TRENDS IN CONVENTIONAL ARMS TRANSFERS TO THE
THIRD WORLD BY MAJOR SUPPLIER, 1975-1982

INTRODUCTION

This report updates its predecessor -- "Trends In Conventional Arms Transfers To The Third World By Major Supplier, 1974-1981" -- published by the Congressional Research Service (CRS) on August 12, 1982. It provides unclassified background data on transfers of conventional arms to the Third World by major suppliers for the period from 1975-1982.

The Third World category includes all countries except NATO nations, Warsaw Pact nations, Europe, Japan, Australia and New Zealand. U.S. data are for fiscal years 1975-1982 covering the period from July 1, 1974, through September 30, 1982. All foreign data are for the calendar year given. U.S. commercial sales and deliveries data are excluded. However, all Foreign Military Sales (FMS) construction sales and deliveries are included in the U.S. values totals. The reader is directed to the footnotes of the tables for other details regarding data used in this report.

The data in this report are set out in a series of tables illustrating dollar values of sales agreements and deliveries as well as actual numbers of weapons delivered to Third World countries. Table 1 shows the dollar values of arms transfer agreements with the Third World by supplier from 1975-1982. Table 2 shows the dollar values of arms transfer deliveries to the Third World for the same years. Tables 1A and 1B show the averages of agreement values for suppliers for 1975-1978 and 1979-1982 respectively. Tables 2A and 2B show the averaged data for delivery values by suppliers for the respective periods of 1975-1978 and 1979-1982.

Tables 3 through 7 provide delivery data of major suppliers to the Third World and to specific regions from 1975-1978, 1979-1982 and 1975-1982. These tables give detailed totals of specific weapons categories actually delivered to either the Third World as a whole or to a specific region of it by the United States, the USSR, or the four major Western European suppliers as a group. Regions are identified at the end of the tables as are descriptions of items included in the twelve specific weapons categories. None of the data included in the weapons deliveries tables includes items delivered to any country not defined as a Third World nation.

SELECTED SUMMARY OF DATA TRENDS, 1975-1982

TABLE 1 - THIRD WORLD ARMS TRANSFER AGREEMENTS VALUES

Table 1 shows the annual current dollar values of arms transfer agreements (sales contracts) with Third World nations by major suppliers from 1975-1982. Some of the notable facts reflected by these data are summarized below.

o From 1975-1982 the United States led in total value of arms transfer agreements with the Third World at \$75.58 billion. The Soviet Union ranked second with \$65.23 billion. The French ranked third with \$30.75 billion. As a group, the four major West European suppliers made \$59.97 billion in agreements during this period.

o In 1982 the United States reached a record high in arms transfer agreements with the Third World at \$15.3 billion. The Soviets ranked second with \$10.2 billion, while the French ranked third at nearly \$7.7 billion. The four major West European suppliers, as a group, made nearly \$11 billion in agreements during this year.

TABLES 1A AND 1B - THIRD WORLD ARMS TRANSFER AGREEMENTS VALUES AVERAGES

Tables 1A and 1B show the average of arms agreement values of suppliers for 1975-1978 and 1979-1982 respectively in order to smooth out high and low points in the data for these two periods. Among the facts reflected in these tables are the following:

- o In the earlier period, 1975-1978, (Table 1A) the United States averaged about \$2.93 billion more in arms transfer agreements with the Third World than did the Soviet Union.
- o From 1975-1978, the four major West European suppliers, as a group, averaged about \$5.62 billion in agreements, slightly less than the Soviet Union's average of \$5.81 billion.
- o In the recent period, 1979-1982, (Table 1B) the Soviet Union averaged about \$840.5 million more in agreements than did the United States.
- o From 1979-1982, the four major West European suppliers, as a group, averaged \$9.37 billion in agreements, only about \$288 million less than the United States sales agreement average for these years. The French alone averaged \$5.51 billion in agreements during these years, reflecting a notable growth in their share of the Third World arms market from the earlier four year period.
- o The data on Third World arms transfer agreements in Tables 1, 1A, and 1B show that the French are the major conventional arms seller after the United States and the Soviet Union. At the same time, as a group, the four major West European suppliers have played an important role in the conventional arms marketplace throughout the years 1975-1982. Further, in the more recent period (1979-1982) it seems apparent that their share of the Third World arms market is increasing.

TABLE 2 - THIRD WORLD ARMS DELIVERIES VALUES

Table 2 shows the annual current dollar values of arms transfer deliveries (items actually transferred) to Third World nations by major suppliers from 1975-1982. Some of the notable facts reflected by these data are summarized below.

o From 1975-1982 the Soviet Union led in total value of arms deliveries to the Third World at \$50.1 billion. The United States ranked second with \$45.75 billion. The French ranked third at \$14.57 billion. As a group, the four major West European suppliers made arms deliveries during this period valued at about \$33.6 billion.

o In 1982 the value of U.S. arms deliveries to the Third World was the highest of any year in 1975-1982 period at \$7.6 billion. The Soviet Union ranked second in deliveries values at \$7.25 billion, the French were third at \$2.4 billion. The four major West European suppliers, as a group, made about \$4.94 billion in deliveries during this year.

TABLES 2A AND 2B - THIRD WORLD ARMS DELIVERIES VALUES AVERAGES

Tables 2A and 2B show the averages of arms delivery values of suppliers for 1975-1978 and 1979-1982 respectively. Among the facts reflected in these tables are the following:

o In the earlier period, 1975-1978, (Table 2A) the United States averaged about \$752 million more in the value of arms deliveries to the Third World than did the Soviet Union.

o From 1975-1978, the four major West European suppliers, as a group, averaged about \$2.67 billion in the value of arms deliveries -- about 62 percent of the average value of the Soviet's arms deliveries during this period (\$4.33 billion).

o In the recent period, 1979-1982, (Table 2B) the Soviet Union averaged about \$1.84 billion more in the value of arms deliveries to the Third World than did the United States.

o From 1979-1982, the four major West European suppliers, as a group, averaged about \$5.61 billion in the value of arms deliveries -- over 88 percent of the average value of United States arms deliveries during this period (\$6.36 billion).

o The data on Third World arms deliveries in Tables 2, 2A and 2B show that the average value of Soviet deliveries increased 91 percent from the earlier period (1975-1978) to the most recent period (1979-1982). In the case of the four major West European suppliers, their average delivery values, as a group, have increased over 110 percent from the earlier period to the most recent one. The United States, meanwhile, has increased its average delivery values by only 27 percent from the 1975-1978 period to the 1979-1982 period.

The basic utility of the dollar values of arms transfer agreements and deliveries data is in indicating long-range trends in sales activity by major arms suppliers. These dollar values reflect what is or has been in the delivery "pipeline." To use these data for purposes other than assessing general trends in seller/buyer activity in the Third World is to risk drawing hasty conclusions that may be rapidly invalidated by events.

More useful data for assessing arms transfers to the Third World by suppliers are those that indicate who has actually delivered numbers of specific classes of military items to a region. These data are relatively hard in that they reflect events that have occurred. They have the limitation of not giving detailed information regarding the sophistication level of the equipment delivered. However, these data will show relative trends in the delivery of various classes of military equipment and will also indicate who the leading suppliers are from region to region over time. This trend line data can thereby indicate who is developing a market for a category of weapon in a region, and perhaps suggest whether or not an arms race is emerging. For these reasons, the following tables set out actual deliveries of 12 separate categories of weaponry to the Third World from 1975-1982 by the United States, the Soviet Union, and the four major West European suppliers as a group.

Table 3 - Weapons Delivered to the Third World

o The data in Table 3 show that from 1975-1982 the Soviet Union led in 5 of the 12 categories of weapons delivered to the Third World as a whole, while the major West European suppliers led in 4 and the United States in 3. In the most recent four year period (1979-1982) the Soviet Union led in seven categories, the major West Europeans in four, and the United States in one.

o Table 3 illustrates that from 1975-1982 the Soviets led in deliveries of tanks and self-propelled guns, artillery, supersonic combat aircraft, surface-to-air missiles, and guided missile boats. In the 1975-1982 period the major West European suppliers led in deliveries of both major and minor

surface combatants, submarines, and helicopters. The United States from 1975-1982 led in deliveries of APCs and armored cars, subsonic combat aircraft, and other aircraft.

o Table 3 shows that in the most recent period (1979-1982) the Soviets led in deliveries of tanks and self-propelled guns, artillery, supersonic and subsonic combat aircraft, helicopters, guided missile boats and surface-to-air missiles. The major West European suppliers led in deliveries of major and minor surface combatants as well as submarines in this same period. They also led in deliveries of other aircraft. The United States from 1979-1982 led only in the delivery of APCs and armored cars.

Breaking the Third World delivery data into major regions gives an indication of which supplier or suppliers are dominating in deliveries in specific classes of equipment and in general. The regions examined are East Asia and the Pacific, Near East and South Asia, Latin America, and Sub-Saharan Africa.

Table 4 - Weapons delivered to East Asia and the Pacific

o The data in Table 4 show that from 1975-1982 the United States dominated the delivery of major weapons to East Asia and the Pacific, leading in 9 of the 12 categories. The Soviets led in only 2 categories, while the major West Europeans led in one. In the most recent period (1979-1982) the delivery picture became much more competitive. The Soviet Union led in six categories to five for the United States and one for the major West Europeans.

o Table 4 illustrates that from 1975-1982 the United States led in the delivery of artillery, APCs and armored cars, major and minor surface combatants, supersonic and subsonic aircraft, other aircraft, helicopters, and surface-to-air missiles. The Soviet Union led in deliveries of tanks and self-propelled guns, and guided missile boats. The major West European suppliers led in deliveries of submarines.

o Table 4 shows that in the most recent period (1979-1982) the Soviet Union led in deliveries of tanks and self-propelled guns, minor surface combatants, supersonic combat aircraft, other aircraft, helicopters and guided missile boats. The United States led in deliveries of artillery, APCs and armored cars, major surface combatants, subsonic combat aircraft, and surface-to-air missiles. The major West European suppliers led in the delivery of submarines.

Table 5 - Weapons Delivered to Near East and South Asia

o The data in Table 5 show that from 1975-1982 the Soviet Union dominated the delivery of major weapons to the Near East and South Asian region, leading in 8 of the 12 categories. The United States and the major West European suppliers led in 2 categories each. In the most recent period (1979-1982) the Soviet Union led in nine categories, and tied with the major West Europeans in another. The major West Europeans led in two categories, while the United States led in none.

o Table 5 illustrates that from 1975-1982 the Soviet Union led in the delivery of tanks and self-propelled guns, artillery, major surface combatants, submarines, supersonic and subsonic combat aircraft, guided missile boats, and surface-to-air missiles. The United States led in the delivery of APCs and armored cars, and other aircraft. The major West European suppliers led in deliveries of minor surface combatants and helicopters.

o Table 5 shows that in the most recent period (1979-1982) the Soviet Union led in deliveries of tanks and self-propelled guns, artillery, APCs and armored cars, major surface combatants, supersonic and subsonic combat aircraft, other aircraft, helicopters, and surface-to-air missiles. The Soviets tied with the major West Europeans in deliveries of submarines. The major West European suppliers led in deliveries of minor surface combatants and guided missile boats. The United States did not lead in any category.

Table 6 - Weapons Delivered to Latin America

o The data in Table 6 show that from 1975-1982 the major West European suppliers led in five categories of weapons delivered to Latin America. The Soviet Union led in four categories and the United States in three. In the most recent period (1979-1982) the major West European suppliers led in six categories and tied with the Soviet Union in one other. The Soviet Union led in four categories, while the United States led in one.

o Table 6 illustrates that from 1975-1982 the major West European suppliers led in the delivery of APCs and armored cars, major and minor surface combatants, submarines, and helicopters. The Soviet Union led in the delivery of tanks and self-propelled guns, supersonic combat aircraft, and other aircraft.

o Table 6 shows that in the most recent period (1979-1982) the major West European suppliers led in deliveries of major and minor surface combatants, subsonic combat aircraft, other aircraft, helicopters, surface-to-air missiles and tied with the Soviet Union in the deliveries of submarines. The Soviet Union led in deliveries of tanks and self-propelled guns, APCs and armored cars, supersonic combat aircraft and guided missile boats. The United States led in the delivery of artillery.

Table 7 - Weapons Delivered to Africa (Sub-Saharan)

o The data in Table 7 show that from 1975-1982 the Soviet Union led in seven categories of weapons delivered to Sub-Saharan Africa. The major West European suppliers led in four categories. The United States led in none. In the most recent period (1979-1982) the Soviet Union led in six categories, while the major West European suppliers led in five. The United States led in none.

o Table 7 illustrates that from 1975-1982 the Soviet Union led in the delivery of tanks and self-propelled guns, artillery, APCs and armored cars, supersonic and subsonic combat aircraft, guided missile boats and surface-to-air missiles. The major West European suppliers led in the delivery of major and minor surface combatants, other aircraft, and helicopters. The United States led in no delivery category.

o Table 7 shows that in the most recent period (1979-1982) the Soviet Union led in the delivery of tanks and self-propelled guns, artillery, supersonic and subsonic combat aircraft, guided missile boats, and surface-to-air missiles. The major West European suppliers led in deliveries of APCs and armored cars, major and minor surface combatants, other aircraft, and helicopters. The United States led in no delivery category.

Regional Summary 1979-1982

o The regional weapons delivery data collectively show that the Soviet Union was the leading arms supplier to the Third World of several major classes of conventional weaponry from 1979-1982. The United States also transferred substantial quantities of many of the same weapons classes, but did not match the Soviets in sheer numbers delivered during this period. The major West European suppliers were serious competitors of the two superpowers in weapons deliveries from 1979-1982, making notable deliveries of certain categories of armaments in every region of the Third World, but most particularly in Latin America.

In spite of these various trends a note of caution is warranted.

Aggregate data on weapons categories delivered by suppliers do not provide indices of the quality or level of sophistication of the weaponry actually provided. As the history of recent conventional conflicts suggests, quality and/or sophistication of weapons can offset a quantitative disadvantage. The fact that the United States, for example, may not "lead" in quantities of weapons delivered to a region does not necessarily mean that the weaponry it

has transferred cannot compensate, to an important degree, for larger quantities of less capable weapons systems delivered by the Soviet Union or others.

Further, these data do not provide any indication of the capabilities of the recipient nations to use effectively the weapons actually delivered to them. Superior training -- coupled with quality equipment -- may, in the last analysis, be a more important factor in a nation's ability to engage successfully in conventional warfare than the size of its weapons inventory.

^{1/} U.S. data are for fiscal year given (and cover the period from July 1, 1974 through September 30, 1982). U.S. agreement figures reflect those sales consummated during the fiscal year indicated. Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance and training programs. U.S. commercial sales contract values are excluded, as are values of the Military Assistance Service Funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF for FY1975 was \$544,000,000. Related grant transfers to South Korea and Thailand, also excluded, were \$11,000,000 in FY1979; \$132,000,000 in FY1980; \$100,000,000 for FY1981, and \$130,000,000 in FY1982. The value of Iranian contracts cancelled but not included in the U.S. data above are as follows: FY1975 (\$1,157,000,000); FY1976 and transitional quarter(\$236, 000,000; FY1977(\$2,953,000,000); FY1978 (\$1,673,000,000); FY1979 (\$6,000,000); FY1980 (\$0); FY1981 (\$0); FY1982 (\$0). Third World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, New Zealand.

^{2/} U.S. data for FY1976 includes the transitional quarter (FY 197T).

* Based on Department of Defense Price Deflator (minus pension funds).

1/ U.S. data are for fiscal year given (and cover the period from July 1, 1974 through September 30, 1982). Foreign data are for the calendar year given. Statistics shown for foreign countries are based upon estimated selling prices. All prices given include the values of weapons, spare parts, construction, all associated services, military assistance and training programs. U.S. commercial sales contract values are excluded, as are values of the Military Assistance Service Funded account (MASF) which provided grant funding for South Vietnam, Laos, Philippines, Thailand, and South Korea. MASF deliveries values for FY1975 were \$1,125,000,000. Related grant transfers to South Korea and Thailand, also excluded, were \$11,000,000 in FY1979; \$10,000,000 in FY1980; \$100,000,000 in FY1981; and \$130,000,000 in FY1982. Third World category excludes Warsaw Pact nations, NATO nations, Europe, Japan, Australia, New Zealand.

2/ United States data for FY1976 include the transitional quarter (FY 197T).

DESCRIPTION OF ITEMS COUNTED IN WEAPONS CATEGORIES, 1975-1982

Tanks and Self-propelled Guns

Light, medium and heavy tanks
Self-propelled artillery
Self-propelled assault guns

Artillery

Field and air defense artillery, mortars, rocket launchers, and recoilless rifles -- 100 mm. and over
FROG launchers -- 100 mm. and over

Armored Personnel Carrier (APCs) and Armored Cars

Personnel carriers, armored and amphibious
Armored infantry fighting vehicles
Armored reconnaissance and command vehicles

Major Surface Combatants

Aircraft carriers, cruisers, destroyers, frigates

Minor Surface Combatants

Minesweepers, subchasers, motor torpedo boats
Patrol craft, motor gunboats

Submarines

All submarines, including midget submarines

Guided Missile Patrol Boats

All boats in this class

Supersonic Combat Aircraft

All fighters and bombers designed to function operationally at speeds above Mach 1.

Subsonic Combat Aircraft

All fighters and bombers, including propeller driven, designed to function operationally at speeds below Mach 1.

Other Aircraft

All other fixed-wing aircraft, including trainers, transports, reconnaissance aircraft, and communications/utility aircraft

Helicopters

All helicopters, including combat and transport.

Surface-to-air Missiles (SAMs)

All air defense missiles.
