The Temporary Assistance for Needy Families (TANF) Block Grant: Responses to Frequently Asked Questions

The Temporary Assistance for Needy Families (TANF) block grant funds a wide range of benefits and services for low-income families with children. TANF was created in the Personal Responsibility and Work Opportunity Act of 1996 (P.L. 104-193). This report responds to some frequently asked questions about TANF; it does not describe TANF rules (see, instead, CRS Report RL32748, *The Temporary Assistance for Needy Families (TANF) Block Grant: A Primer on TANF Financing and Federal Requirements*, by Gene Falk).

TANF Funding and Expenditures

TANF provides fixed funding for the 50 states, the District of Columbia, territories (Puerto Rico, Guam, and the U.S. Virgin Islands), and American Indian tribes. The basic block grant totals \$16.5 billion per year. States are also required to contribute, from their own funds, under a maintenance-of-effort (MOE) requirement. Both the basic block grant and the required MOE spending are based on expenditures in pre-TANF programs in the early- to mid-1990s.

The basic block grant and required spending under the MOE are not adjusted for changes in circumstances (e.g., inflation, population) over time. Adjusted for inflation, in FY2023, the TANF basic block grant was 47% below what its value was in FY1997. The MOE requirements have also not been adjusted for inflation.

Though TANF is best known for funding basic assistance payments for needy families with children, the block grant and MOE funds are used for a wide variety of benefits and activities. In FY2022, states used a total of \$31.3 billion in federal TANF and state MOE dollars. Of that FY2022 total, expenditures on basic assistance were \$7.2 billion—23.0% of total federal TANF and MOE dollars. Basic assistance is often—but not exclusively—paid as cash on a monthly basis. The remainder of TANF and MOE funds were spent on a wide range of benefits, services, and activities: child care, employment services (for both assistance recipients and others), state refundable tax credits for low-income families, pre-kindergarten and Head Start programs, and services for children who have been, or are at risk of being, abused and neglected.

The TANF Assistance Caseload

A total of 1.0 million families, composed of 2.8 million recipients, received TANF- or MOE-funded assistance in September 2023. The bulk of the recipients were children—1.9 million in that month.

Assistance Benefits

TANF assistance benefit amounts are set by states. In July 2022, the maximum monthly benefit for a family of two (single parent and one child) ranged from \$915 in New Hampshire to \$162 in Arkansas. Only New Hampshire (at 60% of the federal poverty level) had a maximum TANF assistance amount for this sized family in excess of 50% of the Department of Health and Human Services (HHS) poverty guidelines.

Work Requirements

TANF's main federal work requirement is a performance measure that applies to the states. States determine the work rules that apply to individual recipients. TANF law requires states to engage 50% of all families and 90% of two-parent families with work-eligible individuals in work activities, though these standards can be reduced by "credits." Therefore, the effective standards states face are often less than the 50% or 90% targets, and vary by state. In FY2022, states achieved, on average, an all-family participation rate of 35.6% and a two-parent rate of 44.0%.

In FY2022, all jurisdictions except Oregon met their all-family participation standard. California, Florida, Guam, Hawaii, Nevada, North Carolina, Oregon, Rhode Island, and Wyoming did not meet their two-parent participation standard. Jurisdictions that did not meet their standards are at risk of being penalized through a reduction in their block grants, though they may either enter into a corrective compliance plan or claim good cause to avoid the penalty.

Introduction

This report provides responses to frequently asked questions about the Temporary Assistance for Needy Families (TANF) block grant. It is intended to serve as a quick reference to provide easy access to information and data. **Appendix A** provides additional data on families receiving TANF assistance over time. **Appendix B** presents a series of tables with state-level data on TANF expenditures and families receiving assistance.

This report does not provide information on TANF program rules (for a discussion of TANF rules, see CRS Report RL32748, *The Temporary Assistance for Needy Families (TANF) Block Grant: A Primer on TANF Financing and Federal Requirements*, by Gene Falk).

Funding and Expenditures

What is TANF's funding status?

P.L. 118-42, the Consolidated Appropriations Act, 2024, extended TANF funding through the end of FY2024 (September 30, 2024).

How are state TANF programs funded?

TANF programs are funded through a combination of federal and state funds. TANF has two federal grants to states. The bulk of the TANF funding is in a basic block grant to the states, totaling \$16.5 billion for the 50 states, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, and American Indian tribes. There is also a contingency fund available that provides extra federal funds to states that meet certain conditions.

Additionally, states are required to expend a minimum amount of their own funds for TANF and TANF-related activities under what is known as the maintenance of effort (MOE) requirement. States are required to spend a minimum of at least 80% of what they spent in FY1994 on TANF's predecessor programs. The MOE spending requirement is reduced in states that met their work participation standards to 75% of what a state spent in FY1994.

How much has the value of the TANF basic block grant changed over time?

TANF was created by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA, P.L. 104-193). A TANF basic block grant amount—for both the nation and for each state—was established in the 1996 law. That amount for the 50 states, District of Columbia, territories, and tribes was \$16.6 billion in total. From FY1997 through FY2016, that amount remained the same. The basic block grant was not adjusted for changes that occur over time, such as inflation, the size of the TANF assistance caseload, or changes in the poverty population. During this period, the real (inflation-adjusted) value of the block grant declined by one-third (33.1%). Beginning with FY2017, the state family assistance grant was reduced by 0.33% from its historical levels to finance TANF-related research and technical assistance. The reduced block grant amount is \$16.5 billion.

_

¹ American Samoa and the Commonwealth of the Northern Mariana Islands do not operate TANF programs. The former is eligible but does not operate programs; the latter is ineligible for TANF funds.

Table 1 shows the state family assistance grant, in both nominal (actual) and constant 1997 (inflation-adjusted) dollars for each year, FY1997 through FY2023. In inflation-adjusted terms, the FY2023 block grant was 47% below its value in FY1997.

Table I.TANF Basic Block Grant Funding in Nominal and Constant Dollars (dollars in billions)

Fiscal Year	State Family Assistance Grant: 50 States, DC, Tribes, and Territories	State Family Assistance Grant Constant 1997 Dollars	Cumulative Percentage Change Since FY1997, Constant 1997 Dollars

Note: Constant dollars were computed using the Consumer Price Index for all Urban Consumers (CPI-U).

How have states used TANF funds?

In FY2022, states used a total of \$31.3 billion in combined federal TANF and state MOE dollars (this total includes dollars transferred to other block grant programs, but excludes expenditures in tribal TANF programs or those operated in the territories). Basic assistance—ongoing benefits to families to meet basic needs—represented 23.0% (\$7.2 billion) of total FY2022 TANF and MOE dollars.

Figure 1 categorizes TANF benefits and services and shows the national total spending for them. Spending on child care—both directly and through transfers to the Child Care and Development Fund (CCDF)—ranked second in spending among the categories, totaling \$4.9 billion in FY2022, 15% of all TANF and MOE dollars for that year. Pre-K and early childhood services ranked third at \$3.2 billion. This was followed, in order, by state refundable tax credits to families with children; work, education, and training; administrative expenditures; and emergency and short-term benefits. The "Other Services" shown in the figure represents a range of additional services (including programs promoting responsible fatherhood and healthy marriage and financial literacy).

There is variation among the states in how they use TANF and MOE dollars. For state-specific information on the use of TANF funds, see **Table B-1** and **Table B-2**.

National Totals =\$31.3B Basic Assistance Child Care Pre-K and Early Childhood Child Welfare Benefits and Services Refundable Tax Credits Work, Education, and Training Administrative Expenditures Emergency and Short-Term Benefits Other Services \$0 \$2 \$4 \$6 \$8 Billions of Dollars

Figure 1. Uses of TANF and MOE Funds by Spending Category, FY2022 (dollars in billions)

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS), Administration for Children and Families (ACF), Office of Family Assistance.

Notes: Excludes TANF funds used in the territories and in tribal TANF programs. Excludes spending from the Pandemic Emergency Assistance fund, which is reported separately.

How much of the TANF grant has gone unspent?

TANF law permits states to "reserve" unused funds without time limit. This permits flexibility in timing of the use of TANF funds, including the ability to "save" funds for unexpected occurrences that might increase costs (such as recessions or natural disasters).

At the end of FY2022 (September 30, 2022), a total of \$9.0 billion of federal TANF funding remained neither transferred nor spent. However, some of these unspent funds represent monies

that states had already committed to spend later. Of this amount, states had made such commitments to spend (i.e., had obligated) a total of approximately \$2.5 billion. At the end of FY2022, states had approximately \$6.5 billion of *unobligated balances*. These funds are available to states to make *new* spending commitments. **Table B-3** shows unspent TANF funds by state.

The Caseload

How many families receive TANF- or MOE-funded benefits and services?

This number is not known. Federal TANF reporting requirements focus on families receiving only ongoing assistance. There is no complete reporting on families receiving other TANF benefits and services.

Assistance is defined as benefits provided to families to meet ongoing, basic needs.² It is most often paid in cash. However, some states use TANF or MOE funds to provide an "earnings supplement" to working parents added to monthly Supplemental Nutrition Assistance Program (SNAP) allotments. These earnings supplements are paid separately from the regular TANF cash assistance program. Additionally, TANF MOE dollars are used to fund food assistance for immigrants barred from regular SNAP benefits in certain states. These forms of nutrition aid meet an ongoing need, and thus are considered TANF assistance.

As discussed in a previous section of this report, TANF basic assistance accounts for about 21% of all TANF expenditures. Therefore, the federal reporting requirements that pertain to families receiving assistance are likely to undercount the number of families receiving any TANF-funded benefit or service.

How many families and individuals currently receive TANF- or MOE-funded assistance?

Table 2 provides assistance caseload information. A total of approximately 1.0 million families, composed of 2.8 million individual recipients, received TANF- or MOE-funded assistance in September 2023. The bulk of the recipients were children—1.9 million in that month. For state-by-state assistance caseloads, see **Table B-4**.

Table 2. Families and Recipients of TANF- and MOE-Funded Assistance, September 2023

Category	Number
Total Families	986,792
Total Recipients	2,751,447
Total Adults	819,232
Total Children	1,932,215

_

² The definition of TANF assistance is not in statute. However, because the statutory language has most TANF requirements triggered by a family receiving *assistance*, the Department of Health and Human Services (HHS) regulations define *assistance* at 45 C.F.R. §260.31.

How does the current assistance caseload level compare with historical levels?

Figure 2 provides a long-term historical perspective on the number of families receiving assistance from TANF or its predecessor program, from July 1959 to September 2023. The shaded areas of the figure represent months when the national economy was in recession. Though the health of the national economy has affected the trend in the cash assistance caseload, the long-term trend in receipt of cash assistance does not follow a classic countercyclical pattern. Such a pattern would have the caseload rise during economic slumps, and then fall again during periods of economic growth. Factors other than the health of the economy (demographic trends, policy changes) also have influenced the caseload trend.

The figure shows two periods of sustained caseload increases: the period from the mid-1960s to the mid-1970s and a second period from 1988 to 1994. The number of families receiving assistance peaked in March 1994 at 5.1 million families. The assistance caseload fell rapidly in the late 1990s, after PRWORA, before leveling off in 2001. In 2004, the caseload began another decline, albeit at a slower pace than in the late 1990s. During the 2007-2009 recession and its aftermath, the caseload began to rise from 1.7 million families in August 2008, peaking in December 2010 at close to 2.0 million families, the number of families receiving assistance declined by almost half (to a little over 1 million families) during the long economic expansion of 2010 through 2019.

During 2020, a year when the economy was affected by the COVID-19 pandemic, there was a brief uptick in the number of families receiving assistance. That response to the pandemic was short-lived.³ After a brief uptick in the number of families receiving assistance in 2022, by the end of FY2023 (September 2023) the number of families receiving assistance had declined to 1.0 million.

Table B-5 shows recent trends in the number of cash assistance families by state.

-

Stimulus Measures, Urban Institute, July 2021.

³ In 2020 and 2021, Congress enacted expansions to other programs—in particular, unemployment insurance—that might have lessened the need for need-tested cash from TANF. See CRS Report R46687, *Unemployment Insurance (UI) Benefits: Permanent-Law Programs and the COVID-19 Pandemic Response.* For estimates of the impact of the poverty interventions in response to the economic downturn associated with the COVID-19 pandemic, see Laura Wheaton, Linda Giannarelli, and Ilham Dehry, 2021 Poverty Projections: Assessing the Impact of Benefits and

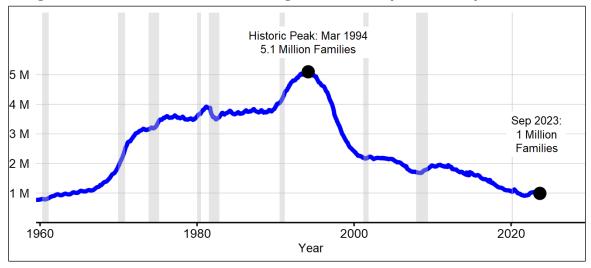

Figure 2. Number of Families Receiving Assistance, July 1959 to September 2023

Source: Congressional Research Service (CRS), with data from the U.S. Department of Health and Human Services (HHS).

Notes: Shaded areas indicate periods of economic recession. Since FY2000, data include families receiving assistance in separate state programs, funded with state dollars and accounted for separately but with spending counted toward the TANF maintenance of effort (MOE) requirement.

TANF Cash Benefits: How Much Does a Family Receive in TANF Cash Per Month?

There are *no* federal rules that help determine the amount of TANF cash benefits paid to a family. (There are also no federal rules that require states to use TANF to pay cash benefits, though all states do so.) Benefit amounts are determined solely by the states.

Most states base TANF cash benefit amounts on family size, paying larger cash benefits to larger families on the presumption that they have greater financial needs. The maximum monthly cash benefit is usually paid to a family that receives no other income (e.g., no earned or unearned income) and complies with program rules. Families with income other than TANF often are paid a reduced benefit. Moreover, some families are financially sanctioned for not meeting a program requirement (e.g., a work requirement), and are also paid a lower benefit.

Figure 3 displays the maximum monthly TANF cash benefit by state for a single parent caring for one child (family of two) in July 2022.⁴ For a family of two, the maximum TANF benefit paid in July 2022 varied from \$915 per month in New Hampshire to \$162 per month in Arkansas. The map shows a regional pattern to the maximum monthly benefit paid, with lower benefit amounts in general in the South compared to other regions. Only New Hampshire (at 60% of the federal poverty guidelines) had a maximum TANF cash assistance amount for this sized family in excess of 50% of the HHS poverty guidelines.

⁴ States are not required to report to the federal government their cash assistance benefit amounts in either the TANF state plan (under Section 402 of the Social Security Act) or in annual program reports (under Section 411 of the Social Security Act). The benefit amounts shown are from the Welfare Rules Database, maintained by the Urban Institute and funded by the Department of Health and Human Services (HHS). Some states vary their benefit amounts for other family types such as two-parent families or *child-only* cases. States also vary their benefits by other factors such as housing costs and substate geography.

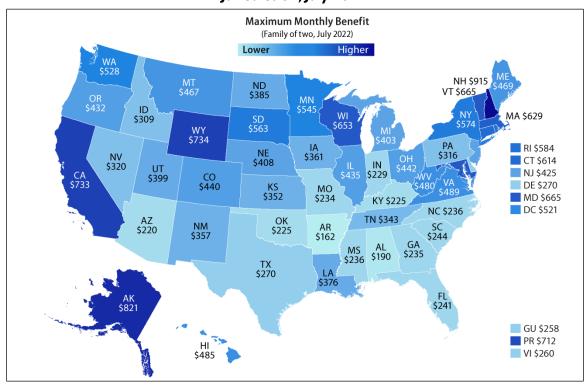

Figure 3. TANF Cash Assistance Benefits for a Single Mother with One Child, by Jurisdiction, July 2022

Source: Congressional Research Service (CRS), based on data from the Welfare Rules Database, funded by the Department of Health and Human Services (HHS) and maintained by the Urban Institute,

Table B-6 shows these benefit amounts by jurisdiction in dollars and as a percentage of the HHS poverty guidelines.

TANF Work Participation Standards

TANF's main federal work requirement is actually a performance measure that applies to the states, rather than individual recipients. States determine the work rules that apply to individual recipients.

What is the TANF work participation standard states must meet?

The TANF statute requires states to have 50% of their caseload meet standards of participation in work or activities—that is, a family member must be in specified activities for a minimum number of hours. There is a separate participation standard that applies to the two-parent portion of a state's caseload, requiring 90% of the state's two-parent caseload to meet participation standards.

⁵ Families without a work-eligible individual are excluded from the participation rate calculation. It excludes families where the parent is a nonrecipient (for example, disabled receiving Supplemental Security Income or an ineligible noncitizen) or the children in the family are being cared for by a nonparent relative (e.g., grandparent, aunt, uncle) who does not receive assistance on his or her behalf.

The statutory work participation standards are reduced by a "caseload reduction credit." The caseload reduction credit reduces the participation standard one percentage point for each percentage point decline in a state's caseload. Additionally, under a regulatory provision, a state may get "extra" credit for caseload reduction if it spends more than required under the TANF MOE. Therefore, the effective standards states face are often less than the 50% and 90% targets, and vary by state and by year.

States that do not meet the TANF work participation standard are at *risk* of being penalized through a reduction in their block grant. However, penalties can be forgiven if a state claims, and the Secretary of HHS finds, that it had "reasonable cause" for not meeting the standard. Penalties can also be forgiven for states that enter into "corrective compliance plans," and subsequently meet the work standard.

What work participation rates have the states achieved?

HHS computes two work participation rates for each state that are then compared with the effective (after-credit) standard to determine if it has met the TANF work standard. An "all-families" work participation rate is computed and compared with the all-families effective standard (50% minus the state's caseload reduction credit). HHS also computes a two-parent work participation rate that is compared with the two-parent effective standard (90% minus the state's caseload reduction credit).

Figure 4 shows the national average all-families work participation rate for FY2002 through FY2022. For the period FY2002 through FY2011, states achieved an average all-families work participation rate hovering around 30%. Subsequently, the work participation rate increased. In FY2016, it exceeded 50% for the first time since TANF was established. However, the increase in the work participation rate did not come from an increase in the number of recipients in regular TANF assistance programs who were either working or in job preparation activities. This increase stemmed mostly from states creating new "earnings supplement" programs that use TANF funds to aid working parents in the Supplemental Nutrition Assistance Program (SNAP, formerly food stamps) or who have left the regular TANF assistance programs for work.

The national average TANF work participation rate for all families declined from FY2018 through FY2021. In FY2021, a year affected by the COVID-19 pandemic and its economic fallout, the national average all-families rate was 33.6%. In 2022, the national average all-families rate had increased to 35.6% In FY2022, all jurisdictions except Oregon met their all-families standard.

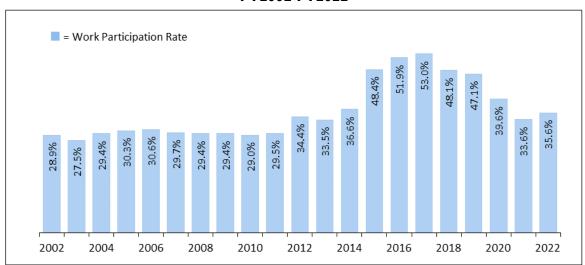

Figure 4. National Average TANF Work Participation Rate for All Families, FY2002-FY2022

Source: Congressional Research Service (CRS) based on data from the U.S. Department of Health and Human Services (HHS).

In FY2022, 9 jurisdictions (California, Florida, Guam, Hawaii, Nevada, North Carolina, Oregon, Rhode Island, and Wyoming) did not meet the separate, higher two-parent standard. **Table B-7** provides information for each jurisdiction on the TANF work standard, caseload reduction credit, and work participation rate for all families for FY2022. **Table B-8** provides that information for two-parent families. The table shows that 26 jurisdictions did not have two-parent families receiving assistance funded by TANF or MOE funds (denoted with an "NA" in the table).

The U.S. Department of Health and Human Services (HHS) has the ability to reduce or waive the penalty on states for failing to meet the TANF work participation standard. In response to the COVID-19 pandemic, HHS, under the Trump Administration, said that it would exercise its authority to provide states with relief from the penalty for not meeting participation standards "to the maximum extent possible." HHS has not revised this statement under the Biden Administration.

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS) and the U.S. Census Bureau.

Notes: NA denotes not available. During transition reporting from AFDC to TANF, caseload statistics on adult and child recipients were not collected. For those years, TANF children as a percentage of all children and

percentage of all poor children were estimated by HHS and published in Welfare Indicators and Risk Factors, Annual Report to Congress, Table TANF 2, p. A-7. See https://aspe.hhs.gov/sites/default/files/private/pdf/116161/FINAL%20Fourteenth%20Report%20-%20FINAL%209%2022%2015.pdf. For 2019, the ratio of TANF recipient children to all children in poverty might be overstated. This is because child poverty might have been underestimated, as responses to the survey used to estimate poverty were affected by the COVID-19 pandemic. See Jonathan Rothbaum and Adam Bee, Coronavirus Infects Surveys, Too: Nonresponse Bias During the Pandemic in the CPS ASEC, U.S. Census Bureau, SEHSD Working Paper no. 2020-10, September 15, 2020.

Source: Congressional Research Service (CRS), based on data from the U.S. Department of Health and Human Services (HHS).

Notes: TANF cash assistance caseload includes families receiving assistance in state-funded programs counted toward the TANF maintenance of effort (MOE) requirement. The years were selected for the table based on the following: 1994 reflects the number of families receiving assistance in the pre-TANF program of cash assistance (Aid to Families with Dependent Children) and the year the number of families receiving assistance reached its historic peak; 2019 reflects the last year before the COVID-19 pandemic; and 2022 is the year prior to the last year for which data are available (2023).

Table B-6.TANF Cash Assistance Maximum Monthly Benefit Amounts for a Single-Parent Family with One Child, By Jurisdiction, July 2022

Monthly Benefit as a Percentage of the HHS Poverty Guidelines for a Family of Two

Jurisdiction	Maximum Benefit Family Size of Two	Percentage of the HHS Poverty Guidelines for 2022
Alabama	\$190	12.5%
Alaska	821	43.0
Arizona	220	14.4
Arkansas	162	10.6
California	733	48.0
Colorado	440	28.8
Connecticut	614	40.2
Delaware	270	17.7
