

# Tunnels Since 1990

## What We Know

- Used to traffic drugs, weapons, people, money
- Sophisticated / Unsophisticated
  - Reinforced w/timber and concrete
  - Communications
  - Ventilation and Lights
  - Earthen / Hand Dug

## What We Think

- Likely number of undetected tunnels
- Allows traffickers a low risk, high payoff option
- Could serve as primary POE for all Transnational threats
- Traffickers using private property and extensive information network to execute on both sides of border

## Challenges

- IA unity of effort
- Focusing intelligence + detection efforts
- Technology

## Tasks

- Fuse and analyze LE and DoD reporting
- Support IA synchronization
- Suggest NAIs
- Recommend resource allocation
- Employ DoD detection technology
