conservation Policy Act (NECPA; P.L. 95-619)
Power Plant and Industrial Fuel Use Act of 1978 (P.L. 95-620)
Energy Security Act (P.L. 96-294)
National Appliance Energy Conservation Act of 1987 (P.L. 100-12)
Federal Energy Management Improvement Act of 1988 (P.L. 100-615)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding
$10 million for FY2012
$9.4 million for FY2013
$8.3 million for FY2014
$14.7 million for FY2015

6 Within the FY2022 budget request for SEP, $62.5 million would be provided directly to SEP for allocations to the states and territories. The remaining $300 million would be provided to “design and launch the Build Back Better Challenge grants program to support early action on clean energy deployment and incentivize incubation of novel clean energy technology deployment approaches.” See Department of Energy, FY2022 Congressional Budget Request, volume 3, Part 1 (July 2021), p. 200.

H.Rept. 117-98, however, lists SEP and the Build Back Better Challenge Grants program as two separate budget line items of $62.5 million and $300 million, respectively.

7 The Tribal Energy Program (TEP) was funded in FY2014 within the Office of Energy Efficiency and Renewable Energy appropriation.

8 In 2015, TEP was transferred to the Office of Indian Energy (IE) and funding for FY2015 and FY2016 was provided within the DOE Departmental Administration appropriation.
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

$13.2 million for FY2016
$13.5 million for FY2017
$15.7 million for FY2018
$13.2 million for FY2019
$17 million for FY2020
$17 million for FY2021
$116.5 million requested for FY2022

Scheduled Termination
None

Description
This program promotes tribal energy sufficiency, economic growth, and employment on tribal lands through the development of renewable energy and energy efficiency technologies. The program provides financial assistance, technical assistance, education, and training to tribes for the evaluation and development of renewable energy resources and energy efficiency measures. In FY2015, DOE transferred TEP from the Weatherization and Intergovernmental Program (WIP) to the new Office of Indian Energy Policy and Programs (IE).

Qualified Applicant(s)
Tribal governments

Qualified Technologies
Energy efficient technologies: clothes washers; refrigerators/freezers; water heaters; lighting; lighting controls/sensors; chillers; furnaces; boilers; air conditioners; programmable thermostats; energy management; systems/building controls; caulking/weather-stripping; duct/air sealing; building insulation; windows; doors; siding; roofs; comprehensive measures/whole building; and other energy efficiency improvements may be eligible. Renewable energy technologies: passive solar space heat; solar water heat; solar space heat; photovoltaics; wind; biomass; hydroelectric; geothermal electric; geothermal heat pumps

For More Information
See the Office of Indian Energy Policy and Program's website; the Office of Indian Energy Policy and Program's Current Funding Opportunities; National Renewable Energy Laboratory's (NREL's) report: Tribal Energy Program – Assisting Tribes to Realize Their Energy Visions; DSIRE's program summary for the Tribal Energy Program; and CRS In Focus IF11793, Indian Energy Programs at the Department of Energy, by Corrie E. Clark and Mark Holt.

Other DOE Offices/Cross-Cutting Programs

17. Advanced Research Projects Agency — Energy Financial Assistance Program (ARPA-E)

Administered by
Advanced Research Projects Agency-Energy (ARPA-E)

Authority
Department of Energy Organization Act (P.L. 95-91)
America COMPETES Act (P.L. 110-69), Section 5012
America COMPETES Reauthorization Act of 2010 (P.L. 111-358)

Annual Funding
$275 million for FY2012
$250.6 million for FY2013
$280 million for FY2014
$280 million for FY2015
$261.7 million for FY2016
$276.8 million for FY2017

9 For FY2017, DOE requested funding for TEP as a separate appropriation from the Departmental Administrative appropriation “to align the budget structure with IE’s mission and activities.”
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

$353.3 million for FY2018
$334.8 million for FY2019
$390 million for FY2020
$392 million for FY2021
$463 million requested for FY2022

Scheduled Termination

Authorized through FY2025. Passed in December 2020, the Energy Act of 2020 [P.L. 116-260, 42 U.S.C. 16538(i)] also stipulates that “not later than 3 years after December 27, 2020, the Secretary [of Energy] is authorized to enter into a contract with the National Academy of Sciences under which the National Academy shall conduct an evaluation of how well ARPA–E is achieving the goals and mission of ARPA–E.” Furthermore, the evaluation may include “a recommendation on whether ARPA–E should be continued or terminated.”

Description

This program will fund organizations that have proposed sophisticated energy technology R&D projects that (1) translate scientific discoveries and cutting-edge inventions into technological innovations and (2) accelerate transformational technological advances in areas that industry by itself is not likely to undertake because of high technical or financial risk. Transformational energy technologies are those that have the potential to create new paradigms in how energy is produced, transmitted, used, or stored.

Qualified Applicant(s)

ARPA–E welcomes submissions from any type of capable technology research and development entity. This includes, but is not limited to for-profit entities, academic institutions, research foundations, not-for-profit entities, collaborations, and consortia. Individuals are typically eligible to apply for funding. However, any ARPA–E award funding would need to be made to a business entity formed by the applicant, if selected for award negotiations. The lead organization that will enter into the agreement with ARPA–E must be a U.S. entity.

Qualified Technologies

Transformational energy technologies

For More Information

See ARPA–E’s Frequently Asked Questions (FAQ) website; National Academy of Sciences program evaluation: An Assessment of ARPA–E (2017); and program number 81.135 at the SAM.gov website.

18. Electricity Delivery and Energy Reliability, Research, Development and Analysis Grant Program (Office of Electricity - OE)

Administered by Office of Electricity (OE)

Authority

Department of Energy Organization Act (P.L. 95-91)
Energy Security Act (P.L. 96-294)
National Superconductivity and Competitiveness Act of 1988 (P.L. 100-697)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding

$136.2 million for FY2012
$129.2 million for FY2013
$144.2 million for FY2014
$144.2 million for FY2015
$178 million for FY2016
$201.1 million for FY2017
$220 million for FY2018
$139 million for FY2019\(^{10}\)
$172 million for FY2020\(^{11}\)
$193.7 million for FY2021\(^{12}\)
$307 million requested for FY2022\(^{13}\)

### Scheduled Termination
None

### Description
This grant program aims to develop cost-effective technology that enhances the reliability, flexibility, efficiency, resiliency, affordability, and security of the electric grid.

### Qualified Applicant(s)
State, local, and tribal governments; universities; profit organizations; private nonprofit organizations; research organizations

### Qualified Technologies
Specific technologies not listed

### For More Information
See OE’s Technology Development website; and program number 81.122 at the SAM.gov website.

### 19. Federal Energy Management Program (FEMP)

**Administered by**
EERE

**Authority**
Energy Policy and Conservation Act (EPCA; P.L. 94-163)
Energy Conservation and Production Act (ECPA; P.L. 94-385)
Department of Energy Organization Act (P.L. 95-91)
National Energy Conservation Policy Act (NECPA; P.L. 95-619)
Federal Energy Management Improvement Act of 1988 (P.L. 100-615)
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)

**Annual Funding**
$29.9 million for FY2012
$28.3 million for FY2013
$28.2 million for FY2014
$27 million for FY2015
$27 million for FY2016
$27 million for FY2017
$27 million for FY2018
$30 million for FY2019
$40 million for FY2020
$40 million for FY2021
$438 million requested for FY2022

**Scheduled Termination**
None

**Description**
FEMP assists federal agencies in developing and implementing cost-effective energy and water management and energy-related investment practices: (a) to coordinate...

---

\(^{10}\) For FY2019, DOE split the Electricity Delivery and Energy Reliability appropriation into two appropriations: Electricity Delivery (OE) and Cybersecurity, Energy Security, and Emergency Response (CESER). The CESER appropriation for FY2019 was $108.5 million. To compare to previous years, the combined appropriation for the now separated programs in FY2019 would be $247.5 million.

\(^{11}\) The CESER appropriation for FY2020 is $143 million. To compare to previous years, the combined appropriation for the now separated programs in FY2020 would be $315 million.

\(^{12}\) The CESER appropriation for FY2021 is $144 million. To compare to previous years, the combined appropriation request for FY2021 would be $337.7 million.

\(^{13}\) DOE’s FY2022 budget request would transfer responsibility of R&D for energy sector cybersecurity to OE. OE’s appropriation request for FY2022 is $307 million and includes $25 million for the cyber R&D program.
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

and strengthen energy and water resilience; and (b) to promote environmental stewardship.

Qualified Applicant(s) Federal agencies
Qualified Technologies Energy efficient technologies; solar; wind; incremental hydro; ocean; biomass; geothermal

20. Office of Science Financial Assistance Program

Administered by Office of Science
Authority Atomic Energy Act of 1954 (P.L. 83-703), Section 31
Energy Reorganization Act of 1974 (P.L. 93-438), Title I, Section 107
Federal Nonnuclear Energy Research and Development Act of 1974 (P.L. 93-577)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)

Annual Funding

14 $1 billion for FY2012
$965.1 million for FY2013
$1.1 billion for FY2014
$1.1 billion for FY2015
$1.1 billion for FY2016
$1.1 billion for FY2017
$1.3 billion for FY2018
$1.2 billion for FY2019
$1.2 billion for FY2020 (est.)
$1.2 billion for FY2021 (est.)

FY2022 budget request data are unavailable; the FY2022 DOE budget justifications do not contain estimates regarding how much funding from the Office of Science are provided for grants.

Scheduled Termination None

Description The Office of Science’s (SC) mission is to deliver scientific discoveries and major scientific tools to transform our understanding of nature and advance the energy, economic, and national security of the United States. SC accomplishes its mission and advances national goals, in part, by supporting science for advanced and sustainable energy. SC supports a wide range of funding modalities from single principal investigators to large team-based activities to engage in fundamental research on energy production, conversion, storage, transmission, and use.

Qualified Applicant(s) State, local, and tribal governments; colleges and universities; profit commercial organizations; private nonprofit organizations; public nonprofit organizations; small businesses

Qualified Technologies Specific advanced technologies not listed

For More Information See program number 81.049 at the SAM.gov website; and the Office of Science’s Funding Opportunities website.

21. Loan Guarantee Program (Loan Programs Office)

Administered by Loan Programs Office
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
Omnibus Appropriations Act, 2009 (P.L. 111-8)

14 Funding source: the Assistance Listings. The obligations for financial assistance do not include all funding for Office of Science programs.

</table>

---

<sup>15</sup> For FY2014, $42 million was enacted for administrative purposes only, but these expenses were offset by $34.1 million in collections from borrowers for a net appropriation of $7.9 million.

<sup>16</sup> For FY2015, $42 million was enacted for administrative expenses. These administrative expenses were offset by $25 million in collections from borrowers for a net appropriation of $17 million.

<sup>17</sup> For FY2016, $42 million was enacted for administrative expenses. These administrative expenses were offset by $25 million in collections from borrowers for a net appropriation of $17 million.

<sup>18</sup> For FY2017, $37 million was enacted for administrative expenses. These administrative expenses were reduced by (1) an offset of $27 million in collections from applicants and borrowers and (2) a rescission of an additional $9.861 million of administrative appropriations from FY2012 and FY2013 (P.L. 115-31) for a net appropriation of $139,000.

<sup>19</sup> For FY2018, $33 million was enacted for administrative purposes. These administrative expenses were reduced by an offset of $2.1 million in collections from applicants and borrowers for a net appropriation of $30.9 million.

<sup>20</sup> For FY2019, $33 million was enacted for administrative expenses. These administrative expenses were reduced by $20.7 million in collections from applicants and borrowers for a net appropriation of $12.3 million.

<sup>21</sup> For FY2020, $32 million was enacted for administrative expenses. These administrative expenses were reduced by $3 million in collections from applicants and borrowers for a net appropriation of $29 million.

<sup>22</sup> For FY2021, $32 million was enacted for administrative expenses. These administrative expenses are expected to be offset by $3 million for a net appropriation of $29 million.

<sup>23</sup> For FY2022, $179 million was requested, which includes $150 million for credit subsidy costs associated with an additional $1.5 billion of guaranteed loan authority and $32 million for administrative expenses. These expenses would be reduced by an estimated $3 million in collections from applicants and borrowers for a net appropriation budget request of $179 million.

<sup>24</sup> For more information, see CRS Report R40669, *Energy and Water Development: FY2010 Appropriations*, coordinated by Carl E. Behrens.

<sup>25</sup> The authority to enter into new loan guarantees under Section 1705 expired on September 30, 2011, but LPO continues to administer and monitor the portfolio of loan guarantees obligated prior to the expiration date.
Scheduled Termination

None for the permanent (Section 1703) loan guarantee program. Projects authorized by the temporary loan guarantee (Section 1705) had to begin construction no later than September 30, 2011. The Loan Programs Office (LPO) continues to administer and monitor loan guarantees for Section 1705 projects.

Description

This program provides federal loan guarantees to encourage early commercial use in the United States of new or significantly improved technologies in energy projects that (1) avoid, reduce, or sequester air pollutants or anthropogenic emissions of greenhouse gases; and (2) employ new or significantly improved technologies as compared to commercial technologies in service in the United States at the time the guarantee is issued. Temporary loan guarantees were also made under Section 1705 for rapid deployment of certain renewable and electric transmission projects up through September 30, 2011.

Qualified Applicant(s)

State, local, and tribal governments; universities; profit organizations; public nonprofit organizations. No federal entity may apply.

Qualified Technologies

Solar thermal electric; solar thermal process heat; photovoltaics; wind; hydroelectric; renewable transportation fuels; geothermal electric; fuel cells; manufacturing facilities; daylighting; tidal energy; wave energy; ocean thermal; biodiesel

For More Information

See program number 81.126 at the SAM.gov website; DSIRE’s program summary for the Loan Guarantee Program; DOE’s Loan Guarantee Program website; and CRS Insight IN11432, Department of Energy Loan Programs: Title XVII Innovative Technology Loan Guarantees, by Phillip Brown et al.

22. Small Business Innovation Research Program (SBIR)/Small Business Technology Transfer Program (STTR)

Administered by

EEERE

Authority

Small Business Innovation Development Act of 1982 (P.L. 97-219)
Small Business Technology Transfer Program Reauthorization Act of 2001 (P.L. 107-50)
SBIR/STTR Reauthorization Act of 2011 (P.L. 112-81, Div. E, Title I)

Annual Funding

$29.1 million for FY2012
$26.4 million for FY2013 (SBIR: $23.4 million; STTR: $3 million)
$30.8 million for FY2014 (SBIR: $27.4 million; STTR: $3.4 million)
$28.4 million for FY2015 (SBIR: $25.1 million; STTR: $3.3 million)
$30.2 million for FY2016 (SBIR: $26.3 million; STTR: $3.9 million)
$45.2 million for FY2017 (SBIR: $38.9 million; STTR: $6.3 million)
$58.2 million for FY2018 (SBIR: $51 million; STTR: $7.2 million)
$58.9 million for FY2019 (SBIR: $51.5 million; STTR: $7.4 million)
$78.3 million for FY2020 (SBIR: $66.76 million; STTR: $11.57 million)
$65.78 million for FY2021 (SBIR: $57.67 million; STTR: $8.11 million)
$96.14 million requested for FY2022 (SBIR: $84.29 million; STTR: $11.85 million)

Scheduled Termination

Description

Small Business Innovation Research (SBIR) and Small Business Technology Transfers (STTR) are U.S. government programs in which federal agencies with large research

26 Annual funding listed for the Small Business Innovation Research (SBIR) and Small Business Technology Transfers (STTR) programs includes only those funds distributed to DOE’s energy efficiency and renewable energy programs.
and development (R&D) budgets set aside a small fraction of their funding for competitions among small businesses only. DOE’s SBIR-STTR program is designed to stimulate technological innovation by small advanced technology firms and provide new, cost-effective scientific and engineering solutions to challenging problems. EERE funds appropriated for SBIR/STTR are allocated to larger EERE technology programs, detailed earlier in this report, including Biomass, Geothermal, Hydrogen & Fuel Cell, Solar Energy, Water Power, Wind Energy, Advanced Manufacturing, Building Technologies, and Vehicle Technologies.

Qualified Applicant(s)  Small businesses
Qualified Technologies  Research areas include energy production (fossil, nuclear, renewable, and fusion energy); energy use (in buildings, vehicles, and industry); fundamental energy sciences (materials, life, environmental, and computational sciences, and nuclear and high energy physics); environmental management; and nuclear nonproliferation

For More Information  See EERE’s Small Business Innovation Research/Small Business Technology Transfers (SBIR/STTR) website; and program number 10.212 (SBIR) at the SAM.gov website.

23. Tribal Energy Loan Guarantee Program (Loan Programs Office)

Administered by  Loan Program Office
           Indian Tribal Energy Development and Self-Determination Act Amendments of 2017
           (P.L. 115-325), Title I, Section 101(c)
Annual Funding  $9 million for FY2017
                $8.939 million for FY2018
                $1 million for FY2019
                $2 million for FY2021
                $2 million requested for FY2022
Scheduled Termination  None. However, in FY2021, LPO has proposed to terminate the Tribal Energy Loan Guarantee Program.
Description  This is a partial loan guarantee program that can guarantee up to $2 billion in loans to support economic opportunities to tribes through energy development projects and activities.
Qualified Applicant(s)  Tribal government; members of eligible Tribes, including eligible joint ventures or authorized corporate entities
Qualified Technologies  A broad range of energy-related projects can be supported, including, but not limited to solar, wind, geothermal, hydroelectric, electric transmission infrastructure, and energy storage.
For More Information  See LPO’s Tribal Energy Loan Guarantee Program website; CRS Insight IN11452, Department of Energy Loans: Tribal Energy Loan Guarantee, by Corrie E. Clark et al.; and CRS In Focus IF11793, Indian Energy Programs at the Department of Energy, by Corrie E. Clark and Mark Holt.

II. Department of Agriculture

1. Assistance to High Energy Cost Rural Communities Program

Administered by  Rural Development
Authority  Rural Electrification Act of 1936 (P.L. 74-605)
           Grain Standards and Warehouse Improvement Act of 2000 (P.L. 106-472)
Annual Funding  $12.0 million for FY2011
                $9.5 million for FY2012
                $9.2 million for FY2013
$10 million for FY2014
$10 million for FY2015
$10 million for FY2016
$10 million for FY2017
$10 million for FY2018
$10 million for FY2019
$10 million for FY2020
$10 million for FY2021
$10 million requested for FY2022

Scheduled Termination: None

Description: This program provides financial assistance to rural communities with extremely high energy costs (exceeding 275% of the national average).

Qualified Applicant(s): State, local, and tribal governments (including U.S. territories); for-profit businesses; nonprofit businesses; cooperatives; individuals

Qualified Technologies: Not specifically identified

For More Information: See USDA's High Energy Cost Grants website; DSIRE's program summary for the High Energy Cost Grant Program; and program number 10.859 on the SAM.gov website.

2. Bioenergy Program for Advanced Biofuels

 Administered by: Rural Development
 Authority: Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9005
 Agricultural Act of 2014 (P.L. 113-79)
 Agriculture Improvement Act of 2018 (P.L. 115-334)

Annual Funding:
- Mandatory: The 2018 farm bill (P.L. 115-334) authorized mandatory funding of $7 million annually for FY2019-FY2023 to remain available until expended. $7 million was appropriated annually for FY2019, FY2020, and FY2021.

Scheduled Termination: Mandatory funding authorized through FY2023.

Description: The 2008 farm bill established a new Bioenergy Program for Advanced Biofuels to support and expand production of advanced biofuels—that is, fuel derived from renewable biomass other than corn kernel starch—under which USDA would enter into contracts with advanced biofuel producers to pay them for production of eligible advanced biofuels. The policy goal is to create long-term, sustained increases in advanced biofuels production. Payments are of two types: one based on actual production, and a second based on incremental production increases. Not more than 5% of the funds in any year can go to facilities with total refining capacity exceeding 150 million gallons per year (7 C.F.R. Part 4288, Subpart B).

Qualified Applicant(s): Eligible advanced biofuels producers

Qualified Technologies: Payments will be made to eligible advanced biofuel producers for the production of fuel derived from renewable biomass, other than corn kernel starch, to include biofuel derived from cellulose, hemicellulose, or lignin; biofuel derived from sugar and starch (other than ethanol derived from corn kernel starch); biofuel derived

27 In the FY2022 Budget Appendix, USDA notes a transfer of an additional $100 million from the Commodity Credit Corporation (CCC) in FY2020 for $107 million total available funding for that fiscal year, likely reflecting the availability of carryover funding. See the Appendix volume for FY2022 Budget of the United States Government, p.133.

28 For more program information, see the “Advanced Biofuel Payment Program,” RD, USDA at https://www.rd.usda.gov/programs-services/advanced-biofuel-payment-program.
from waste material, including crop residue, other vegetative waste material, animal waste, food waste, and yard waste; diesel-equivalent fuel derived from renewable biomass, including vegetable oil and animal fat; biogas (including landfill gas and sewage waste treatment gas) produced through the conversion of organic matter from renewable biomass; butanol or other alcohols produced through the conversion of organic matter from renewable biomass; and other fuel derived from cellulosic biomass.

For More Information
See program number 10.867 on the SAM.gov website; USDA program website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

3. Biomass Crop Assistance Program (BCAP)

Administered by Farm Services Agency (FSA)

Authority
Farm Security and Rural Investment Act of 2002 (FSRRIA; P.L. 107-171), Title IX
Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9001
created new Section 9011 under FSRIA
Agricultural Act of 2014 (P.L. 113-79), Section 9010
Agriculture Improvement Act of 2018 (P.L. 115-334)

Annual Funding

Scheduled Termination
Funding authorized through FY2023.

Description
BCAP provides assistance to support the production of eligible biomass crops on land within approved BCAP project areas. In exchange for growing eligible crops, the FSA will provide annual payments through 5- to 15-year contracts. Under these contracts up to 50% of establishment costs may also be provided. FSA will also provide matching payments to eligible material owners at a rate of $1 for each $1 per dry ton paid by a qualified biomass conversion facility. Matching payments may not exceed $20 per ton and are limited to no more than two years per participant.

Qualified Applicant(s)
Eligible biomass material owners and eligible biomass producers

Qualified Technologies
Eligible material for a matching payment is renewable biomass, as defined by the 2014 farm bill, with several important exclusions including harvested grains, fiber, or other commodities eligible to receive payments under the Commodity Title (Title I) of the 2014 farm bill. (The residues of these commodities, however, are eligible and may qualify for payment.) Also excluded are animal waste and animal waste by-products including fats, oils, greases, and manure; food waste and yard waste; and bagasse. Eligible crops include renewable biomass, with the exception of crops eligible to receive a payment under Title I of the 2014 farm bill and plants that are invasive or noxious, or have the potential to become invasive or noxious.

For More Information
See the USDA BCAP website; CRS Report R41296, Biomass Crop Assistance Program (BCAP): Status and Issues, by Mark A. McMinimy; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

4. Biomass Research and Development Initiative (BRDI)

Administered by National Institute of Food and Agriculture (USDA)/EERE (DOE)
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Authority
Biomass Research and Development Act of 2000 (BRDA; P.L. 106-224), Title III
Farm Security and Rural Investment Act of 2002 (FSRIA; P.L. 107-171), Title IX, Section 9008
Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9008
Agricultural Act of 2014 (P.L. 113-79), Section 9010
Agriculture Improvement Act of 2018 (P.L. 115-334), Title VII, Section 7507

Annual Funding
- Mandatory: Under the 2014 farm bill, mandatory funds of $3 million were authorized for FY2014 through FY2017 to remain available until expended. No mandatory funds were authorized or appropriated for FY2018. The 2018 farm bill did not extend mandatory funding for BRDI.
- Discretionary: The 2018 farm bill authorized $20 million in annual appropriations for FY2019-FY2023. No discretionary funding has been appropriated through FY2021, and there is no budget request for FY2022.

Scheduled Termination
Funding authorized through FY2023.

Description
BRDI is an interagency collaboration program between USDA’s National Institute of Bioenergy (Institute of Bioenergy, Climate, and Environment) and DOE’s Office of Energy Efficiency and Renewable Energy (Bioenergy Technologies Program). The program provides competitive grants, contracts, and financial assistance for research, development, and demonstration of technologies and processes for biofuels and biobased products.

Qualified Applicant(s)
Colleges and universities (including 1862, 1890, and 1994 Land-Grant Colleges and Universities); national laboratories; federal research agencies; state research agencies; small businesses; nonprofit organizations; and/or a consortium of two or more entities identified as eligible

Qualified Technologies
Biomass; biofuels; biobased products

For More Information
See the Biomass Research and Development (BR&D) Board’s BRDI website; program number 10.312 on the Sam.gov website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

5. Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance Program (formerly the Biorefinery Assistance Program)

Authority
Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9003 created the Biorefinery Assistance Program
Agricultural Act of 2014 (P.L. 113-79), Title IX, Section 9003 amended and renamed the program as the Biorefinery, Renewable Chemical and Biobased Product Manufacturing Assistance Program
Agriculture Improvement Act of 2018 (P.L. 115-334), Title IX, Section 9003

Annual Funding
- Mandatory: Under the 2018 farm bill, mandatory Commodity Credit Corporation (CCC) funding of $50 million for FY2019 and $25 million for FY2020 (to remain available until expended) was authorized for loan guarantees. $50 million was made available for FY2019. $24 million in funding was made available for FY2020. $5 million in funding was made available for FY2021.
- Discretionary: Funds of $75 million annually are authorized to be appropriated for FY2014-FY2018 and FY2019-FY2023. For FY2009-FY2013, $150 million was

29 The original mandatory funding of $25 million for FY2020 was reduced by $1 million for a final total of $24 million in mandatory funds made available to the Biorefinery, Renewable Chemical, and Biobased Product Manufacturing Assistance Program. This reduction is noted in the Appendix volume to the FY2021 Budget of the United States Government on p. 142.
authorized to be appropriated annually. No discretionary funding has been appropriated for this program through FY2021, and there is no budget request for discretionary appropriations for FY2022.30

Scheduled Termination
Mandatory funding authorized through FY2020 and discretionary funding authorized through FY2023.

Description
The purpose is to assist in the development of new and emerging technologies for the development of advanced biofuels, so as to increase the energy independence of the United States; promote resource conservation, public health, and the environment; diversify markets for agricultural and forestry products and agriculture waste material; and create jobs and enhance the economic development of the rural economy. Competitive grants and loan guarantees are made to fund the development, construction, and retrofitting of commercial-scale biorefineries using eligible technologies. Biorefinery grants can provide for up to 30% of total project costs. Loan guarantees are limited to $250 million or 80% of project cost.

Qualified Applicant(s)
Individuals; tribal entities; state government entities; local government entities; corporations; farm cooperatives; farmer cooperative organizations; associations of agricultural producers; national laboratories; institutions of higher education; rural electric cooperatives; public power entities; consortia of any of the previous entities

Qualified Technologies
Technologies being adopted in a viable commercial-scale operation of a biorefinery that produces an advanced biofuel, renewable chemical, or biobased product; and technologies that have been demonstrated to have technical and economic potential for commercial application in a biorefinery that produces an advanced biofuel, renewable chemical, or biobased product.

For More Information
See the USDA program website; USDA’s Biorefinery program fact sheet; program number 10.865 at the SAM.gov website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

6. Community Wood Energy and Wood Innovation Program

Administered by
Forest Service

Authority
Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9013
Agricultural Act of 2014 (P.L. 113-79), Title IX, Section 9012
Agriculture Improvement Act of 2018 (P.L. 115-334), Title VIII, Section 8644

Annual Funding
• Mandatory: No mandatory funding has been authorized.
• Discretionary: Discretionary funding of $25 million annually is authorized to be appropriated for FY2019-FY2023 under the 2018 farm bill. $1.5 million was appropriated for FY2020. This was the first year Congress appropriated funds directly for the Community Wood Energy and Wood Innovation competitive funding program.31 $2 million was appropriated for FY2021, and the agency is requesting $10 million for FY2022.

Scheduled Termination
Funding authorized through FY2023.

Description
The 2018 farm bill extended the program through FY2023 and changed the name to the Community Wood Energy and Wood Energy Innovation Program. The program provides matching grants for the installation of community wood energy systems or building an innovative wood product facility.

A community wood energy system is defined in the 2018 farm bill as an energy system that produces thermal energy or combined thermal energy and electricity, services public facilities owned or operated by state or local governments, and uses woody biomass. This includes single-facility central heating, district heating systems

30 See the Appendix volume to the FY2022 Budget of the United States Government, p. 145: “The 2022 Budget does not request discretionary funding for this program because mandatory funding is provided through the 2018 Farm Bill.”

31 United States Department of Agriculture, Forest Service FY2022 Budget Justification (p.146).
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

for multiple buildings, combined heat and electric systems, and other related biomass energy systems.

The 2018 farm bill added innovative wood product facilities to the program, defining such a facility as a manufacturing or processing plant or mill that produces: building components or systems using panelized wood construction; wood products derived from nanotechnology or other new technology processes; or other innovative wood products using low-value, low-quality wood.

Grants are capped at 35% of the capital cost of the system or facility (50% under special circumstances), and are awarded for systems with a nameplate capacity not exceeding 5 megawatts of thermal energy or combined thermal and electric energy as directed by statute.

### Qualified Applicant(s)
- State and local governments

### Qualified Technologies
- Biomass

### For More Information
See the Forest Service's Wood Innovations Grants program website; the Forest Service's Community Wood Grant Program Awards website; the federal Biomass Research and Development (BR&D) Board's “Wood Innovations Program” Power Point document; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

### 7. New Era Rural Technology Competitive Grants Program

- **Administered by**: National Institute of Food and Agriculture (NIFA)
- **Authority**: National Agricultural Research, Extension, and Teaching Policy Act of 1977 (P.L. 95-113)
  - Food, Conservation, and Energy Act of 2008 (P.L. 110-246)
  - Agricultural Act of 2014 (P.L. 113-79)
  - Agriculture Improvement Act of 2018 (P.L. 115-334), Title VII, Section 7130
- **Annual Funding**: The program received $875,000 for FY2010 and an estimated $875,000 for FY2011. The program authorization expired after the end of FY2012, and it received no funding through FY2018. Despite being reauthorized by the 2018 farm bill (P.L. 115-334), the program has received no funding for FY2019 through FY2021.
- **Scheduled Termination**: Authorized through FY2023.
- **Description**: This program provides grant funding for approved technology development, applied research, and training to develop an agriculture-based renewable energy workforce. The initiative supports bioenergy, pulp and paper manufacturing, and agriculture-based renewable energy resources. The program’s authority expired after FY2012, but the 2018 farm bill reauthorized the program for FY2019 through FY2023.
- **Qualified Applicant(s)**: Public or private nonprofit community colleges; advanced technology centers
- **Qualified Technologies**: Biomass; bioenergy
- **For More Information**: See the archived CFDA web page for program number 10.314; and 7 U.S.C. §3319e.

### 8. Rural Energy For America Program (REAP) Grants and Loans

- **Administered by**: Rural Development
- **Authority**: Food Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9001(a)
  - Agricultural Act of 2014 (P.L. 113-79), Title IX, Section 9007
  - Agriculture Improvement Act of 2018 (P.L. 115-334), Title IX, Section 9007
- **Annual Funding**: Mandatory: The 2018 farm bill retains mandatory CCC funding of $50 million for FY2014 and each fiscal year thereafter. (Thus, unlike other farm bill renewable energy programs, REAP’s mandatory funding authority does not expire with the 2018 farm bill.) Mandatory funds are to remain available until expended.
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

- Discretionary: Under the 2018 farm bill, discretionary funding of $20 million annually is authorized to be appropriated for FY2019-FY2023; of this amount, $335,000 was appropriated for FY2019, $706,000 for FY2020, and $10.4 million for FY2021.32 $30.2 million requested for FY2022.

Under the 2014 farm bill, discretionary funding of $20 million annually was authorized to be appropriated for FY2014-FY2018; of this amount, $3.5 million was appropriated for FY2014, $1.35 million for FY2015, $0.5 million for FY2016, $352,000 for FY2017, and $293,000 for FY2018.

Under the 2008 farm bill, $25 million was authorized to be appropriated annually for FY2009-FY2013. Actual discretionary appropriations have been $5 million in FY2009, $39.3 million in FY2010, $5 million in FY2011, $3.4 million in FY2012 and in FY2013; $3.5 million in FY2014; and $1.35 million in FY2015.

Scheduled Termination
None

Description
REAP promotes energy efficiency and renewable energy for agricultural producers and rural small businesses through the use of: (1) grants and loan guarantees for energy efficiency improvements (EEI) and renewable energy systems (RES); (2) grants for energy audits and renewable energy development assistance; and (3) grants for conducting renewable energy systems (RES) feasibility studies (eligible entities include rural small businesses and agricultural producers).

The 2014 farm bill added new funding and a three-tiered application process with separate application processes for grants and loan guarantees for RES and EEI projects based on the project cost. It also excluded the use of REAP funds for installing retail energy dispensing equipment, such as blender pumps.

The 2018 farm bill amended the financial assistance for energy efficiency improvements and renewable energy systems section to include certain limitations for loan guarantees to purchase and install energy efficient equipment or agricultural production or processing systems. It also placed a cap of 15% of available funds per year to be imposed on loan guarantees to agricultural producers for energy efficiency equipment.

Qualified Applicant(s)
Commercial; schools; state, local, and tribal governments; rural electric cooperatives; agricultural; public power entities

Qualified Technologies
Solar water heat; solar space heat; solar thermal electric; photovoltaics; wind; biomass; hydroelectric; renewable transportation fuels; geothermal electric; geothermal heat pumps; CHP/cogeneration; hydrogen; direct-use geothermal (electric); anaerobic digestion; small hydroelectric; tidal energy; wave energy; ocean thermal; renewable fuels; fuel cells using renewable fuels; microturbines. Specific energy efficiency technologies not identified.

For More Information
See the program website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

9. Rural Energy Savings Program (RESP)

Administered by
Rural Development

Authority
Agricultural Act of 2014 (P.L. 113-79), Title VI, Section 6205
Agriculture Improvement Act of 2018 (P.L. 115-334), Title VI, Section 6303

Annual Funding
- Mandatory: No mandatory funding has been authorized.

---

32 $10 million in additional discretionary funding was appropriated to REAP in the Consolidated Appropriation Act, FY2021 (P.L. 116-260, §781). This additional amount was added to the base discretionary appropriation of $392,000 for loan subsidies and grants and is to remain available until expended. Section 781 directs the Agriculture Secretary to use the additional $10 million “to carry out a pilot program to provide financial assistance for rural communities to further develop renewable energy.”
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

- Discretionary: Under the 2014 farm bill, discretionary funding of $75 million was authorized to be appropriated for FY2014-FY2018. The 2018 farm bill extended this authorization of $75 million for FY2019-FY2023. Of this amount, no funding was appropriated for FY2015 and FY2016; $8 million was appropriated annually for FY2016-FY2018; $10 million was appropriated for FY2019; $12 million was appropriated for FY2020; $11 million was appropriated for FY2021; $22 million requested for FY2022.

Scheduled Termination
Funding authorized through FY2023.

Description
The Rural Energy Savings Program provides loans to entities that agree to make affordable loans to help qualified consumers implement durable and cost-effective energy efficiency upgrades or install cost-effective renewable energy or energy storage systems. The 2018 farm bill requires that loans from eligible entities to qualified consumers may not exceed 5% in interest and must be used for certain purposes (e.g., to establish a loan loss reserve).

Qualified Applicant(s)
Public power entities (public power districts and public utility districts) and rural electric cooperatives that have borrowed, repaid, prepaid, or are paying an electric loan made or guaranteed by the Rural Utilities Service (RUS); or any other entity that is determined eligible for a loan from RUS according to federal regulations (see 7 CFR 1701.101)

Qualified Technologies
On- or off-grid renewable energy systems; on- or off-grid energy storage systems; cost-effective, commercial technologies to increase energy efficiency

Specific renewable energy, energy storage, and energy efficiency technologies not identified.

For More Information
See the program website; USDA’s Rural Energy Savings Program (RESP) fact sheet; program number 10.751 at the Sam.gov website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

10. Sun Grant Program

Administered by National Institute of Food and Agriculture

Authority Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title VII, Section 7526
Agricultural Act of 2014 (P.L. 113-79), Title VII, Sections 7128, 7516
Agriculture Improvement Act of 2018 (P.L. 115-334), Title IX, Sections 7414, 7614

Annual Funding
- Mandatory: No mandatory funding has been authorized.
- Discretionary: Under the previous 2008 and 2014 farm bills, discretionary funding of $75 million was authorized to be appropriated for FY2008-FY2018. The 2018 farm bill extended this authorization of $75 million for FY2019-FY2023. Of this amount, $2.5 million was appropriated in FY2015 and FY2016, and $3 million was appropriated for FY2017-FY2021. $3 million was requested for FY2022.

Scheduled Termination
Funding authorized through FY2023.

Description
The Sun Grant Initiative (SGI) is a national network of land-grant universities and federally funded laboratories coordinated through six regional Sun Grant centers. The centers receive funding to enhance national energy security using biobased energy technologies, to promote diversification and environmental sustainability of agricultural production through biobased energy and product technologies, to promote economic diversification in rural areas through biobased energy and product technologies, and to enhance the efficiency of bioenergy and biomass research and development programs.33 Competitive grants are available to land-grant schools within each region to be used toward integrated, multistate research, extension, and education programs on technology development and implementation.

33 See “Sun Grant Initiative,” at http://www.sungrant.org/.
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

The combined six regions and subregions, covering all 50 states and U.S. territories are North-Central Region, Northeastern Region, Southeastern Region, South-Central Region, Western Region, and the Western Insular Pacific Subcenter Region.

Qualified Applicant(s) Colleges and universities: specifically, eligible applicants must represent a consortium of 1862, 1890, and 1994 land-grant universities made up of one university from each of the (six) Sun Grant regions and subregion.

Qualified Technologies Biomass; biofuels; biobased products

For More Information See the program website; program number 10.320 at the Sam.gov website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R45943, The Farm Bill Energy Title: An Overview and Funding History, by Kelsi Bracmort.

11. Sustainable Agriculture Research and Education Program (SARE)

Administered by National Institute of Food and Agriculture; Agricultural Research Service; and other appropriate agencies

Authority Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624)
Federal Agriculture Improvement and Reform Act of 1996 (P.L. 104-127)
Food, Conservation, and Energy Act of 2008 (P.L. 110-246)

Annual Funding $19.2 million for FY2011
$13.5 million for FY2012
$19.3 million for FY2013
$22.7 million for FY2014
$23 million for FY2015
$25 million for FY2016
$27 million for FY2017
$27 million for FY2018
$37 million for FY2019
$37 million for FY2020
$40 million for FY2021
$60 million requested for FY2022

Scheduled Termination None

Description The Sustainable Agriculture Research and Education Program (SARE) is designed to increase knowledge concerning agricultural production systems that conserve soil, water, energy, natural resources, and fish and wildlife habitat. SARE provides grants through the agricultural bioenergy feedstock and energy efficiency research and extension initiative for projects with the purpose of enhancing the production of biomass energy crops and the energy efficiency of agricultural operations.

Qualified Applicant(s) Federal and state governments; colleges and universities; state agricultural experiment stations; state cooperative extension services; nonprofit organizations; individuals with demonstrable expertise

Qualified Technologies Biomass; biofuels; other technologies not identified.

For More Information See the USDA/NIFA supported website for SARE; program number 10.215 at the SAM.gov website.

III. U.S. Department of the Treasury

Homeowner

1. Residential Energy Conservation Subsidy Exclusion (Corporate and Personal)

   Administered by: Internal Revenue Service
   Authority: 26 U.S.C. §136
   Small Business Job Protection Act of 1996 (P.L. 104-188)
   Scheduled Termination: None
   Description: Energy conservation subsidies provided by public utilities, either directly or indirectly, are nontaxable: "Gross income shall not include the value of any subsidy provided (directly or indirectly) by a public utility to a customer for the purchase or installation of any energy conservation measure."
   Qualified Applicant(s): Residential; multifamily residential
   Qualified Technologies: Technologies installed to reduce electricity or natural gas consumption or improve the management of energy demand in a dwelling unit, including, but not limited to, solar water heat, solar space heat, photovoltaics, and other energy efficiency technologies not identified.

2. Residential Energy Efficiency Tax Credit

   Administered by: Internal Revenue Service
   Energy Improvement and Extension Act of 2008 (EIA; P.L. 110-343)
   American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
   American Taxpayer Relief Act of 2012 (ATRA; P.L. 112-240)
   Tax Increase Prevention Act of 2014 (P.L. 113-295)
   Consolidated Appropriations Act of 2016 (P.L. 114-113)
   Bipartisan Budget Act of 2018 (P.L. 115-123)
   Further Consolidated Appropriations Act, 2020 (P.L. 116-94)
   Consolidated Appropriations Act, 2021 (P.L. 116-260)
   Scheduled Termination: December 31, 2021
   Description: A 10% credit for energy efficiency improvements to the building envelope of existing homes and capped amounts ($50-$300) for the purchase of specific types of high-efficiency heating, cooling, and water-heating equipment. Efficiency improvements or equipment must have served a dwelling in the United States that is owned and used by the taxpayer as a primary residence. For purchases made in 2011-2020, the maximum lifetime amount of homeowner credit for all improvements combined is $500 total. For purchases made in 2009 or 2010, the maximum amount of homeowner credit was $1,500 total.
   Qualified Applicant(s): Residential
   Qualified Technologies: Water heaters; furnaces; boilers; heat pumps; air conditioners; building insulation; windows; doors; roofs; circulating fans used in a qualifying furnace; biomass and stoves that use qualified biomass fuel
3. Residential Renewable Energy Tax Credit

Administered by: Internal Revenue Service

Authority:
26 U.S.C. §25D

Energy Improvement and Extension Act of 2008 (P.L. 110-343)
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
Consolidated Appropriations Act of 2016 (P.L. 114-113)
Bipartisan Budget Act of 2018 (P.L. 115-123)
Consolidated Appropriations Act, 2021 (P.L. 116-260)

Scheduled Termination: December 31, 2023

Description: Prior to 2020, a taxpayer could claim a 30% credit for qualified expenditures for an installed system that serves a dwelling unit located in the United States and is used as a residence by the taxpayer. A 26% credit for all qualified technology systems (see below) is in place through December 31, 2022, but is reduced to 22% for 2023, the final year for the tax credit. The federal tax code (26 U.S.C. §25D) does not explicitly reference energy storage, so stand-alone energy storage systems do not qualify for the tax credit.

Qualified Applicant(s): Residential

Qualified Technologies: Solar electric (including photovoltaics); solar water heating; small wind; fuel cells; geothermal heat pumps; qualified biomass fuel property

Business and Industry

4. Accelerated Depreciation Under the Modified Accelerated Cost-Recovery System (MACRS)

Administered by: Internal Revenue Service

Authority:
26 U.S.C. §168
26 U.S.C. §48
Tax Reform Act of 1986 (P.L. 99-514)
American Taxpayer Relief Act of 2012 (ATRA; P.L. 112-240)
Tax Increase Prevention Act of 2014 (P.L. 113-295)
Consolidated Appropriations Act of 2016 (P.L. 114-113)
Tax Cuts and Jobs Act of 2017 (P.L. 115-97)
The Bipartisan Budget Act of 2018 (P.L. 115-123)

Scheduled Termination: None

Description: Under MACRS, businesses may recover investments in certain property through depreciation deductions. The MACRS establishes a set of class lives for various types of property, ranging from 3 to 50 years, over which the property may be depreciated. A number of renewable energy technologies are classified as five-year property (26 U.S.C. §168(e)(3)(B)(vi)) under MACRS. P.L. 115-97, signed in December 2017, extended the “placed in service” deadline for bonus depreciation. Equipment placed in service after September 2017 and before January 1, 2023 can qualify for 100% bonus depreciation; for equipment placed in
service during the period covering 2023 through 2026, bonus depreciation reduces 20% each year: 80% for 2023, 60% for 2024, 40% for 2025, and 20% for 2026.\textsuperscript{34} Solar illumination, fuel cells, microturbines, CHP, and small wind property are eligible for five-year cost recovery if construction begins before January 1, 2022.

### Qualified Applicant(s)
Commercial; industrial

### Qualified Technologies
- Solar water heat; solar space heat; solar thermal electric; solar thermal process heat; photovoltaics; landfill gas; wind; biomass; renewable transportation fuels; geothermal electric; fuel cells; geothermal heat pumps; municipal solid waste; CHP/cogeneration; solar hybrid lighting; direct use geothermal; anaerobic digestion; microturbines

### For More Information

### 5. Business Energy Investment Tax Credit (ITC)

**Administered by**
Internal Revenue Service

**Authority**
- Energy Tax Act of 1978 (P.L. 95-618)
- Crude Oil Windfall Profit Tax Act of 1980 (P.L. 96-223)
- Tax Reform Act of 1986 (TRA86; P.L. 99-514)
- Technical and Miscellaneous Revenue Act of 1988 (P.L. 100-647)
- Omnibus Budget Reconciliation Act of 1989 (P.L. 101-123)
- Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508)
- Energy Improvement and Extension Act of 2008 (EISA; P.L. 110-343)
- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)
- Consolidated Appropriations Act of 2016 (P.L. 114-113)
- Bipartisan Budget Act of 2018 (P.L. 115-123)
- Consolidated Appropriations Act, 2021 (P.L. 116-260)

**Scheduled Termination**
None for solar and geothermal (at 10% rate); see description below for termination dates for other specific technologies.

**Description**
The energy investment tax credit (ITC) is a credit against the cost of investments in qualified renewable-energy property. There is a permanent ITC for solar and geothermal (electric) technologies equal to 10% of the cost basis of the investment. Temporarily, the credit rate for solar was 30% through 2019, before being reduced to 26% for 2020 through 2022, and 22% for 2023 through 2025.

Investments in small wind property (i.e., a wind turbine with 100 kilowatts of capacity or less) could qualify for a 30% ITC through 2019, with the credit rate reduced to 26% for 2020 through 2022 and 22% for 2023. Investments in fuel cell power plants, fiber-optic solar, and waste energy recovery systems may qualify for the ITC at these same rates. The credit for fuel cells is limited to $1,500 per 0.5 kilowatts in capacity.

---

\textsuperscript{34} Bonus depreciation applies to many classes of property or equipment other than renewable energy technologies covered by MACRS. With 100% bonus depreciation available, businesses can choose to deduct the cost of renewable energy property immediately, as opposed to recovering the cost of the investment over five years (MACRS). Beginning in 2023, when bonus depreciation reduces 20% annually through 2026 (see program description above), businesses can opt to deduct the remaining percentage immediately or the entire amount over five years under MACRS if they choose not to take the bonus depreciation deduction.
Investments in microturbines, combined heat and power (CHP) systems, and geothermal heat pumps qualify for a 10% ITC through 2023.

With the passage of P.L. 116-260, offshore wind energy systems under construction prior to 2026 are eligible for a 30% tax credit.

Technologies eligible for the Production Tax Credit (PTC) are eligible to opt for the ITC in lieu of the PTC if construction commenced prior to January 1, 2021.

Qualified Applicant(s)  
Commercial; industrial; utilities; agricultural

Qualified Technologies  
Solar energy (solar water heat; solar space heat; solar thermal electric; solar thermal process heat; photovoltaics); hybrid (fiber-optic) solar lighting; small wind; large wind; offshore wind; biomass; fuel cells; geothermal (electric, heat pumps, direct-use); CHP/Cogeneration; microturbines; waste energy recovery property

For More Information  
See IRS Form 3468 (Investment Credit); and CRS In Focus IF10479, The Energy Credit or Energy Investment Tax Credit (ITC), by Molly F. Sherlock.

Administered by  
Internal Revenue Service

Authority  
26 U.S.C. §179D

Tax Relief and Health Care Act of 2006 (P.L. 109-432)
Energy Improvement and Extension Act of 2008 (P.L. 110-343)
Tax Increase Prevention Act of 2014 (P.L. 113-295)
Consolidated Appropriations Act of 2016 (P.L. 114-113)
Bipartisan Budget Act of 2018 (P.L. 115-123)
Further Consolidated Appropriations Act, 2020 (P.L. 116-94)
Consolidated Appropriations Act, 2021 (P.L. 116-260)

Scheduled Termination  
No termination date. This tax deduction was made permanent with passage of the Taxpayer Certainty and Disaster Tax Relief Act of 2020 (Division EE, section 102 of the Consolidated Appropriations Act of 2021, P.L. 116-260).

Description  
A tax deduction is available to owners of new or existing buildings who install (1) interior lighting, (2) building envelope, or (3) heating, cooling, ventilation, or hot water systems that reduce the building’s total energy and power cost by 50% or more in comparison to a building meeting minimum requirements set by ASHRAE/IESNA Standard 90.1.

The maximum deduction allowed is $1.80 per square foot. A reduced deduction may be available if a single system is upgraded (lighting, heating and cooling, or building envelope) and the 50% reduction threshold is not met. Separate energy cost reduction percentage thresholds are specified for single-system upgrades. The maximum deduction for a single-system improvement is $0.60 per square foot. Government entities making energy-efficiency upgrades to public buildings, such as schools, can allocate the Section 179D deduction to designers of energy-efficient commercial building property.

With the passage of P.L. 116-260, this deduction is now adjusted annually for inflation (cost-of-living adjustment).

Qualified Applicant(s)  
Commercial; builder/developer; state government; federal government (deductions associated with government buildings are transferred to the designer)

Qualified Technologies  
Equipment insulation; water heaters; lighting; lighting controls/sensors; chillers; furnaces; boilers; heat pumps; air conditioners; caulking/weather-stripping; duct/air sealing; building insulation; windows; doors; siding; roofs; comprehensive measures/whole building

Bipartisan Budget Act of 2018 (P.L. 115-123)

Further Consolidated Appropriations Act, 2020 (P.L. 116-94)

Consolidated Appropriations Act, 2021 (P.L. 116-260)

Scheduled Termination

December 31, 2021

Description

Contractors building energy-efficient homes and producers of manufactured energy-efficient homes are eligible for a tax credit for each qualifying new home they build that is purchased before 2022. The amount of the credit is equal to $2,000 per home for homes built by contractors and $1,000 per manufactured home.

To be eligible, an energy-efficient new home is required to have annual heating and cooling consumption that is at least 50% (30% in the case of manufactured homes) below a comparable unit. The home is also required to be in accordance with the standards of the 2006 International Energy Conservation Code. Contractors and manufacturers claiming this credit are required to submit certification to an eligible certifier before claiming the credit.

Qualified Applicant(s)

Builder/developer

Qualified Technologies

Comprehensive measures/whole building

**Bipartisan Budget Act of 2018** (P.L. 115-123)
**Further Consolidated Appropriations Act, 2020** (P.L. 116-94)
**Consolidated Appropriations Act, 2021** (P.L. 116-260)

### Renewable Energy Production Tax Credit

**Scheduled Termination**: December 31, 2021

**Description**: The federal renewable electricity Production Tax Credit (PTC) is a per-kilowatt-hour tax credit for electricity generated by qualified energy resources and sold by the taxpayer to an unrelated person during the taxable year. The duration of the credit is 10 years after the date the facility is placed in service for all facilities placed in service after August 8, 2005; unused credits may be carried forward for up to 20 years following the year they were generated or carried back one year if the taxpayer files an amended return.

P.L. 116-260 extended the expiration date for this tax credit for one year to December 31, 2021. Wind projects starting construction in either 2020 or 2021 will qualify for a production tax credit at 60% of the full rate on the electricity produced for 10 years. Tax credits for other technologies may be claimed at the full rate.

**Qualified Applicant(s)**: Commercial; industrial

**Qualified Technologies**: Wind (all); biomass; landfill gas; hydroelectric; geothermal electric; municipal solid waste; hydrokinetic power (i.e., flowing water); anaerobic digestion; small hydroelectric; tidal energy; wave energy; ocean thermal

IV. Department of the Interior

1. Energy and Mineral Development Program (EMDP): Minerals and Mining on Indian Lands

Administered by
Bureau of Indian Affairs (BIA); Division of Energy and Mineral Development (DEMD)

Authority
Indian Self-Determination and Education Assistance Act (P.L. 93-388), 25 U.S.C. §450

Annual Funding
$12.87 million for FY2011
$12.7 million for FY2012
$12 million for FY2013
$9.62 million for FY2014
$5.14 million for FY2015
$6 million for FY2016
$5.3 million for FY2019

No data available for FY2017, FY2018, FY2020, or FY2021

Scheduled Termination
None

Description
Funding may be used to facilitate the inventory, assessment, promotion, and marketing of both renewable and nonrenewable energy and mineral resources on Indian lands. Funds are awarded competitively to support assessment and inventory programs or to develop baseline data, but they cannot be used for development purposes.

Qualified Applicant(s)
Federally recognized Indian tribes; individual American Indian mineral owners

Qualified Technologies
Renewable energy technologies

For More Information
See BIA’s Energy and Mineral Development Program (EMDP) website; and program number 15.038 at the SAM.gov website; or contact the Division of Energy and Mineral Development at (303) 969-5270.

2. Tribal Energy Development Capacity (TEDC) Grant Program

Administered by
Bureau of Indian Affairs

Authority

Annual Funding
$250,000 for FY2011
$0 for FY2012
$400,000 for FY2013 (est.)
$700,000 for FY2014
$1.56 million for FY2015
$1.4 million for FY2016
$1.7 million for FY2017
$1 million for FY2019

No data available for FY2018, FY2020, or FY2021

Scheduled Termination
None
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Description
This program provides grants to Indian tribes to (1) develop and sustain the managerial and technical capacity needed to develop their energy resources; and (2) properly account for resulting energy production and revenues.

Qualified Applicant(s)
Tribal governments

Qualified Technologies
Renewable energy technologies

For More Information
See program number 15.148 at the SAM.gov website; BIA’s Tribal Energy Development Capacity Grant Program website; or contact the Division of Energy and Mineral Development at (303) 969-5270.

V. Small Business Administration

1. 7(a) Loan Guarantees

Administered by
Small Business Administration (SBA)

Authority
Small Business Act of 1953 (P.L. 83-163)

Annual Funding
7(a) loan guaranty administrative costs are funded through the SBA’s appropriation for business loan administration ($159.5 million in FY2010, $152.694 million in FY2011, $147.958 million in FY2012, $140.219 million in FY2013 (after sequestration), $151.560 million in FY2014, $147.726 million in FY2015, $152.726 million in FY2016, $152.726 million in FY2017, $152.782 million in FY2018, $155.150 million in FY2019 and FY2020, and $160.3 million in FY2021). The SBA reports that it spent $95.090 million in FY2010, $88 million in FY2011, $93.640 million in FY2012, $75.390 million in FY2013, $66.578 million in FY2014, $63.013 million in FY2015, $75.791 million in FY2016, $82.173 million in FY2017, $89.785 million in FY2018, $91.569 million in FY2019, and $71.723 million on 7(a) loan administration in FY2021. In addition, the 7(a) loan guaranty program was provided $80 million in FY2010, $80 million in FY2011, $139.4 million in FY2012, $213.8 million (after sequestration) in FY2013, $99.0 million in FY2020, and $15 million in FY2021 for loan credit subsidies. No funding was provided for loan credit subsidies for FY2014 through FY2019.

Scheduled Termination
None

Description
This program guarantees loans from lenders to small businesses that are unable to obtain financing on reasonable terms and conditions in the private credit marketplace, but can demonstrate an ability to repay loans if granted, in a timely manner. Guaranteed loans are made available to for-profit small businesses. The SBA’s 7(a) lending authority includes (1) regular 7(a); (2) SBAExpress Program; (3) the CapLines Program; (4) Small/Rural Lender Advantage initiative; (5) Export Express Program; (6) Export Working Capital Program; (7) International Trade; and (8) Community Advantage initiatives.

Qualified Applicant(s)
Small businesses meeting the size and eligibility standards

Qualified Technologies
Not specifically listed

For More Information
See CRS Report R41146, Small Business Administration 7(a) Loan Guaranty Program, by Robert Jay Dilger; the SBA website; and program number 59.012 at the SAM.gov website.

2. 504 Loan Guarantees

Administered by
Small Business Administration (SBA)

Authority
Small Business Investment Act of 1958 (P.L. 85-699)

Annual Funding
504 loan guaranty administrative costs are funded through the SBA’s appropriation for business loan administration ($159.5 million in FY2010, $152.694 million in FY2011, $147.958 million in FY2012, $140.219 million in FY2013 (after sequestration), $151.560 million in FY2014, $147.726 million in FY2015, $152.726

In addition, the 504 loan guaranty program was provided $67.7 million in FY2012, $98.1 million (after sequestration) in FY2013, $107.0 million in FY2014, and $45.0 million in FY2015 for loan subsidy costs.

Scheduled Termination
None

Description
This program provides long-term fixed rate financing for major fixed assets, such as land, buildings, equipment, and machinery. Of the total project costs, a third-party lender must provide at least 50% of the financing; the Certified Development Company provides up to 40% of the financing through a 100% SBA-guaranteed debenture; and the applicant provides at least 10% of the financing. Qualified projects are required to modernize or upgrade facilities by (1) reducing energy use by at least 10%; (2) employing sustainable or low-impact design that reduces fossil fuel use; (3) planning, equipping, and/or installing process upgrades or renewable energy sources; or (4) supporting renewable fuels production by biodiesel and ethanol producers.

Qualified Applicant(s)
Small businesses meeting the size and eligibility standards

Qualified Technologies
Fossil fuels; energy efficiency equipment; renewable energy sources (unspecified); renewable fuels, including biodiesel and ethanol

For More Information
See CRS Report R41184, Small Business Administration 504/CDC Loan Guaranty Program, by Robert Jay Dilger; the SBA website; and program number 59.041 at the SAM.gov website.

VI. U.S. Department of Housing and Urban Development

1. Energy Efficient Mortgages (EEMs)

Administered by
Federal Housing Administration (FHA) and Department of Veterans Affairs (VA).

Conventional mortgages: Private lenders that sell mortgage loans to Fannie Mae or Freddie Mac may also offer Energy Efficient Mortgages (EEMs).

Authority
EEMs were initially introduced by lenders in the 1980s. In 1992, three pieces of legislation passed by Congress worked toward standardizing and expanding the use of EEMs. In 1992, Congress established an FHA Energy Efficient Mortgage Pilot Program (P.L. 102-550). The program was later expanded beyond five states to become a national program. The Housing and Economic Recovery Act of 2008 (HERA; P.L. 110-289) increased the maximum amount that can be added to an FHA mortgage for energy efficient improvements. The 111th Congress included incentives to encourage green home improvements in the American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5).

Scheduled Termination
None

Description
Homeowners can take advantage of EEMs to finance a variety of energy efficiency measures, including renewable energy technologies, in a new or existing home. The federal government directly provides these loans through the FHA and VA lending programs. Fannie Mae and Freddie Mac will also purchase EEMs from primary lenders. Primary lenders may issue EEMs that do not conform to underwriting standards.
Qualified Applicant(s) The loan is available to anyone who meets the income requirements for FHA's Section 203 (b) program, provided the applicant can meet the monthly mortgage payments. New and existing owner-occupied homes of up to two units qualify for this loan. Cooperative units are not eligible. VA: available to qualified military personnel, reservists, and veterans; Conventional: Applicants qualifying for a conventional mortgage are also eligible for an energy efficient mortgage.

Qualified Technologies Passive solar space heat; solar water heat; solar space heat; photovoltaics; daylighting; and other technologies not specifically identified

For More Information See the HUD, RESNET (Residential Energy Services Network), Energy Star, and DSIRE websites.

2. FHA PowerSaver Loan Program

Administered by Federal Housing Administration (FHA)

Authority No statutory authority. HUD developed the PowerSaver as part of the Recovery Through Retrofit initiative launched in May 2009 by the White House Task Force on Middle Class Working Families to develop federal actions for expanding green job opportunities in the United States and boosting energy savings by improving home energy efficiency.

Scheduled Termination PowerSaver began as a nationwide two-year pilot program, launching in 2011. No termination date for this program is listed in online government information sources identified at this time.

Description PowerSaver offers FHA-backed loans, with three financing options for homeowners to make energy efficiency and renewable energy upgrades in their residences: (1) PowerSaver Home Energy Upgrade (up to $7,500) for smaller projects; (2) PowerSaver Second Mortgage (Title I, up to $25,000) for larger retrofit projects; and (3) PowerSaver Energy Rehab (203(k)). This 203(k) loan is for home purchase or refinance, targeting either home buyers wishing to combine home improvements with a home purchase or to homeowners wishing to include home improvements when refinancing an existing mortgage. For the 203(k), current loan limits for a single-unit property vary by area from $217,500 to $625,000. For all three PowerSaver products, borrowers must select from a list of approved PowerSaver lenders.

Qualified Applicant(s) These loans are available to homeowners who meet the following criteria: a minimum credit score of 660 and a maximum total debt to income ratio of 45% (monthly income divided by monthly debt payments). Eligible housing is limited to single unit homes that must be owner-occupied.

Qualified Technologies Energy efficient improvements, including installation of insulation, duct sealing, replacement doors and windows, HVAC systems, water heaters, home automation systems and controls (e.g., smart thermostats), solar panels, solar thermal hot water systems, small wind power, and geothermal systems.

For More Information See EERE's fact sheet; DSIRE website; and FHA's approved list of lenders for PowerSaver.

VII. Department of Health and Human Services

1. Low Income Home Energy Assistance Program (LIHEAP)

Administered by Administration For Children and Families

Office of Community Services, Division of Energy Assistance

Authority Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35), Title XXVI, §2602
The Human Services Amendments of 1994 (P.L. 103-252), Title III, §§302–304(a), 311(c)(1)
Community Opportunities, Accountability, and Training and Educational Services Act of 1998 (P.L. 105-285), Title III, §302,
**Description**

LIHEAP is a federal program that helps low-income households pay for heating or cooling their homes. In most states, it also helps people make sure their homes are more energy efficient by paying for certain home improvements, known as weatherization.

Funds are allotted to states, tribes, and territories according to a formula prescribed by the LIHEAP statute. State, tribal, and territorial governments manage the day-to-day details of the program, including the award of assistance to eligible applicants.

The LIHEAP statute limits the amount of funds that each grantee (state, tribe, or territory) may spend on weatherization to 15% of the funds available, or up to 25% with a waiver from HHS. However, in cases of floods or natural disasters, work can be done under the crisis part of the grantee’s LIHEAP program, thus bypassing the weatherization limits.

**Qualified Applicant(s)**

State and tribal governments, including U.S. territories

**Qualified Technologies**

Weatherization technologies include a wide range of energy efficiency measures for retrofitting homes and apartment buildings. Typical measures may include installing insulation; sealing ducts; tuning and repairing broken or inefficient heating and cooling systems and if indicated, replacing the same; mitigating air infiltration; and reducing electric base load consumption.

**For More Information**

See CRS Report RL31865, LIHEAP: Program and Funding, by Libby Perl.

---

35 The Office of Community Services (OCS), Division of Energy Assistance (DEA), initially released approximately $3.32 billion of FY2020 regular block grant funding to LIHEAP grantees on November 1, 2019. This funding was provided under the Continuing Appropriations Resolution 2020, and Health Extenders Act of 2019, (P.L. 116-59). A second release of $381 million was appropriated under the Further Consolidated Appropriations Act, 2020 (P.L. 116-94) and announced on February 27, 2020. A third round of funding of $37 million was released on April 3, 2020, under the Further Consolidated Appropriations Act, 2020 (P.L. 116-94). Finally, an additional $900 million in supplemental funding was appropriated for FY2020 under the CARES Act (P.L. 116-136) on March 27, 2020. Those funds were released on May 8, 2020. The CARES Act allows LIHEAP grantees to carryover up to 100% of the supplemental funding for obligation in FY2021. Grantees must obligate at least 90% of the nonsupplemental FY2020 funding by September 30, 2020.

36 OCS’ Division of Energy Assistance initially released approximately $3.36 billion of FY2021 regular block grant funding to LIHEAP grantees on November 5, 2020. This funding was provided under the Continuing Appropriations Act, 2021 and Other Extensions Act (P.L. 116-159). A second release of $346 million was appropriated by Congress under the Consolidated Appropriations Act, 2021 (P.L. 116-260), signed into law on December 27, 2020. A third round of $4.5 billion in supplemental LIHEAP funding for FY2021 was announced on May 4, 2021. These supplemental funds were appropriated under the American Rescue Plan Act of 2021 (ARPA; P.L. 117-2).
VIII. Department of Veterans Affairs

1. Energy Efficient Mortgages (EEMs)

Administered by: FHA and VA. Conventional mortgages: Private lenders that sell mortgage loans to Fannie Mae or Freddie Mac may also offer EEMs.

Authority: EEMs were initially introduced by lenders in the 1980s. In 1992, three pieces of legislation passed by Congress worked toward standardizing and expanding the use of EEMs. In 1992, Congress established an FHA Energy Efficient Mortgage Pilot Program (P.L. 102-550). The program was later expanded beyond five states to become a national program. The Housing and Economic Recovery Act of 2008 (HERA; P.L. 110-289) increased the maximum amount that can be added to an FHA mortgage for energy efficient improvements. The 111th Congress included incentives to encourage green home improvements in the American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5).

Scheduled Termination: None

Description: Homeowners can take advantage of EEMs to finance a variety of energy efficiency measures, including renewable energy technologies, in a new or existing home. The U.S. federal government directly provides these loans through the FHA and VA lending programs. Fannie Mae and Freddie Mac will also purchase EEMs from primary lenders. Primary lenders may issue EEMs that do not conform to underwriting standards.

Qualified Applicant(s): The loan is available to anyone who meets the income requirements for FHA’s Section 203 (b) program, provided the applicant can meet the monthly mortgage payments. New and existing owner-occupied homes of up to two units qualify for this loan. Cooperative units are not eligible. VA: available to qualified military personnel, reservists, and veterans; Conventional: applicants qualifying for a conventional mortgage are also eligible for an energy efficient mortgage.

Qualified Technologies: Passive solar space heat; solar water heat; solar space heat; photovoltaics; daylighting; and other technologies not specifically identified

For More Information: See the HUD, RESNET, Energy Star, and DSIRE websites.

IX. Fannie Mae

1. Fannie Mae Green Initiative-Loan Program

Administered by: Fannie Mae

Authority: Housing and Urban Development Act of 1968 (P.L. 90-448)

Scheduled Termination: None

Description: This program provides owners of multifamily properties (rental or cooperative properties with five or more units) with two financing options, as well as tools to make energy- and water-saving property improvements:

- The Green Rewards program provides up to an additional 5% of loan proceeds by including up to 75% of projected owner energy and water savings and 25% of projected tenant savings in the loan underwriting. Selected property upgrades must be completed within 12 months of loan closing.

- The Green Building Certification financing option provides preferential pricing on loans secured by a multifamily property with a Fannie Mae-recognized green building certification. Fannie Mae currently recognizes 40 Green Building...

---

37 The third financing option previously available, Fannie Mae’s Green Preservation Plus product, was retired in November 2018. See Fannie Mae’s Fannie Mae Multifamily Green Bond Framework (July 2020, p.5)
Certifications from 13 Green Building Certification organizations. Depending on the type of certification secured, loans can be used toward a newly constructed or retrofitted multifamily property.

**Qualified Applicant(s)**
- Only multifamily properties are eligible for the program.

**Qualified Technologies**
- Clothes washers, dishwashers, dehumidifiers, water heaters, lighting, furnaces, boilers, heat pumps, air conditioners, caulking/weather-stripping, duct/air sealing, building insulation, windows, roofs, comprehensive measures/whole building, custom/others pending approval, insulation, tankless water heaters

**For More Information**
- See the Fannie Mae and DSIRE websites; Fannie’s Mae’s *Multifamily Green Financing* fact sheet; and Fannie Mae’s *Green Building Certifications At-A-Glance* fact sheet.

---

38 For a list of the Green Building Certifications and certification organizations, see Fannie’s Mae’s *Green Building Certification* fact sheet, published in February 2020.
## Appendix A. Summary of Federal Renewable Energy and Energy Efficiency Incentives/Index of Programs

### Table A-1. Federal Incentives by Agency

<table>
<thead>
<tr>

**Source:** CRS.

a. Program numbers correspond to agency (Roman numeral) and (Arabic) number assigned to each program as displayed in this report’s Table of Contents.

b. Other technologies include cross-cutting and advanced technologies; other unspecified technologies; and all energy efficiency and/or renewable energy technologies not specifically identified.
Appendix C. Expired Federal Energy Efficiency and Renewable Energy Incentive Programs

1. Assisted Housing Stability and Energy and Green Retrofit Investments Program (Recovery Act Funded)

| Administered by | Department of Housing and Urban Development (HUD) |
| Authority | American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5) |
| Annual Funding | (Project Grants) |
| $0 for FY2009 |
| $235 million for FY2010 |
| $0 for FY2011 |
| Scheduled Termination | 9/30/2012. All obligations were to be made by September 30, 2010. Receiving property owners were required to spend the funds on the specific improvements within two years of receipt. |
| Description | Program provided funding for energy and green retrofit investments to certain eligible assisted, affordable multifamily properties. Funding included incentives for participating property owners, a set-aside for administrative functions, and a set-aside for due diligence and underwriting support. Assistance was for specific retrofit purposes. |
| Qualified Applicant(s) | Residential |
| Qualified Technologies | Specific technologies not identified |

2. Clean Renewable Energy Bonds (CREBs)

| Administered by | Internal Revenue Service |
| Authority | 26 U.S.C. 54 (CREBs or “old CREBs”); 26 U.S.C. 54A and 26 U.S.C. 54C (New CREBs) |
| | Tax Relief and Health Care Act of 2006 (P.L. 109-432) |
| | Energy Improvement and Extension Act of 2008 (P.L. 110-343) |
| | American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5) |
| | Tax Cuts and Jobs Act of 2017 (P.L. 115-97) |
| Annual Funding | EPACT originally allocated $800 million of tax credit bonds to be issued between January 1, 2006, and December 31, 2007. Following the enactment of the federal Tax Relief and Health Care Act of 2006, the IRS made an additional $400 million in CREBs financing available for 2008 through Notice 2007-26. In November 2006, the IRS announced that the original $800 million allocation had been reserved for a total of 610 projects. The additional $400 million (plus surrendered volume from the previous allocation) was allocated to 312 projects in February 2008. Of the $1.2 billion total of tax-credit bond volume cap allocated to fund renewable-energy projects, state and local government borrowers were limited to $750 million of the volume cap, with the rest reserved for qualified municipal or cooperative electric companies. The Energy Improvement and Extension Act of 2008 (Div. A, Section107) allocated $800 million for New CREBs. In February 2009, the American Recovery and Reinvestment Act of 2009 (Div. B, Section 1111) allocated an additional $1.6 billion to expand the total New CREBs allocation to $2.4 billion. IRS Notice 2015-12 announced the availability of close to $1.4 billion in remaining volume cap for New CREBs. On March 5, 2015, the IRS opened the rolling volume-cap application window for governmental bodies and cooperative utilities, as well as a closed-end application period for public power providers. |
| Scheduled Termination | December 31, 2017 |
### 3. Energy Efficiency and Conservation Block Grants Program (EECBG)

<table>
<thead>
<tr>
<th>Administered by</th>
<th>EERE</th>
</tr>
</thead>
</table>
| Annual Funding  | $0 for FY2008  
$3.2 billion for FY2009 from ARRA  
$0 for FY2010-FY2012 |
| Scheduled Termination | This program was authorized through FY2012. An act of Congress is required to reauthorize this program. |
| Description     | This program was part of DOE's Weather and Intergovernmental Program. The EECBG Program provided formula and competitive grants to empower local communities to make strategic investments to meet the nation's long-term goals for energy independence and leadership on climate change. Grants could be used for energy efficiency and conservation programs and projects community-wide, as well as renewable energy installations on government buildings. |
| Qualified Applicant(s) | State, local, and tribal governments, including U.S. territories |
| Qualified Technologies | Energy efficient equipment and lighting; combined heating and cooling systems; combined heat and power systems; solar; wind; fuel cells; biomass |
| For More Information | See EERE's Energy Efficiency and Conservation Block Grants Program website; and program number 81.128 at beta.SAM.gov website. |

### 4. Energy Efficiency and Renewable Energy Technology Deployment, Demonstration, and Commercialization Grant Program

<table>
<thead>
<tr>
<th>Administered by</th>
<th>EERE</th>
</tr>
</thead>
</table>
Energy Independence and Security Act of 2007 (EISA; P.L. 110-140)  
American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5) |
| Annual Funding  | $0 for FY2008  
$21.8 million for FY2009  
$7.2 million for FY2010. All funds obligated under this program in FY2010 were Recovery Act funds.  
$1 million for FY2011  
$0 for FY2012-FY2018; all obligations under this program were made with Recovery Act (P.L. 111-5) funds. This program expired on 9/30/2015 and all awarded funds had to be expended by that date. |
| Scheduled Termination | None |
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

Description
This program provided financial assistance for the technology deployment, demonstration, and commercialization of energy efficiency and renewable energy technologies. This included biomass, building technologies, federal energy management, geothermal technologies, projects involving hydrogen, fuel cells and infrastructure technologies, industrial technologies, solar energy technologies, vehicle technologies, weatherization and intergovernmental technologies, and wind and hydropower technologies.

Qualified Applicant(s)
State governments; profit organizations

Qualified Technologies
Biomass; geothermal; hydrogen and fuel cell technologies; solar; hydropower

For More Information
See program number 81.129 at the beta.SAM.gov website.

5. Energy Efficient Appliance Rebate Program (EEARP)

Administered by EERE

Annual Funding $0 for FY2008
$298.5 million in FY2009 from ARRA
$0 for FY2010-FY2013

Scheduled Termination This program was authorized through FY2010. An act of Congress is required to reauthorize this program.

Description The program provided financial and technical assistance to states to establish residential Energy Star rated appliance rebate programs. The program's objectives were to reduce fossil fuel emissions created as a result of activities within the jurisdictions of eligible entities, and to improve energy efficiency in the residential sector.

Qualified Applicant(s) State governments, including U.S. territories and possessions

Qualified Technologies Energy efficient appliances

For More Information See program number 81.127 at the beta.SAM.gov website.

6. Energy Efficient Appliance Tax Credit for Manufacturers

Administered by Internal Revenue Service
Authority 26 U.S.C. §45M
Energy Improvement and Extension Act of 2008 (P.L. 110-343), Division B, Section 305
Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111-312)
American Taxpayer Relief Act of 2012 (ATRA; P.L. 112-240)

Scheduled Termination December 31, 2013

Description A tax credit for each manufacturer was limited to a total of $25 million for 2011, 2012, and 2013 combined.

Qualified Applicant(s) Industrial; appliance manufacturers

Qualified Technologies Clothes washers; dishwashers; refrigerators

For More Information See the IRS website for this credit; IRS form 8909.
### 7. Program of Competitive Grants for Worker Training and Placement in High Growth and Emerging Industry Sectors

**Administered by:** Employment Training Administration  
**Authority:** American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5), Title VIII  
**Annual Funding**

- Project Grants:
  - $0 for FY2008  
  - $750 million for FY2009 from ARRA which remained available through June 30, 2010  
  - $0 for FY2010-FY2015  

**Scheduled Termination:**

The program had no fixed termination date. It was established and funded by the Recovery Act, but the program has not been funded since 2009. It is no longer listed in the online federal Assistance Listings (formerly the Catalog of Federal Domestic Assistance) at the beta.SAM.gov website.

**Description:**

This program provided competitive grants for worker training and placement in high growth and emerging industry sectors.

**Qualified Applicant(s):** State, local, and tribal governments; colleges and universities; private nonprofit institutions/organizations

**For More Information**

See the U.S. Department of Labor’s (DOL’s) Training and Employment Notice for this program.

### 8. Qualified Energy Conservation Bonds

**Administered by:** Internal Revenue Service  
**Authority**

- 26 U.S.C. §54A  
- 26 U.S.C. §54D  
- 26 U.S.C. §6431  

- Energy Improvement and Extension Act of 2008 (P.L. 110-343)  
- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5)  
- Tax Cuts and Jobs Act of 2017 (P.L. 115-97)

**Scheduled Termination:** December 31, 2017

**Description:**

QECBs were used by state, local, and tribal governments to finance certain types of energy projects. QECBs, as tax credit bonds, provided federally subsidized financing to all issuers. The original limit on the volume of energy conservation tax credit bonds to be issued by state and local governments was $800 million. The American Recovery and Reinvestment Act of 2009 expanded the allowable bond volume to $3.2 billion. P.L. 115-97 permanently repealed several tax credit bonds, including QECBs.

**Qualified Applicant(s):** State, local, and tribal governments

**Qualified Technologies**

- Solar thermal electric; photovoltaics; landfill gas; wind; biomass; hydroelectric; geothermal electric; municipal solid waste; hydrokinetic power; anaerobic digestion; tidal energy; wave energy; ocean thermal

**For More Information**

### 9. Qualifying Advanced Energy Manufacturing Investment Tax Credit

**Administered by:** Internal Revenue Service  
**Authority**

- 26 U.S.C. §48C  

- American Recovery and Reinvestment Act of 2009 (ARRA; P.L. 111-5), Division B, Section 1302  

- IRS Notice 2013-12 Qualifying Advanced Energy Project Credit Phase II
Renewable Energy and Energy Efficiency Incentives: A Summary of Federal Programs

10. Renewable Energy Grants (1603 Program)

Administered by U.S. Department of the Treasury

Authority Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111-312), Section 707
American Recovery and Reinvestment Act of 2010 (ARRA; P.L. 111-5) Division B, Sections 1104 and 1603
U.S. Department of Treasury: Grant Program Guidance (amended)

Scheduled Termination Construction must have begun by December 31, 2011. Applications must have been submitted before October 1, 2012.

Description The purpose of the 1603 payment was to reimburse eligible applicants for a portion of the cost of installing specified energy property used in a trade or business or for the production of income.

Qualified Applicant(s) Commercial; Industrial; Agricultural

Qualified Technologies

Solar water heat; solar space heat; solar thermal electric; solar thermal process heat; photovoltaics; landfill gas; wind; biomass; hydroelectric; geothermal electric; fuel cells; geothermal heat pumps; municipal solid waste; CHP/cogeneration; solar hybrid lighting; hydrokinetic; anaerobic digestion; tidal energy; wave energy; ocean thermal; microturbines

11. Repowering Assistance Program (RAP)

Administered by Rural Development (USDA)

Authority Food, Conservation, and Energy Act of 2008 (P.L. 110-246), Title IX, Section 9004
Agricultural Act of 2014 (P.L. 113-79), Title IX, Section 9004
Agriculture Improvement Act of 2018 (P.L. 115-334)

Annual Funding

- Mandatory: Under the 2014 farm bill, mandatory funding of $12 million for FY2014 was authorized, to remain available until expended (i.e., no new baseline funding after FY2014). For FY2015, Congress reduced available funds by $8 million through the FY2015 agricultural appropriations act (P.L. 113-235). Under the agricultural appropriations act for FY2013 (P.L. 112-6), Congress directed that funds available for this program be reduced by $28 million. Under the 2008 farm bill (P.L. 111-79) mandatory funding of $35 million for FY2009, was authorized to remain available until expended.

- Discretionary: The 2014 farm bill authorized discretionary funding of $10 million annually to be appropriated for FY2014-FY2018, but no discretionary funding was appropriated through FY2018.
Discretionary funding of $15 million annually for FY2009-FY2013 was authorized to be appropriated under the 2008 farm bill and the American Taxpayer Relief Act of 2012 (ATRA; P.L. 112-240, §701) extension. Of this amount, $15 million was appropriated in FY2010 through FY2013.

Scheduled Termination
The program had no fixed termination date. It was authorized through FY2018, but then repealed by the 2018 farm bill.

Description
The Repowering Assistance Program (RAP) made payments to eligible biorefineries (those in existence on the June 18, 2008, enactment of the 2008 farm bill) to encourage the use of renewable biomass as a replacement for fossil fuels used to provide heat for processing or power in the operation of these eligible biorefineries. Not more than 5% of the funds were made available to eligible producers with a refining capacity exceeding 150 million gallons of advanced biofuel per year. RAP was repealed by the 2018 farm bill.

Qualified Applicant(s)
Eligible biorefineries in existence on or before June 18, 2008.

Qualified Technologies
Renewable biomass

For More Information
See the USDA program website; CRS In Focus IF10288, Overview of the 2018 Farm Bill Energy Title Programs, by Kelsi Bracmort; and CRS Report R43416, Energy Provisions in the 2014 Farm Bill (P.L. 113-79): Status and Funding, by Kelsi Bracmort.

**Source:** CRS.

**Notes:** Some programs are not specifically identified or codified in the U.S. Code.

1. The EECBG program was designed as a part of the Recovery Act (P.L. 111-5), with a one-time appropriation in FY2009. Due to the size of the appropriation, funds were let out over multiple fiscal years. DOE had an evaluation of the EECBG program. For more details, see DOE’s evaluation results website.
