A. Executive Summary

In November 2008, President-Elect Obama stated, as part of his Bipartisanship and Openness Initiative's Agenda for Change, that he "will institute a National Declassification Center (NDC) to make declassification secure but routine, efficient, and cost-effective."

In conjunction with agencies holding national security information and declassification authority, the National Archives and Records Administration (NARA) is prepared to take the lead in establishing an NDC that will ensure that declassification is secure, but routine, efficient and cost effective. The NDC will ensure that all sensitive materials will remain protected while enabling more information to be accessible to the American people by:

 Consolidating classified records and agency declassification personnel, thereby enabling initial reviews and subsequent referrals to occur in one centralized location;

• Establishing joint declassification review of Federal and Presidential records at one facility;

 Providing secure storage and related services for records containing classified national security information;

 • Providing opportunities for collaboration and better understanding of equities among agencies;

 Developing improved and more uniform guidance, training, and quality assurance procedures;

 Upgrading existing systems, and exploring new technologies to document and streamline the declassification process;

 Laying the organizational groundwork to address the emerging challenges of electronic and special media records; and
Improving oversight of and establishing priorities for declassification activities.

NARA is prepared to expand the existing National Declassification Initiative (NDI) and begin a pilot business process reengineering project to create the NDC at the NARA facility located at College Park, MD. However, the facility can not accommodate the necessary expansions in storage and work areas which would be required in order to achieve the NDC goals. A new facility dedicated to safeguarding, storing, declassifying, and processing classified records should be constructed to meet the needs of the NDC. This facility should include storage for classified temporary, pre-archival, and archival records, space for declassification review and processing, staff and resources to perform archival work on the records, and the Information Technology (IT) infrastructure necessary to support these functions.

Success of this interagency program is dependant on all participants sharing resources, providing staff to complete declassification review, supporting interagency training programs, developing shared knowledge to improve equity recognition, and establish

85 pro

cooperative processes to improve declassification. To achieve this goal NARA created a

high level Concept of Operations (CONOPS) white paper that includes general

requirements for the facility, descriptions of participant responsibilities, a summary of functions to be performed at the NDC, a discussion of the IT infrastructure, and a plan for converting the NDI into an NDC. This CONOPS is a blueprint for building the President's vision of an NDC.

B. Overview

The American public expects national security information to be protected, but they also expect their historical records to be made available over time. Since October 1995, Executive Order 12958 – Classified National Security Information, as amended (EO 12958), has provided a Government-wide authority and policy framework for securing classified information and carrying out declassification. While agencies have had success adjudicating their equities in their own records to meet the declassification deadlines in the EO, review of referrals and historical records at NARA has been inadequate, especially for records that have equities from multiple agencies.

Based on estimates NARA collected from agencies with classified holdings, there are over 1.2 billion pages of permanently valuable classified Federal textual records and nearly 40 million pages of Presidential papers, materials, and records² that require declassification review over the next 25 years; 51 million pages of referrals generated by agencies reviewing their holdings under the EO that require review by the 31 December 2009 referral deadline; and a backlog of approximately 400 million pages of historically valuable Federal records at NARA that require further declassification action. In addition, ISOO's "Report to the President 2008" shows the volume of records being classified records increases annually. In 2008 agencies classified 23.4 million pages under original and derivative classification authorities (an increase of 1% from FY 2007), while the volume of records being reviewed has declined each year since 2006. In 2008 agencies reviewed 51.4 million pages (a 14% decrease from 2007).³ Over the next 25 years Federal agencies are facing a massive volume (1.7 billion pages) of classified textual records that, based on 2008 review statistics, will take over 33 years to complete initial review, and many more to complete referral reviews and process all the records for public access. These figures will continue grow each year as more records become 25 years old and require review before the automatic declassification deadline.

In addition to textual holdings, electronic government processes and systems are creating a growing volume of classified records in electronic and other special media formats which also require declassification action. While reviewers are faced with growing volumes of electronic records, they also face problems with obsolete special media and electronic formats, and deteriorating media in textual and special media formats. All these problems must be resolved quickly to meet the December 31, 2011, automatic

¹ The figure of 1.2 billion pages is taken from an unpublished NARA survey of agencies' classified holdings subject to declassification review over the next 25 years.

² The Office of Presidential Libraries estimates the total volume of classified Presidential holdings from the Herbert Hoover through George W. Bush administrations at 40 million pages.

³ 2008 Annual Report of the Information Security Oversight Office to the President. By William J. Bosanko, Director. Washington, DC.: Government Printing Office, 2008

declassification deadline (and subsequent annual deadlines) for special media holdings in EO 12958. These problems will continue to intensify as the volume and complexity of records increases, and the current problems are not resolved.

In the absence of additional money and resources, agencies must work together to improve the declassification process in order to fully comply with the provisions and declassification deadlines in the EO. Without reform in policy and process, agencies will continue to spend millions of dollars each year⁴ perpetuating an ineffective and inefficient declassification system, while the backlog of records waiting to be processed for the open shelves continues to grow. Agencies should be committed to declassify and release records to the public when appropriate, while ensuring classified agency equities are accurately identified and all justifiably classified information is protected.

Recognizing problems exist in the declassification process, NARA worked to establish the Remote Archives Capture (RAC) program and the (voluntary) NDI to develop a more cooperative declassification and referral process. Beginning in 1996, the Presidential Libraries and the Central Intelligence Agency (CIA) implemented the RAC program to facilitate declassification review and referral of classified Presidential papers in remote locations. This program digitally scans remotely located Presidential classified records and makes all twenty-five year old classified materials available electronically for declassification review in a centralized location in the Washington, DC area. In 2006 at Archives II, NARA incorporated an existing interagency referral center, with a new Quality Assurance (QA) program, and the development of annual processing and declassification work plans to establish the NDI. Through examination of these processes, NARA has identified problems that still exist in the declassification process:

There is a massive volume of classified historical records at NARA that are 25 years and older which the public can not yet access. Most of these pages have been reviewed by the creating agencies, but cannot be moved to the open shelf because:

Other agencies need to review these records for their equities (referrals).
Quality issues have been identified; including missed sensitive

information and referred non-sensitive information.
 The Federal Government is paying to protect records that, at 25 or more years after creation and original classification, no longer contain sensitive national security information.

• There is a lack of coordination among agencies on policies and processes.

 • Agencies provide insufficient equity recognition training to other agency reviewers, leading to misidentification of equities during the review process.

⁴ 2007 Annual Report of the Information Security Oversight Office to the President. By William J. Bosanko, Director. Washington, DC.: Government Printing Office, 2007. The 2007 ISOO report shows agencies spent \$4.6 billion on Information security. Of that total, \$44 million was spent on declassification.

 Ad hoc declassification decisions are being made without consulting approved declassification guides, leading to incorrect decisions and inconsistencies in the way information is referred, exempted or declassified.

- There is a lack of standardized declassification guidance leading to inconsistent and conflicting declassification decisions within agencies and across the government.
- There is no common, interagency system for tracking review progress and recording declassification decisions.

Through these two programs processing improvements were made, and some success realized, however, execution of the overall declassification process in accordance with EO 12958 has been limited. It has become clear that voluntary participation in the NDI and RAC programs is insufficient, and improvements to existing declassification processes are needed. One concept that has been studied and discussed for over 10 years, both inside government and by independent commissions and boards, is an NDC.

The NDC concept has long-standing and broad bipartisan support. In March 1997, the Commission on Protecting and Reducing Government Secrecy (Moynihan Commission), recommended "the creation by statute of a central office—a National Declassification Center—at an existing Federal agency such as the National Archives and Records Administration to coordinate national declassification policy and activities." In his October 2007 "A New Beginning' speech at DePaul University, then-Senator Obama stated "I'll turn the page on a growing empire of classified information, and restore the balance we've lost between the necessarily secret and the necessity of openness in a democratic society by creating a new National Declassification Center. "In December 2007, the Public Interest Declassification Board (PIDB) issued a report to the President in which they recommended the establishment of "a new National Declassification Center (NDC)...within the National Archives and Records Administration." In November 2008, President-Elect Obama stated, as part of his Bipartisanship and Openness Initiative's Agenda for Change, that he "will institute a National Declassification Center to make declassification secure but routine, efficient, and cost-effective."

In collaboration with agencies holding national security equities and declassification authority, NARA is prepared to take the lead in establishing an NDC. An interagency NDC will establish a cost effective, government-wide system to meet the declassification goals of EO 12958, while protecting sensitive national security information. The NDC will meet these goals by:

- Consolidating classified records and agency declassification personnel, and enabling initial reviews and subsequent referrals to occur in one centralized location;
- Establishing joint declassification review of Federal and Presidential records at one facility;

- Providing secure storage and related services for records containing classified national security information;
- Providing a centralized location for communication, collaboration and documentation of equity referrals and review decisions;

- Establishing a system that will allow the sharing of declassification procedures and general guidance between all agencies, and facilitating the development of improved and more uniform declassification guidelines, training, and quality assurance procedures;
- Upgrading existing systems, and exploring new technologies to document and streamline the declassification process;
- Addressing the existing challenges of special media and electronic records:
- Improving the management, prioritization and oversight of agency declassification activities and decisions; and
- Implementing unified strategies to ensure that the records will be preserved for as long as they are needed. TOWN.

The NDC will, for the first time, facilitate the review of both Federal and Presidential records in one location. Transfer, storage, preservation and declassification review for Federal and Presidential of records will be handled using a lifecycle approach that is consistent with the appropriate laws and regulations governing that type of record. Permanent Federal records are retired, and may require a long period of inactive storage before they are accessioned to NARA in accordance with approved records schedules. Federal records are most often accessioned close to the automatic declassification deadline. Presidential records are transferred to the legal custody of the Archivist every four or eight years, a much earlier point in their lifecycle and many years before the automatic declassification deadline. Presidential records are transferred to the President's Library where the staff begins initial processing, responding to special access requests and, at the five year point, responding to Freedom of Information Act (FOIA) requests. When these records reach the twenty-five year point and are ready for automatic declassification, the NDC will work with the RAC program facilitate declassification review through RAC review stations at the NDC.

Based on the volume of classified records, the need to standardize disparate declassification processes and guidelines, the lack of suitable secure space for agency reviewers and NARA Staff, and to need to replace the aging, substandard classified storage at the NARA records center located at Suitland, a new secure facility is needed to consolidate declassification programs and classified records in one location. While NARA can provide additional support and resources to begin expanding the NDI into an NDC (see Appendix C), the NARA facility at College Park can not accommodate necessary expansions in security, storage vaults, and work areas required by an NDC. As

a result, a new facility dedicated to declassification should be constructed. This facility will meet the needs of NARA and all agencies that created classified records by including storage for temporary and pre-archival agency records, storage for classified permanent records accessioned by NARA, space for declassification review and processing, staff and resources to perform archival and preservation work on the records, and provide the security and IT infrastructure necessary to support these functions.

While NARA is prepared to take a leading role in the creation of an NDC, the success of this interagency program is dependant on all participants sharing resources. Participating agencies will need to provide staff to complete declassification review, support interagency training programs, and develop shared knowledge processes to improve equity recognition. To establish a general NDC framework, NARA developed a high level CONOPS to outline general requirements for the facility, descriptions of participant responsibilities, a summary of functions to be performed at the NDC, and a discussion of the IT infrastructure.

C. Facility

Once constructed, the NDC will securely store 1.2 million cubic feet of classified temporary, pre-archival and archival Federal records, enable equity holding agencies to access millions of 25 year-old classified Presidential records, and provide a centralized and secure location to perform all functions associated with records storage, declassification, archival processing, accessioning, reference and preservation. To support the work of agency declassification reviewers and NARA staff, the building will include:

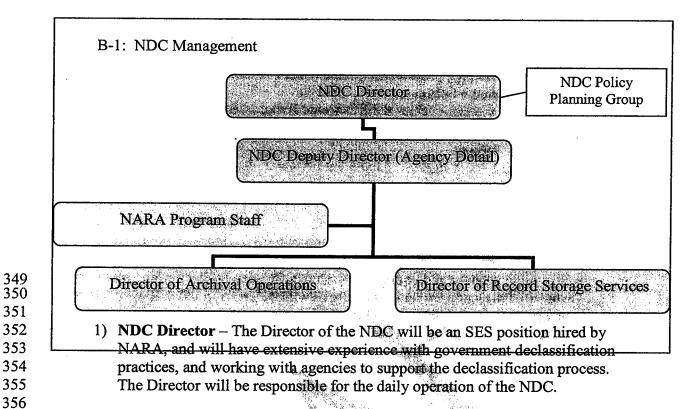

Security

- The facility will be certified at the TS/SCI level, and include work and storage space to appropriately protect all classified holdings. It will meet all security requirements established in Director of Central Intelligence Directive Category 6 - Security (DCID 6), DOD National Industrial Security Program Operating Manual (NISPOM) and NARA Information Security 202 standards.
- The facility will house approximately 240 people and have minimal public interaction.
- The facility will be protected 24/7, consistent with all applicable security requirements including, but not limited to military, intelligence community (IC) and NARA.

Physical Storage

- Will be provided for agencies' classified temporary and pre-archival records, and archival storage for classified accessioned records.
- Will meet all standards established by NARA for records storage and archival facilities.
- Will meet all physical security standards for a TS/SCI facility.

303	 Will be coordinated with agencies and NARA units responsible for appraisal,
304	accessioning, reference, declassification, processing, and preservation and
305	include:
306	o Storage, preservation, reformatting and access to textual and special
307	media holdings.
308	o A system, such as the Electronic Records Archives (ERA), that will
309	support storage, preservation and access for classified electronic
310	records.
311	 Will include RAC stations to handle the review of classified Presidential
312	records.
313 314	Worls Conne
	Work Space
315 316	• Will include space for NDC staff to support transfer, storage, reference and
	recalls for temporary and pre-archival agency records.
317 318	Will include space and equipment for agency reviewers performing systematic
319	review of their agency records and reviewing referrals in other agency records
320	in all formats, including special media records.
321	Will include space for NDC staff performing archival functions and supporting the declaration are asset.
322	the declassification process.
323	 Will include space for performing conservation and preservation reformatting on textual records.
324	
325	 Will include space for review and preservation reformatting of special media records.
326	records.
327	IT Infrastructure
328	Will include a system or systems in place to ensure accurate and timely tracking
329	of all holdings.
330	Will include a system to facilitate and document the declassification process
331	from initial review through public access.
332	 Will include a system that will support NDC staff processing special access
333	requests, to include case tracking and redaction functionality.
334	• Will include the ability to develop existing technologies, and explore new
335	technologies to improve and modernize the declassification process.
336	• Will include desktop, e-mail, file, and print server coordination.
337	 Will include the ability to access classified Presidential Library documents
338	through RAC review stations for declassification review.
339	
340	D. Staffing
341	
342	The day-to-day operation of the NDC will be administered, coordinated and overseen by
343	staff experienced in the declassification process, and in the archival principles needed to
344	process and manage temporary and permanent records. Agencies participating in the
345 346	NDC will work with NARA to establish the policies and procedures that govern NDC
347	work processes. The NDC will be managed by the NDC Director (see Chart B-1), with
348	the assistance of a Deputy Director, NARA Program Staff, and guidance from the NDC Policy Planning Group.
2-10	1 oney 1 mining Oloup.

2) Deputy NDC Director — Will facilitate agency liaison duties and ensure agencies are represented in the implementation of NDC policy. This position will be nominated by a participating agency's Senior Agency Official for Declassification, and will be approved by the NDC Director and the Policy Planning Group. The candidate should have extensive experience working in the declassification and security fields. The approved candidate will be detailed for at least one year to ensure the Deputy has sufficient input into the NDC, but no more than three years to ensure all agencies have equal opportunity for representation in the NDC management.

- 3) NARA Program Staff Will include representatives from NARA program offices that provide program guidance for specific functions in the NDC. Positions include a Security Manager, Information Systems Security Officer (ISSO), IT Systems Administrator, Administrative Officer, Facility Manager, Instructional Design Specialist, Presidential Records Coordinator and Preservation Conservator (see Appendix B). This staff will work with the Director and Deputy Director to support the day-to-day operation of the NDC.
- 4) **Director of Archival Operations (DAO)** Will oversee day-to-day archival operations in the NDC, direct NDC staff participation in declassification programs and coordinate declassification review with agency reviewers assigned to the NDC.
- 5) Records Storage Manager Manages the storage and services related to the storage of temporary, pre-archival and archival records in the NDC. Plans and

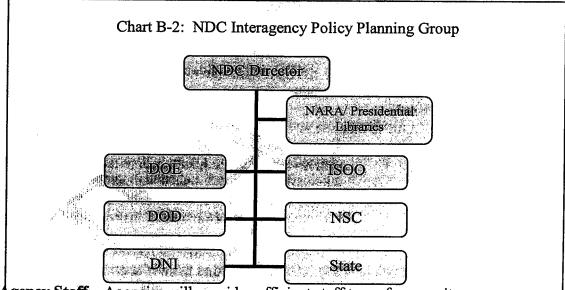

385

386

393 394 395

directs storage policies, and provides leadership and supervision to staff. The Manager is responsible for all aspects of records storage in the NDC.

6) NDC Interagency Policy Planning Group – Will set NDC priorities, approve the annual NDC work plan, develop standard declassification guidance. approve NDC policy/procedures and resolve issues which may occur in the NDC. The group will be chaired by the Director of ISOO, and will be made up of senior managers appointed by the Senior Agency Officials, as designated in section 5.4(d) of EO 12958, from DOE, DOD, DNI, State, NARA and NSC. Additional agencies will be invited to participate in the group as necessary to meet the NDC goals. The NDC Director will act as the Executive Secretary, and provide staff to support the group (see Chart B-2).

408 409 410

- 7) Agency Staff Agencies will provide sufficient staff to perform equity recognition, declassification review, and participate in the development training and guidance. Agency staffing levels may vary over time depending on changes in work load.
- E. NDC Functions The NDC will provide secure, high-quality, cost-effective storage and servicing of records for our Federal Customers to support their storage needs and declassification obligations.
 - 1) Classified Record Storage The NDC will provide agencies with records storage and support services for classified temporary and pre-accessioned records, and include the following services:
 - a) Storage for classified holdings up through the TS/SCI level, that will be designed to mitigate any preservation risks to the records.
 - b) Transfer of records Using information from approved Requests for Records Disposition Authority (SF-115) the NDC staff will work

414	with agencies to transfer classified holdings for storage and future
415	declassification processing.
416	c) Reference – The NDC staff will retrieve records requested by
417	agencies, and transport the records to the customer.
418	d) Re-file - The NDC staff will receive records returned from agencies
419	and replace them in the appropriate location.
420	e) Interfile – The NDC staff will add additional boxes to a transfer if an
421	agency adds additional records to a file.
422	f) Disposal - After a transfer reaches the end of its active life as
423	outlined in the NARA approved records schedule, then the transfer is
424	identified for either accessioning to NARA in the case of permanent
425	records or for destruction according to the records schedule and all
426	regulations for the proper disposal of classified records. NDC staff
427	will work with customer agencies to ensure that all permanent
428	records are accessioned and temporary records are scheduled for
429	disposal.
430	
431	2) Archival Functions – NDC will provide records management and preservation
432	for classified accessioned permanent records, and include the following
433	services:
434	a) Pre-Accessioning Activities
435	 Prioritization – NDC staff will work with NARA units and the
436	agencies to develop a plan to prioritize review and processing
437	of classified Federal, Legislative and Presidential records.
438	Records identified as being of significant scholarly or
439	high research interest will be prioritized at the highest
440	level.
441	o Records of general research interest will be
442	prioritized at a lower level.
443	• Appraisal – NDC staff will facilitate work by the agencies and
444	appraisal archivists to ensure all records in storage are
445	appraised and scheduled. Agencies will:
446	 Work with NARA to prepare accession paperwork.
447 448	o Verify permanent status holdings.
448 449	o Identify all access restrictions in permanent records.
449	o Inform NARA of all existing series descriptions or
	finding aids
451	• Series identification and verification – NDC staff archivists
452	will identify permanent series, and verify all associated
453	accessioning paperwork.
454 455	• Preservation – NDC staff will work with NARA conservators
455 456	to mitigate preservation risks, complete preservation risk
456 457	assessments and identify urgent or critical preservation issues.
457 459	b) Declaration Posture CA
458	b) Declassification Review of Agency and Accessioned records

459	 Initial Declassification Review of agency records (under
460	sections 3.3 [automatic] and 3.4 [systematic] of EO 12958)
461	o Will be performed by agencies on their records in the
462	NDC prior to accessioning (based on established
463	interagency and NDC priorities)
464	o NDC will develop a classified NDC system (similar
465	to NARA's Archival Declassification Redaction and
466	Review System - ADRRES) to track the
467	declaration process and all neviews decisions
468	declassification process and all review decisions.
469	o The NDC will employ clerical staff to assist NARA
470	and agencies with document indexing and data input.
471	o The existing interagency Quality Assurance Review
472	Team (QART) will examine records for review
473	quality.
	 Record series that "fail" the process will be
474	returned to the agency for a follow-up review
475	(using the NARA QART model)
476	Record series that "pass" the QA process will
477	continue to the referral process.
478	 Declassification Review of legacy records not reviewed prior to
479	accessioning.
480	 NARA and agencies will use the NDC developed
481	system to track the declassification process and all
482	review decisions.
483	 Agencies will complete initial declassification review (based on
484	established agency and NDC priorities)
485	© Reviewed records will go through the QA and referral
486	process as described above.
487	o The 400 million pages of legacy records that have
488	been reviewed by agencies will proceed through the
489	QA and referral processes as previously described.
490	
491	c) Interagency Referral Process
492	 NDC staff will process records through the referral center based
493	on prioritization plan
494	Based on the Interagency Referral Center (IRC)
495	model established by NARA.
496	o In coordination with annual processing work plans.
497	 Agencies will be notified of existing referrals through electronic
498	queues or alternative methods.
499	
500	NDC staff will be responsible for the reintegration process once all referral base adjudicated.
501	all referral have been adjudicated.
502	o Removing and securing all classified records.
502	o Transferring declassified records to open stacks at
503 504	NARA (Archives II) for public access.
) (1	

505	d) Declassification and Referral Process for Presidential papers,
506	materials, and records.
507	 Through the RAC project, NARA will digitally scan all
508	classified 25 year old documents held by Presidential Libraries
509	and make these images available for review at the CIA review
510	center and via terminals at the NDC.
511	 Agencies will be notified through the RAC project of any
512	primary and secondary referrals.
513	 Declassification review decisions will be captured in the RAC
514	system and transmitted to the CIA review center, which will
515	return the images marked with declassification decisions to the
516	appropriate Presidential Library for processing and release.
517	
518	e) MDR/FOIA/RAC
519	 For Federal records, the NDC will have staff to process
520	classified FOIA and MDR requests for accessioned archival
521	holdings. If agency declassification reviewers onsite are not
522	approved to conduct FOIA/MDR review, the NDC will perform
523	the following functions:
524	 Copying and referring documents to the appropriate
525	agency FOIA/MDR programs for review and
526	redaction.
527	o Processing agency responses to FOIA/MDR referrals
528	for public release.
529	Use the classified NDC system to perform redactions
530	required based on agency reviews.
531	Logged and tracking all requests in the classified
532	NDC system.
533	• For scanned Presidential papers, materials and records, the RAC
534	Project will support the referral process for classified FOIA and
535	MDR requests.
536 537	o Equity holding agencies will be provided with digital
538	copies of the materials for review.
539	o Review decisions will be returned to the appropriate
540	Presidential Library for processing and release.
540 541	• Future Functionality – NARA and the agencies do not currently
542	have compatible FOIA/MDR systems. Most agencies have
542 543	electronic FOIA/MDR redaction and tracking systems, but are
	not currently working toward making these systems compatible
544 545	throughout the government. To improve this process the NDC
545 546	will work toward automating the FOIA/MDR process and
547	making it easier for agency FOIA/MDR reviewers to review
548	their documents remotely. To achieve this goal, the NDC will:
140 149	o Develop a process for coordinating documents with
550	agencies using scanned images instead of
.JU	photocopies.

551	 Use the RAC system as a model to develop (through
552	an R&D process) a secure FOIA/MDR review system
553	that is accessible through the NDC.
554	
555	f) Quality Review, Training and Guidance
556	 Quality Review – The NDC will have a QA program in place to
557	ensure all declassification review meets established standards.
558	 The QA program will be based on the QART
559	established by NARA under the NDI.
560	o The team will consist of:
561	 Experienced senior reviewers from the
562	agencies performing declassification review
563	at the NDC.
564	 Other reviewers who are consulted as needed
565	based on subject matter.
566	 The QA team will review all records for quality of
567	review and resolve any issues that arise as a result.
568	 Training – The NDC will have a full-time Instructional Design
569	Specialist to develop a detailed training program for
570	declassification reviewers. This program will:
571	o Ensure all reviewers have access to the same training
572	on declassification policies and procedures. The
573	NDC training staff will work with individual
574	agencies to ensure reviewers are trained on relevant
575 .	subject matter and equities.
576 577	6 Build on practices established by the existing
578	interagency training committee.
579	Stablish a government-recognized certification for
580	declassification reviewers. Certification will include:
581	 General equity recognition training for first reviewers.
582	
583	Advanced training that will lead to:
584	o Expert certification for specific subject areas
585	o Certification for senior reviewers
586	o The training staff will develop training that can be
587	delivered:
588	 In-person as hands on-training.
589	Remotely through DVDs or as web-based
590	training.
591	o This will be a collaborative effort, but does not
592	change the fact that individual agencies have control
593	over who is authorized to declassify their equities.
594	The training staff will work with agencies to
595	create certification training that meets their
596	needs.

597	Guidance – The NDC will establish a library of declassification
598	guidance and reference materials that can be accessed at the
599	NDC.
600	o The guides will be maintained on an intranet in the
601	NDC, and will be based on the Declassification
602	Guide Web Application (DGWA) system that NARA
603	is currently developing.
604	o The intranet will provide a single, easily accessible
605	location to store Interagency Security Classification
606	Appeals Panel (ISCAP)-approved declassification
607	guidance. The NDC staff will work with agencies
608	and ISOO to ensure guidance on the intranet is
609	current.
610	o The NDC staff, agencies and ISOO will cooperate to
611	standardize declassification guides throughout the
612	government
613	 Agencies will have the ability to restrict, or control
614	access to their guidance stored at the NDC.
615	
616	g) Archival Processing of Federal Records
617	 Space management – The NDC staff will manage records
618	storage through the use of classified systems with functionality
619	similar to the Archives and Record Center Information System
620	(ARCIS) and Holdings Management System (HMS).
621	 Accessioning – The NDC staff will coordinate the transfer and
622	accessioning of records regardless of format between the
623	agencies and NARA.
624	Withdrawal and reintegration – The NDC staff will withdraw
625 626	and reintegrate withdrawn records based on the procedures set in
626	the declassification process.
627 628	Description - The NDC staff will work with NARA reference
629	and processing units to create or update finding aids and
630	Archival Research Catalog (ARC) descriptions as necessary. h) Preservation – The NDC staff will coordinate with NARA
531	Preservation Programs to implement the following preservation
532	functions at the NDC:
533	Assessment of preservation risks
534	Mitigation of preservation risks through use of preventive
535	preservation strategies
536	Preservation training
537	Conservation and preservation and access reformatting of at
538	risk textual and non-textual records
539	Declassification of Classified Special Media (CSM) will be
540	supported by providing the following:
541	Reformatting of analog media to digital surrogates for
542	review and preservation.
	- -

643	o Equipment and labs required for preservation,
644	reformatting and playback of CSM.
645	 Staff to perform reformatting and redaction of CSM,
646	and to assist reviewers.
647	 IT infrastructure required to storage, preservation and
648	reformatting for a CSM system.
649	Total World World Strain
650	F. IT Infrastructure and Applications
651	The state of the s
652	IT Infrastructure
653	
654	Users at the NDC and will require IT and office equipment to support access to multiple
655	classified and unclassified networks. User access will be controlled based on security
656	levels and standalone secure systems/networks will be segregated in separately controlled
657	or compartmented secure areas, as deemed necessary. The networks storage, bandwidth
658	and connectivity will be sufficient to support all NDC business functions and automated
659	systems.
660	
661	The NDC will offer users unclassified communications, such as Telephone and Fax, and
662	classified communications such as STE telephones and classified Fax equipment. The
663	NDC will have both unclassified and classified secure video conferencing facilities. At
664	the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users and the desistant users will have DCs with account to the desistant users will have DCs with account to the desistant users and the desistant users are the desistant users and the desistant users are the desistant users and the desistant users are the desistant
665	the desktop, users will have PCs with access to office automation applications and secure
666	access to shared, and agency-specific internal Web pages. Access and content of agency-specific spaces will be controlled by each
667	specific spaces will be controlled by each agency with support from the NDC IT staff.
668	Shared space will be moderated by the NDC staff, and accessible to all users for the
669	sharing of information and declassification guidance with the entire NDC community.
670	To fooilitate access and the small state of the sma
671	To facilitate access requirements, the NDC may provide access to multiple physically
672	separate networks and systems as determined by stakeholder requirements. Specifically,
673	the NDC will provide access to outside agency/stakeholders classified networks such as
674	Secret Internet Protocol Router Network (SIPRNet), Joint Worldwide Intelligence
675	Communications System (JWICS) and any other networks as deemed necessary to
676	accomplish declassification work.
677	A11 NIDC
	All NDC stakeholders will adhere to the information assurance guidelines established in
678	NARA Directive 804, and IT systems will be operated according to the policies in
679	NARA's IT Security Architecture.
680	
681	777) A 11
682	IT Applications
683	
684	While the NDC functions and business processes identified in Section E need to be fully
685	developed and documented, there is core functionality that needs to be supported through
686	the use of IT. The requirements, design, development and deployment of all NDC IT
687	Systems will be conducted according to NARA Directive 805, the System Development
688	Lifecycle.

Business processes will be analyzed and documented and determinations will be made as to the best strategies for both manual and automated processes. As the business processes are more defined determinations will be made as to the levels of classification that will be required for each system. Alternatives studies will be done to evaluate functionality of current systems that may support the NDC versus new development. All new development will ensure that systems are secure, flexible and extensible. Core IT functionality includes:

 Automated tracking, monitoring and of unclassified and classified material at the record level for all types of media to ensure accurate inventory tracking and accountability. This includes the tracking of:

1. Holdings within the NDC

2. Records that are transferred to the NDC by agencies

3. Records that are transferred from the NDC back to agencies4. Declassified records transferred to open NARA research facilities

 Automated tracking and recording of declassification decisions to ensure records are reviewed by all appropriate equity holders and prevent the inadvertent release of classified information.

 Automated review and redaction capabilities for both large volumes of records and complex data formats with flexibility for expansion to support increasing number of declassification requests while ensuring timely release of materials.

 A Web-based Declassification Guide to provide one central reference location for users to access and reference all available declassification information. Available information is user-dependent and may consist of declassification guides, general declassification material, as well as shared knowledge among users and subject matter experts (e.g. Question and Responses postings).

Collaboration tools to support equity holders in the decision making process.

• Workflow to support:

1. Systematic review

5. IRC functions

2. Declassification decisions

Referral review
 FOIA/MDR processing

• Support the Declassification of CSM including equipment and laboratory environment required for preservation, reformatting, and playback of CSM including the capabilities for the transfer of analog media to digital formats.

• Interface to ERA (now in development) or have functions similar to ERA to support the long-term preservation and migration of classified digital media and formats.

G. Summary and Recommendations

Improving the declassification process has broad bi-partisan support in the government, and high interest in the public sector. Based on the problems identified under the current NDI process, declassification processes must be overhauled to meet the requirements established in EO 12958. The most efficient and effective way to address these problems is through the establishment of an NDC. NARA took the first step in this process by creating the NDI and is prepared to establish the NDC as recommended by the Moynihan Commission and the PIDB.

The CONOPS provides a high level overview of the staffing and functions of an NDC. It does not however address a few specific issues that must be resolved before an NDC can be established. The following issues were discussed, but not addressed in the CONOPS:

- 1) It is clear that NARA can only support certain aspects of the NDC at the facility in College Park facility. A new facility which will support all functions of an NDC must be built. The next steps in this process will include locating an appropriate site, and designing a building that will meet all storage, preservation and security requirements of the NDC.
- 2) The declassification process as it currently exists is flawed. Despite being reviewed by originating agencies as required under EO 12958, declassification referral and processing backlogs exist, and declassified records are not publicly available as intended. A detailed business process re-engineering project (BPR) needs to be undertaken to improve the NDI processes that will become the NDC. This process should include NARA staff working on the NDI, agencies involved in the NDC declassification process, and contractors skilled at facilitating BPR projects.
- 3) This NDC is a new and unique program. This is a true interagency cooperative process and will require resources and support from all participants. An interagency policy planning group needs to be established to address roadblocks in the existing process and develop plans to ensure the NDC meets the requirements of all participants, the public, and the EO. NARA will be working with group to develop a plan that outlines the support required from participating agencies.
- 4) In their report, the PIDB expressed concern that declassification review and preservation of classified special media and electronic records is not being adequately addressed by agencies. Each year the volume of records created in electronic formats and the risk for loss of information due to obsolete media is increasing. The NDC Director should work with agencies, electronic records

experts and NARA's Lifecycle Management Division records management staffs to determine an accurate volume of classified electronic records, and establish a plan for preserving and declassifying these records.

5) Beyond the automatic declassification provisions of EO 12958, the processing of FOIA and MDR requests is a complex and costly process. The NDC should look toward the future to develop a method of streamlining or improving the referral process. These improvements would allow appropriate agency reviewers to review, redact and refer documents in one centralized system. A process for researching and leveraging new technologies should be established in the NDC.

A National Declassification Center is the best hope for meeting the expectations of the public, access goals of the President, and as then-Senator Obama stated, restoring "the balance we've lost between the necessarily secret and the necessity of openness in a democratic society".⁵

⁵ Senator Barak Obama. "A New Beginning". DePaul University, October 2007.

191	APPENDIX A: DEFINITION OF TERMS
798	
799	Access - The ability or opportunity to gain knowledge of classified information.
800	
801	Agency - Any "Executive agency," as defined in 5 U.S.C. 105; any "Military
802	department" as defined in 5 U.S.C. 102; and any other entity within the executive branch
803	that comes into the possession of classified information.
804	
805	Accessioning - The process of transferring legal custody of records from the originating
806	agency to NARA.
807	
808	ADRRES (Archival Declassification Redaction and Review System) - A system used
809	by NARA to index exempted materials, track declassification decisions and projects,
810	maintain a FOIA/MDR log, and perform redaction of textual records. This system was
811	developed by CACI and is based on their HighView software.
812	
813	ARC (Archival Research Catalog) - The online catalog of NARA's nationwide holdings
814	in the Washington, DC area, Regional Archives and Presidential Libraries.
815	
816	ARCIS (Archives and Records Centers Information System) - A web-based system
817	being deployed by the Federal Records Centers (FRCs) of the National Archives and
818	Records Administration to serve as the portal through which all agencies will conduct
819	online transactions with the FRCs. The system allows agencies to document and monitor
820	transactions electronically, giving instant access to information about their records.
821	1000 1000 1000 1000 1000 1000 1000 100
822	CSM (Classified Special Media) - Classified records in formats, such as dynamic media
823	(audio, video and motion picture) or still images. NARA is constructing a system that
824	will reformat, digitize and preserve these formats. The system will have review
825	workstations for declassification review by authorized reviewers, and redaction stations
826	for use by lab specialists.
827	
828	DAO (Director of Archival Operations) - The person in the NDC who manages day to
829	day operation of functions related to declassification and archival processing.
830	
831	<u>Declassification</u> – The authorized change in the status of information from classified
832	information to unclassified information.
833	
834	Declassification Authority means:
835	(1) the official who authorized the original classification, if that official is still
836	serving in the same position;
837	(2) the originator's current successor in function;
838	(3) a supervisory official of either; or
839	(4) officials delegated declassification authority in writing by the agency head or
840	the senior agency official.
841	

842 <u>Declassification guide</u> — Written instructions issued by a declassification authority that describes the elements of information regarding a specific subject that may be declassified and the elements that must remain classified.

<u>DGWA (Declassification Guide Web Application)</u> – An online application in the ADRRES network, built to provide one central reference location for Users to access shared declassification guidance and information.

<u>Equity</u> – Information that originated from agencies other than the creating agency, or the disclosure of which would affect the interests or activities of other agencies. These documents shall be referred for review to those agencies and the information of concern shall be subject to automatic declassification only by those agencies, consistent with the provisions of section 3.3 of EO 12958.

ERA (Electronic Records Archives) – The NARA strategic initiative to preserve and provide long-term access to uniquely valuable electronic records of the U.S. Government, and to transition government-wide management of the lifecycle of all records into the realm of e-government.

Federal Records – A include all books, papers, maps, photographs, machine readable materials, or other documentary materials, regardless of physical form or characteristics, made or received by any executive agency or any establishment in the legislative or judicial branch of the Government (except the Supreme Court, Senate, the House of Representatives, and the Architect of the Capitol and any activities under his direction) of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations or other activities of the Government or because of the informational value of the data in them. The framework for Federal records management is established in the Federal Records Act (44 U.S.C. 3301).

FOIA (Freedom of Information Act) – An access law (5 U.S.C. § 552) which gives the public the right and ability to request access to records of the Federal government that are not publicly available.

<u>HMS (Holding Management System)</u> – A system being deployed by NARA to track and provide information about accessioned permanent records.

ISCAP (Interagency Security Classification Appeals Panel) — A Panel created under Executive Order 12958, "Classified National Security Information," to provide the public and users of the classification system with a forum for further review of classification decisions. The ISCAP is a six member body consisting of senior level representatives appointed by the Departments of State, Defense, and Justice, the Central Intelligence Agency, the National Archives, and the Assistant to the President for National Security Affairs. The President appoints the ISCAP's Chair from among its members, and the Director of ISOO serves as its Executive Secretary. ISCAP is the final appeal authority

- for decisions made under the Mandatory Review Provision of the EO, and is the approval authority for agency declassification guides.
- 890 ISOO (Information Security Oversight Office) A component of the National
- 891 Archives and Records Administration (NARA) that is responsible to the President for
- policy and oversight of the Government-wide security classification system and the
- 893 National Industrial Security Program. ISOO receives policy and program guidance from
- the National Security Council (NSC), and receives authority from: Executive Order
- 895 12958, as amended "Classified National Security Information", and Executive Order
- 896 12829, as amended "National Industrial Security Program".

- 897 <u>IT Infrastructure (Information Technology Infrastructure)</u> A general term to encompass all information technology assets (hardware, software, data) and networks, including internal and external networks required to operate the NDC,
- 900 telecommunications, IT components, systems, applications, and resources.

IRC (Interagency Referral Center) – A program developed by NARA to bring agencies to one central location to adjudicate all referrals identified in during the declassification process. NARA supports this process by working with agencies to complete the identification of referrals, notify agencies that referrals have been made, and completing the process to make declassified records available to the public.

<u>ISPM (Information Security Program Manager)</u> — An individual and alternate(s) appointed to act on behalf of the NARA Information Security Officer, who manages the overall classified information security program in NARA, in providing assistance, advice and training to component personnel and to implement the classified information security program at their location.

ISSO (Information Systems Security Officer) — Individual designated with the responsibility to ensure that the appropriate operational security posture is maintained for an information system. The ISSO works with the NARA CISSO in cooperation with the cognizant ISPM and the NARA ISO to ensure IT system compliance with NARA classified information security program policies.

MDR (Mandatory Declassification Review) – The review for declassification of classified information in response to a request for declassification that meets the requirements under section 3.5 of EO 12958.

NDC (National Declassification Center) — A consolidated, interagency program to improve the declassification process. The NDC will be a centralized physical location where all agencies could conduct declassification review of their records, and review their equities in the records of other agencies.

NDI (National Declassification Initiative) — A NARA program, with interagency participation, to facilitate declassification and referral under EO 12958. This program supports agency review of classified records and referrals in NARA holdings. NARA

also established a quality assurance program, declassification training, and an automated system to support the process.

<u>Physical Storage</u> – A physical location to safely store records regardless of media type. Storage at the NDC would include all media types and national security classification levels.

PIDB (Public Interest Declassification Board) — An advisory group, created by Public Law 106-567, to advise the President and other executive branch officials as the Board considers appropriate on the systematic, thorough, coordinated, and comprehensive identification, collection, review for declassification, and release to Congress, interested agencies, and the public of declassified records and materials (including donated historical materials) that are of archival value, including records and materials of extraordinary public interest.

<u>Presidential Papers, Materials and Records</u>—Presidential collections governed by statutory authorities including Presidential Papers that were deeded and received under 44 U.S.C. 2111(Hoover – Carter administrations excluding Nixon); the Presidential Recordings and Material Preservation Act, 44 U.S.C. 211 note (Nixon administration); and the Presidential Records Act, 44 U.S.C. 2201-2207 (Reagan administration forward).

<u>OA or Quality Assurance</u> – The process of verifying or determining whether products or services meet expectations. In the NDI this refers to process of performing a review of a completed project to ensure the original review correctly identified third party equities.

<u>OART (Quality Assurance Review Team)</u> – Is a team established by NARA to perform a quality assurance review of agency declassification decisions. This is an interagency group that reviews completed declassification project to ensure all classified information is identified and all equity agencies were identified.

RAC (Remote Archives Capture) A program established by NARA and the CIA. The program involves scanning of classified documents in the Presidential Libraries, and returns the images to the DC area, where they are reviewed by agencies in a classified review system to identify and redact classified information. Declassified and redacted images are returned to the libraries for release to the public.

Sight

Records – The records of an agency and Presidential papers or Presidential records, as those terms are defined in Title 44, United States Code, including those created or maintained by a government contractor, licensee, certificate holder, or grantee that are subject to the sponsoring agency's control under the terms of the contract, license, certificate, or grant. Records having "permanent historical value" means Presidential papers or Presidential records and the records of an agency that the Archivist has determined should be maintained permanently in accordance with Title 44, United States Code.

977 Record Series – A group of similar records that are arranged according to a filing system and that are related as the result of being created, received, or used in the same activity.

<u>Reference</u> – Refers to the process of locating, retrieving and delivering requested records to a customer.

<u>Re-file</u> – The process of replacing records in the appropriate locations for future reference.

Referrals – Records containing information that originated with other agencies or the disclosure of which would affect the interests or activities of other agencies shall be referred for review to those agencies and the information of concern shall be subject to automatic declassification only by those agencies, consistent with the provisions of EO 12958. When an agency receives any request for documents in its custody that contain information that was originally classified by another agency, or comes across such documents in the process of the automatic declassification or systematic review provisions of this order, it shall refer copies of any request and the pertinent documents to the originating agency for processing, and may, after consultation with the originating agency, inform any requester of the referral unless such association is itself classified under EO 12958 or its predecessors.

<u>Security</u> – The physical protection of the building, IT systems and records. Requirements are based on Director of Central Intelligence Directive Category 6 - Security (DCID 6), DOD National Industrial Security Program Operating Manual (NISPOM) and NARA Information Security 202 standards.

<u>SCI (Sensitive Compartmented Information)</u> – Information and materials bearing special intelligence community controls. Information in this category requires special handling, storage and protection.

<u>SCIF (Sensitive Compartmented Information Facility)</u> – This refers to a vault that is authorized to store SCI information.

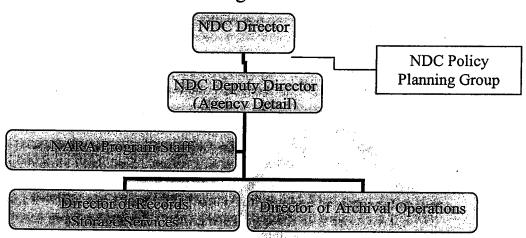

Senior Agency Official – The official designated by the agency head under section 5.4(d) of EO 12958 to direct and administer the agency's program under which information is classified, safeguarded, and declassified.

<u>Special Media Records</u> – Records in formats that require equipment to review and may require equipment for preservation reformatting prior to use. This include audio, video, motion picture, some photographic negatives and other special format materials.

1018 <u>Transfer of Records</u> – This terms has two definitions within the NDC:

- The process of physically moving records from an agency to be stored in a record center, until final disposition is implemented.
 The physical and legal transfer of records from the originating agency to the NAR
- The physical and legal transfer of records from the originating agency to the NARA (see accessioning).

- 1) NDC Director The Director of the NDC will be an SES position hired by NARA, and will have extensive experience with government declassification practices, and working with agencies to support the declassification process. The Director will be responsible for the daily operation of the NDC. Responsibilities include:
 - Ensuring Physical, IT and Personnel security meets standards, including, but not limited to DCID 6/9 (or ICD 705), DCID 6/3, ICD 704, NARA Directive 202 and NARA Directive 273.
 - Supervising NDC Administrative staff, Director of Archival Operations and Director of Records Storage Services.
 - Coordinating with NARA program staffs on NARA wide issues related to preservation, reference, storage, record transfers, appraisal, and accessioning.
 - Acting as the liaison with senior management of agencies participating in NDC on declassification processes, prioritization, training and guidance.
 - Acting as liaison with outside advocates (PIDB, historical groups, etc.) on prioritization and NDC operations.
 - Working with agencies to develop and implement a comprehensive NDC work plan.
 - Reporting on the NDC status and progress to:
 - o NARA
 - o ISOO
 - o Agencies
 - Developing and providing oversight of the annual NDC budget

- Working with the Policy Planning Group to develop and implement standard policies, procedures, training and declassification guidance.
- Generating statistical reporting as required by:
 - o NARA
 - o Congress
 - o Executive Office of the President
 - o Federal Oversight agencies (OMB, DOJ, ISOO, etc.)
- 2) Deputy NDC Director The Deputy facilitates liaison activities between agencies and the NDC, and ensures agencies are represented in the implementation of NDC policy. This position will be a detail from one of the agencies participating in the NDC. The incumbent will be nominated by an agency's Senior Agency Official for Declassification, and approved by the NDC Director and the Policy Planning Group. Candidates should have extensive experience working in the declassification and security fields. The detail will be at least one year to ensure the Deputy has sufficient input into the NDC, but no more than three years to ensure all agencies have equal opportunity for representation in the NDC management. The Deputy NDC Director will:
 - Assist the Director with oversight of:
 - o Physical security
 - o IT systems
 - o Facilities issues
 - o Annual budget
 - Act as the primary advocate for all agencies participating in the NDC.
 - Represent the Director and the NDC when necessary.
 - Work with the Director to implement NDC policy and procedures.
- 3) NARA Program Staff The staff consists of security, IT, facilities, preservation and administrative personnel that provide NARA program guidance and support the operation of the NDC (see chart B-2).

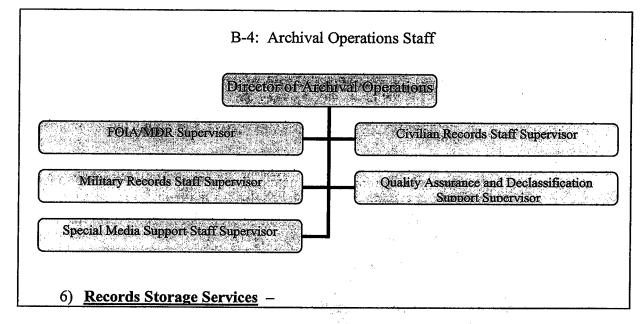

1091	a) The NDC Security Manager's primary responsibilities will be:
1092	 Coordinating the security program with NARA's Security
1093	Management Division and agency security offices.
1094	 Managing NDC security staff working on physical, personnel and
1095	information security.
1096	 Ensuring physical security meets Intelligence Community standards.
1097	 Developing standard operating procedures (SOP) that address
1098	information security requirements specific to the NDC.
1099	 Managing contracts related to security services at the NDC.
1100	 Creating, submitting and resolving reports of security incidents.
1101	 Serving as the COMSEC custodian for the NDC to set up and
1102	maintain secure communications equipment.
1103	 Working with NARA and the agencies to create and implement
1104	security inspection and Continuity of Operations Plans (COOP)
1105	programs.
1106	 Acting as the primary Information Security Program Manager
1107	(ISPM) for the NDC, and administering procedures for the control
1108	and protection of classified information.
1109	
1110	b) The Information Systems Security Officer's (ISSO) primary
1111	responsibilities will be to:
1112	• Ensure that all requirements and security plans prescribed by the
1113 1114	NARA IT Security Program are appropriately implemented.
1114	• Ensure the completion, maintenance and testing of all System
1115	Contingency Plans.
1117	Manage the accounts of authorized users.
1117	• Enforce IT security policies, standards and procedures on all
1119	personnel having access to system for which the ISSO is responsible.
1120	
1121	 Ensure that aidit trails are reviewed periodically (e.g., daily, or weekly) and that audit records are archived for future reference.
1122	Report security incidents in accordance with NARA policy and
1123	standards to the System Owner, and/or NARA Computer Security
1124	Incident Response Center (CSIRC) as appropriate.
1125	• Serve on the Configuration Control Board (CCB). Evaluate the
1126	impact of changes on the security posture of the IT system and
1127	provide the report to the CCB.
1128	
1129	c) The IT System Administrator's primary responsibilities will be to:
1130	Establish and maintain classified and unclassified IT systems that
1131	support the NDC.
1132	 Coordinate IT issues with participating agencies.
1133	 Provide oversight on system integrity and security issues.
1134	Coordinate and oversee research and development of IT
1135	technologies to improve the function of the NDC.
	•

1136	
1137	d) The Administrative Officer's primary responsibilities will be to:
1138	Implement and oversee the NDC budget.
1139	 Coordinate administrative issues with NARA and participating
1140	agencies.
1141	 Assist Director implementing NDC policy and practices.
1142	 Be the facility coordinator for all NARA time and attendance
1143	functions.
1144	 Coordinate all purchasing activities for the NDC.
1145	 Manage all contracts for building amenities.
1146	
1147	e) The Facility Manager's primary responsibilities will be to:
1148	 Ensure NDC building meets all preservation standards established
1149	by NARA for record center and archival facilities.
1150	 Manage all contracts related to maintenance and repairs for the NDC
1151	(or coordinates facilities issues with building manager for leasing
1152	company).
1153	 Establish and implement preventive maintenance and building
1154	inspection programs.
1155	 Creates and implements building specific emergency procedures and
1156	coordinates all plans with the COOP program.
1157	 Direct all contracts for building amenities.
1158	 Is responsible for the property management program.
1159	
1160	f) The Instructional Design Specialist's primary responsibilities will be
1161	to:
1162	 Develop, establish and deliver a comprehensive interagency
1163	declassification reviewer training curriculum.
1164	 Work with agencies to ensure the curriculum is up to date.
1165	 Work with the IT staff to develop current and effective ways to
1166	provide training that will reach all declassification reviewers.
1167	 Work with agencies to develop and schedule equity identification
1168	training for all declassification reviewers.
1169	 Work with agencies to ensure the curriculum is maintained and is
1170	current with agency policies and procedures.
1171	 Work with the agencies to develop standard declassification
1172	guidance.
1173	 Manage a staff of training specialists.
1174	
1175 1176	g) The Presidential Records Coordinator will serve as the liaison
1176	between the Presidential Libraries, the RAC program, and agency
1177	reviewers accessing documents through the RAC Project and
1178	conducting declassification review of scanned Library documents
11/9	requested under FOIA/MDR.
1100	

1181	h) The Preservation Programs at NARA will be responsible for
1182	managing preservation risk assessment programs, providing guidance
1183	on preservation issues, oversight of preservation actions and
1184	reformatting in a formation actions and
1185	reformatting, performing preservation actions on at risk records, and
	establishing records emergency and recovery procedures. A
1186	Preservation Programs Officer will be designated as responsible for
1187	preservation functions at the NDC.
1188	
1189	4) Agency Staff – Agencies participating in the NDC will:
1190	 Perform declassification review of their agency's records in the NDC
1191	prior to accessioning into NARA.
1192	 Perform declassification review of legacy textual and special media
1193	records in NARA custody.
1194	· · · · · · · · · · · · · · · · · · ·
1195	• Input metadata on exempted/referred materials identified during the
1196	review process, or support NDC staff performing data entry.
	 Provide staff to review records in the referral center.
1197	 Provide reviewers for special projects that can most efficiently be
1198	accomplished by collaborative agency effort.
1199	 Provide equity recognition training for all reviewers participating in the
1200	NDC.
1201	 Ensure their agency's declassification guides in the NDC are up to date.
1202	 Provide reviewers for the Quality Assurance program.
1203	Work with Directors of Archival and Record Records Storage Services
1204	to address records management issues.
1205	Assist the NDC staff to establish detailed equity recognition training
1206	programs.
1207	programs.
1208	5) Archival Operations Staff NARA archival staff will be organized as shown
1209	in chart 2 d and will conform the fall and a late of the late of t
1210	in chart B-4, and will perform the following declassification and archival functions:
1210	functions:
1211	
	a) Director of Archival Operations (DAO) – Manages the day-to-day operations of the declassification programs and archival functions
1213	of state of the decimentation programs and archival functions,
1214	These duties will include:
1215	 Management and oversight of the declassification teams.
1216	 Coordination with other NARA offices on reference, processing,
1217	preservation, and transfers pertaining to textual and special media
1218	records.
1219	 Working with the Preservation Programs Officer to mitigate any
1220	preservation risks in archival storage, on handling and use of
1221	records, and to implement preservation strategies to ensure
1222	preservation of the records.
1223	 Coordination of declassification/review processes with agency team
1224	leads on-site.
1225	
1226	• Coordination with the Director of Records Storage Services on
1220	issues related to transfer of records and accessioning.

1227	 Statistical reporting to NDC Director.
1228	 Provides input to the Director on issues related to prioritization,
1229	NDC practices and any issues that require resolution by the NDC
1230	Policy Planning Group.
1231	• Provides statistics and input into development of billing program for
1232	the NDC.
1233	 Provides oversight of the classified FOIA/MDR process for
1234	accessioned Federal records.
1235	
1236	b) FOIA/MDR Staff Supervisor
1237	 Assigns FOIA/MDR cases (both incoming and Follow-up).
1238	• Coordinates and collaborates with other agencies on new approaches
1239	to improving response times.
1240	 Coordinates FOIA issues with all NARA program offices
1241	(especially for classified records).
1242	 Provides support for the classified research room.
1243	 Coordinates with the processing teams on re-filing released records
1244	into completed projects.
1245	 Manages a staff of experienced archives specialists.
1246	
1247	c) Civilian Records Staff Supervisor
1248	 Participates in work planning/prioritization for civilian agency
1249	records.
1250	 Directs pre-accessioning activity (including series identification and
1251	holdings maintenance) for civilian agency records.
1252	 Implements annual processing work plan (including workflow,
1253	declassification processes, and archival description) for civilian
1254	agency records.
1255	 Reports completed projects to the DAO and appropriate program
1256	offices.
1257	• Facilitates the move of processed records to Archives II.
1258	 Manages a staff that includes archivists, archives specialists and
1259 1260	archives technicians.
1261	d) Military Doggada Stoff Symposium
1262	d) Military Records Staff Supervisor
1263	 Participates in work planning/prioritization for military agency records.
1264	
1265	 Directs pre-accessioning activity (including series identification and holdings maintenance) for military agency records.
1266	 Implements annual processing work plan (including workflow,
1267	declassification processes, and archival description) for civilian
1268	agency records.
1269	 Reports completed projects to the DAO and appropriate program
1270	offices.
1271	 Facilitates the move of processed records to Archives II.

- a) Director of Records Storage Services Manages records storage operations at the NDC. Plans and directs records storage operations and provides leadership and supervision to staff. The Director will:
 - Coordinate with agencies on transfer, reference, re-files, interfiles and disposal issues.
 - Coordinate with NARA archival staff on appraisal and accessioning.
 - Work with the DAO to coordinate transfer or accessioned records.
 - Provide statistics and input into development of the program for the NDC.
 - Generate statistical reporting for the NDC Director.
 - Coordinate with agencies to facilitate initial declassification of temporary and pre-archival records.
 - Manage the environment in storage to meet the applicable standards for preservation of records, in collaboration with Preservation Programs Officer.
- b) Supervisory Archives Specialist (Assistant Director/Vault Manager)
 —Manages the day-to-day activities of the staff, performs quality
 control auditing of reference services, and oversees duties related to
 searching, retrieving, re-filing, shelving, removing, and screening of
 agency records and preparing them for shipment to customer
 agencies. Establishes procedures for and controls access to
 temporary and pre-archival records in the NDC.
- c) Supervisory Archives Specialist (Dock Manager) Supervises a team of archives technicians/aids and wage grade motor vehicle operators and performs or oversees the performance of duties related

1347 1348	to picking up, receiving, and delivering records to and from Federal agencies. Assists in planning the removal of disposable records.
1349	ageneres. Assists in planning the removal of disposable records.

Appendix C: Converting the NDI into the NDC

Immediate Changes

- 1) NDC Policy Planning Group This group will be established by NARA, and will address common road blocks in the declassification process and establish policies to improve declassification. Using the new Executive order or Presidential statement for high level guidance, the NDC Policy Planning Group will be responsible for directing mandatory participation. This represents a transformational change between the voluntary NDI and a mandatory NDC. NARA has already identified six areas in need of consolidated policy guidance.
 - a. Review Priorities NARA has begun developing a list of records that are frequently requested and have high research use. NARA and agencies need to develop a joint prioritization plan to ensure the public has access to high interest records first. This will require agencies to focus declassification and referral review, and NARA to focus indexing, withdrawal and processing on the highest priority records. In establishing a priority list, NARA and the agencies should work with public interest and historical groups to determine which records are high interest.
 - b. QA Process One of the road blocks in the current process is the interagency QA review. Ideally, reviewers identify all classified information and information that requires referral. In practice this is not always the case. However, reviewing all records in the QA process has proven to be a long and slow process. The policy planning group needs to address the validity of performing a QA review on all records. The policy group needs to apply risk analysis methodologies to determine which records require QA review, and to define an error rate below which records do not require an entire page-by-page review.
 - c. Training NARA has hired an instructional design specialist to work with agencies to establish standardized training for all reviewers. This training will ensure all reviewers receive the same, comprehensive training on the review process. This will be extremely useful for agencies that have high turnover among declassification reviewers. The NDC will need to expand this idea to strengthen the equity recognition portion of the training. While agency reviewers can not declassify another agency's equity, it is vital that all reviewers are able to accurately identify another agencies' equity for appropriate referral. To accomplish this goal the policy group needs to ensure that all participating agencies cooperate to provide the training group with all information necessary to accurately identify their equity.
 - d. **Declassification Guidelines Library** NARA is establishing a web interface on their classified network to create a library of declassification guides. By keeping guidelines in this library up to date, agency reviewers will always have an accurate source for their guides. NARA is very clear that access to these guides does not mean a reviewer can declassify another agency's equity. The purpose is for agency reviewers to have access to the most up to date version of their own guidelines, and to allow other agency reviewers to

accurately identify other agency equities for referral. The policy group needs to agree on use of the library.

Consolidate Data Capture — Agencies performing declassification review

- e. Consolidate Data Capture Agencies performing declassification review are capturing data about exempted and referred records. NARA is capturing similar information at the back end of the process. Currently, the data agencies are creating not always compatible with the NARA system. The policy group needs to address the consolidation of data across agencies. A list of common data elements needs to be generated, and agencies need to agree to turn over the data in a format that can be ingested into an NDC system. By working together we can eliminate duplication (and sometimes triplication) in the process.
- f. Kyle/Lott Review The Department of Energy requires that all declassified records be reviewed and certified by a trained Kyle/Lott reviewer. Completion of this review is not accurately tracked, and as a result records are sometimes reviewed multiple times. Agencies need to work together to accurately track when all declassification review has been completed. The policy group should ensure all agencies are tracking when records have been reviewed (and by whom), and this information should be tracked by the NDC.
- 2) DOD Joint Referral Center The NDC should coordinate with DOD on the establishment of the DOD JRC. As the NDC is established, practices need to be standardized across all agencies. As DOD sets up the JRC, consideration should be given to integrate it as a remote aspect of the NDC. Certain aspects such as common practices and procedures for declassification, a joint system of tracking declassification review decisions, joint review priorities and a separate QA team onsite should be developed. This relationship should be established through an MOU.
- 3) Existing Referral Center To accommodate additional agency reviewers (participating in the NDC), NARA plans to expand ADRRES to allow all agencies access to ADRRES. NARA will change the existing process to create two IRC teams, civilian and military, each with an associated QA team. In addition, NARA will hire cleared clerical contractors to complete indexing and data input, freeing up existing staff to complete the more complex declassification and archival processes.
- 4) Space at Archives II Archives II does not have enough space to accommodate a fully functional NDC. As a result NARA will re-evaluate the allocation of space to agency reviewers and the NDC staff to determine the best use space. This will require relocation of some processes and reviewers. NARA will evaluate workloads to determine space needs for all agencies and the NDC staff, and reallocate space to meet existing requirements. During this period of transition, the NDC at Archives II should be viewed as an opportunity for learning by doing. Workflow and process approached should be tested and best practices should be adopted. The vision of a purpose-built NDC, that can fully and completely serve the needs of the Federal government, should not be abandoned.

5) Guidance – To improve the declassification process and reduce invalid referrals, the NDC staff will work with agencies and ISOO to develop a standard interagency guide. This guide will address information common to multiple agencies to ensure it is treated the same by all reviewers, and will identify information that does not require referral to avoid clogging the system with unnecessary referrals. This guide will not affect declassification and referral of information that is unique to individual agencies.

Mid to long term changes

evolve and expand.

 1) Business Process Re-engineering – With the establishment of an NDC, NARA will begin a BPR of the interagency declassification processes. NARA and agency officials will be asked to examine the process and work together to develop improved and streamlined processes for the NDC.

2) IT System – In conjunction with the BPR, NARA will examine the need for a replacement for the ADRRES system. This system will facilitate the interagency processes identified in the BPR and Begin development of a new system to support the NDC. NARA and agencies will be asked to identify:

a. What is missing in the process?

b. What can be done better?

c. Can we use secure network to allow agencies to use same system when reviewing their records?

includes a Director and as envisioned in the draft CONOPS, and a Deputy Director

3) NDC Staffing In order to establish the NDC, additional staff will be hired. This

who will be on detail from one of the participating agencies. Additional staff,

including contractors, will be brought on board as needed as the NDC functions
